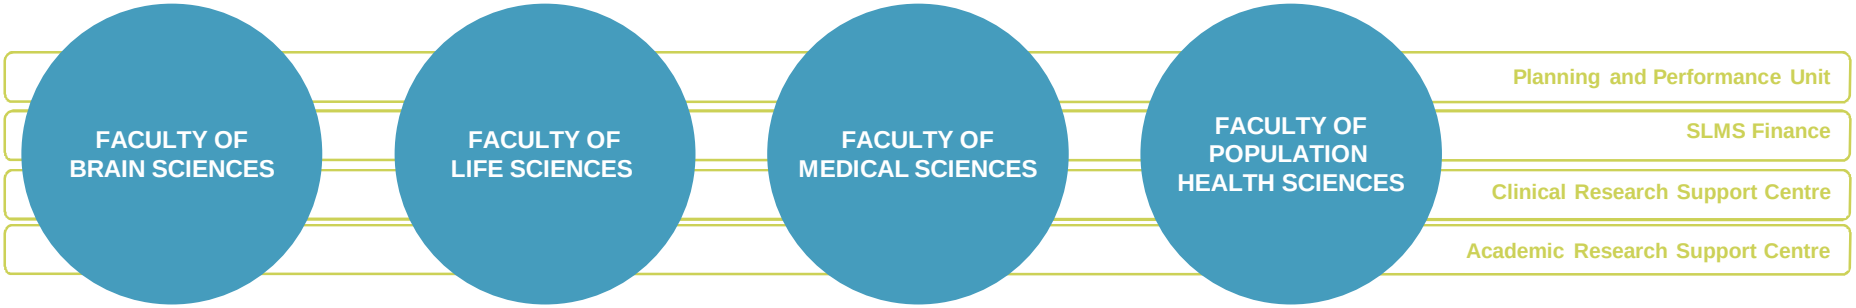
UCL SCHOOL OF LIFE AND MEDICAL SCIENCES

VICE PROVOST (HEALTH)
PROFESSOR SIR JOHN TOOKE



SLMS DIRECTOR OF PLANNING & PERFORMANCE
ANDREW WHALLEY

The Planning and Performance core team provides a strategic and project management capacity to support the academic activities of the School of Life and Medical Science.

The Unit develops and oversees the framework for strategic planning within the four Faculties and their constituent divisions and institutes. The Unit develops bespoke and general key performance indicators to inform Faculty and Institute planning processes. It supports an annual planning cycle that addresses academic ambitions alongside financial opportunities and ensures strategic alignment across Institute, Faculty, School and University levels.

P&PU develops School-wide policies in collaboration with UCL's corporate support services, reflecting the needs and ambitions of the School's four faculties. Policies apply in a range of areas such as staffing, health and safety, environmental impact, equalities action planning and business continuity planning.

The Unit also works closely with the faculties and the School Communications Board to develop and implement effective internal and external communications. The Unit sends out weekly internal bulletins, termly newsletters and brochures highlighting key areas of School activity such as Population Health and Experimental Medicine.

Finally, the PPU includes the Academic Careers Office, whose mission is to promote, support and develop all aspects of academic and clinical academic careers in the School.

SLMS FINANCE DIRECTOR
ARUN MISTRY

DIRECTOR OF CLINICAL RESEARCH SUPPORT CENTRE
PROFESSOR MONTY MYTHEN

Joint Research Office: Covering UCL, UCLH and Royal Free Hampstead NHS Trust, this office is responsible for the management, support and oversight of the clinical research portfolio. The JRO has dedicated teams in NHS Research Management and Governance, UCL clinical trials sponsorship and oversight, finance and contracts, education and biostatistics and risk and regulation. JRO staff support clinical investigators with the design, set up and approval of new clinical trials and other research projects. The JRO works closely with the R&D Offices of Great Ormond Street Hospital and Moorfields Eye Hospital.

UCLH/UCL NIHR Biomedical Research Centre management office: Now in its fifth year the Biomedical Research Centre (BRC) is the driver for experimental medicine at UCLH/UCL. The RSC provides the management support function for the BRC's research themes which reflect the expertise and world class research strengths of UCLH and UCL. The UCLH/UCL BRC works on important collaborative initiatives with UCL's two other NIHR BRCs at Great Ormond Street Hospital/UCL Institute of Child Health and Moorfields Eye Hospital/UCL Institute of Ophthalmology.

UCLH/UCL Clinical Research Facility: This 20-bed facility in the Elizabeth Garrett Anderson Wing of University College Hospital provides a high quality research environment and Good Clinical Practice trained research nurses and other staff, to ensure the safe conduct of clinical trials and other research. The CRFC has a major focus on experimental medicine research but also supports later phase trials, many of which are carried out under contract or in partnership with industry. The UCLH/UCL CRF is part of a network of UCL CRFs, which includes the Somers Clinical Research Facility at Great Ormond Street Hospital.

