Academic Reading in French, German and Italian

Part-Time Courses: October 2017-March 2018

Introduction

Academic Reading Courses in French, German and Italian are offered from beginners to advanced levels and are especially designed to assist research students with the acquisition of reading skills from the very beginning of their graduate studies. These courses have been taught successfully over the last 10 years.

All courses are taught by language tutors with experience in the methodology of reading skills. Students are introduced to core concepts of the language and specific aspects of reading at the respective levels, as well as selecting text material relevant to their own research for analysis. In the term 3 workshops particular attention is paid to participants' individual needs.

Participants who complete a course are able to assess, read and translate original academic texts, at the respective levels, as well as scan research material in order to assess its suitability.
