

Cologne Summer School in *Neural circuit analysis on the cellular and subcellular level*

Understanding nervous system activity in its physiological and pathophysiological conditions is a fundamental goal of the neurosciences.

We examine nervous system function in health and disease across the molecular, cellular and network level. For eighteen Master's students we announce a summer program with lectures and hands on experiments in neural circuit analysis of:

The summer school will take place from

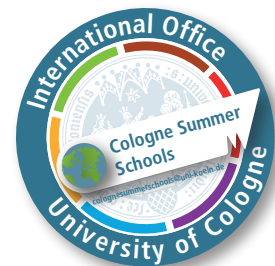

June 22nd - 29th, 2014

in the biological department and medical faculty of the University of Cologne.

For more detailed information please visit the website:
