Great Ormond Street Hospital Echo Course
part 2: Echo Assessment of Complex
Congenital Heart Disease
Saturday 8th & Sunday 9th October 2016

UCL Institute of Child Health and Great Ormond Street Hospital NHS Foundation Trust

As more and more children with congenital heart disease are surviving beyond infancy those working both in paediatrics and adult cardiology are increasingly finding themselves caring for patients who have undergone treatment for congenital heart disease.

This two day course looks at the morphology of both acyanotic and cyanotic cardiac lesions from atrial septal defects to univentricular hearts and the pre and post-operative echo assessment required for these patients. The course includes demonstrations of congenital heart disease on morphological specimens, and lectures on pre and post-operative echocardiographic analysis of these lesions. There will also be hands-on workshops on both afternoons, scanning patients with the lesions discussed in the morning. Most of these patients being scanned will have undergone cardiac surgery in the past.

Who should attend?
This course is suitable for those working in paediatric cardiology, paediatricians with an interest in cardiology and those working in adult cardiology wishing to increase their knowledge of congenital heart disease. The course would also be ideal for those who have attended our basic echo course and would like to increase their knowledge of congenital heart disease.

Course Directors:

Professor Jan Marek
Director of Echocardiography & Prenatal Cardiology, Consultant Cardiologist
Great Ormond Street Hospital for Children

Dr Michelle Carr
Consultant Cardiologist
Great Ormond Street Hospital for Children

Dr Andrew Cook
Senior Lecturer
UCL Institute of Cardiovascular Science

Miss Gill Riley
Chief Echocardiographer
Great Ormond Street Hospital for Children

Course Fees

Early Bird fee: £470 (book before 15/08/2016)

Standard Fee: £510 (book after 15/08/2016)
