CONTENTS

1. Sustainable Development and the Urban Agenda	7. Financial Incentives and Sustainable Urban Development
2. Dimensions of Sustainable Urban Development	8. Spatial Planning for Sustainable Development
3. Producing Urban Development	9. Regulating for Sustainable Urban Development
4. Governing for Sustainability	10. Prospects for Sustainable Urban Development
5. Governing and Learning	
6. Information and Sustainable Urban Development	

Achieving urban sustainability is amongst the most pressing issues facing planners and governments. This book is the first to provide a cohesive analysis of sustainable urban development and to examine the processes by which change in how urban areas are built can be achieved.

The author looks at how sustainable urban development can be delivered on the ground through a comprehensive analysis of the different modes of governing for new urban development.

The book:

- Considers a range of policy tools that influence urban development and that constitute different modes of governing
- Provides an innovative conceptual emphasis on learning within governing processes
- Draws on a wide range of existing research, policy and literature together with case study material focussing on London

The book is above all concerned with demonstrating how sustainable urban development can be delivered in practice. It will be essential reading for students, academics and professionals in planning, urban design and architecture world-wide working to achieve sustainability.

'This is the textbook on achieving sustainable urban development that everyone has been waiting for.'
Professor Sir Peter Hall, Bartlett Professor of Planning and Regeneration, University College London

Yvonne Rydin is a Professor at the Bartlett School of Planning, UCL and Co-Director of the UCL Environment Institute. Dr. Rydin has studied housing land policy, urban redevelopment, transport management, local air quality policy, countryside protection and water management. Her particular interests are the processes of strategy development, public participation, the role of social capital in planning and the analysis of policy discourses. She is the author of five books including *Urban and Environmental Planning in the UK* (Palgrave, 2nd ed. 2003.)