UCL Clinical Trials Unit: This clinical trials unit provides leadership for clinical trials at UCL and supports actual delivery of trials and studies. The UCL CTU focuses mainly on non-cancer clinical trials and works closely with UCL's other CTUs in cancer and primary care and mental health – PRIMENT, as well as with the MRC Clinical Trials Unit.

ACADEMIC RESEARCH SUPPORT CENTRE

DIRECTOR OF TRANSLATIONAL RESEARCH AND INDUSTRIAL PARTNERSHIPS
DAVID MILLER
PRINCIPAL RESEARCH COORDINATOR
CLAIRE GLEN
PLATFORM TECHNOLOGIES DIRECTOR
JACKY PALLAS

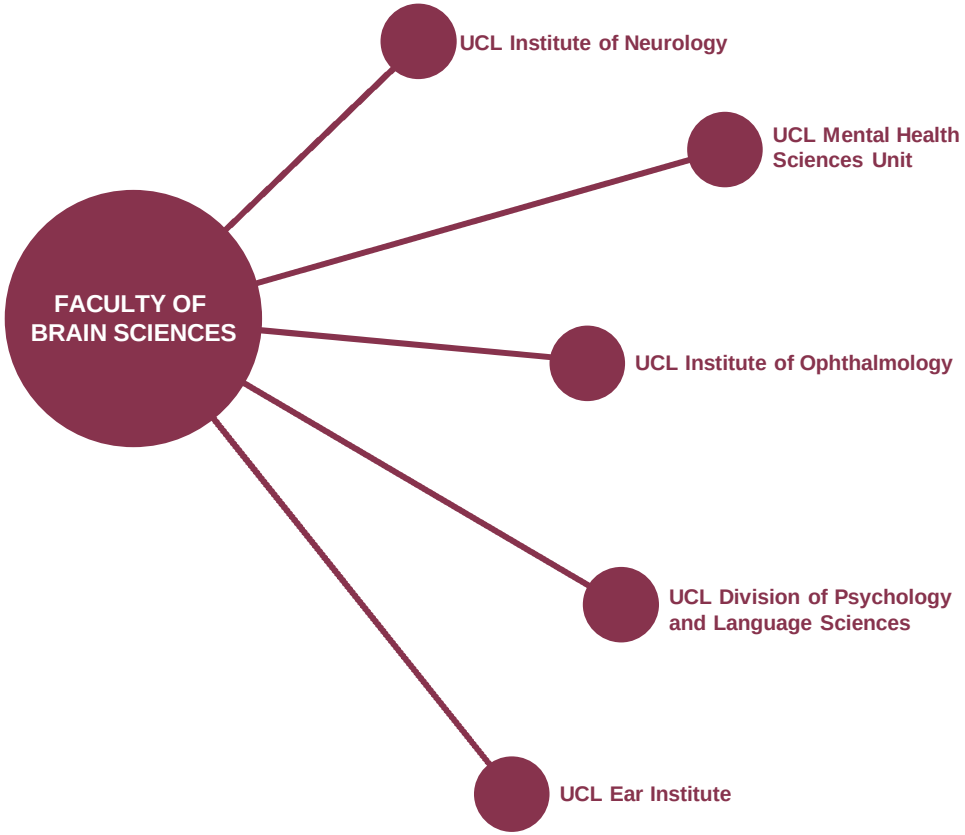
Research Coordination team: The Research Coordinators support and coordinate internal research initiatives, particularly relating to the SLMS Research Domains (Neuroscience; Basic life sciences; Cancer; Cardiometabolic science; Infection, inflammation and immunology; Frontier disciplines; Reproduction and development; Experimental medicine and Population health). Research Coordinators bring together communities by facilitating events and forums and encouraging academic interaction across Divisions and Institutes, and develop mutually beneficial relationships with external funding agencies.

Platform Technologies: The Platform Technologies team helps to develop closer working and shared knowledge between UCL research groups who have similar equipment and expertise. They aid cutting edge basic and translational research projects by more effective organization and implementation of these key resources.

Translational Research Office (TRO): The Translational Research Office team helps to facilitate the translation of UCL's basic and clinical research into therapies, techniques and medicinal products with therapeutic value. The team undertakes cost, risk and design assessments to support UCL investigators establishing more effective and reliable clinical trials.

FACULTY OF BRAIN SCIENCES

DEAN
PROFESSOR ALAN THOMPSON
FACULTY MANAGER
GEOFF DUNK



UCL EAR INSTITUTE

DIRECTOR
PROFESSOR DAVID MCALPINE
MANAGER
