ACCIDENT/INCIDENT INVESTIGATION
WORKSHOP

FOR: Any UCL staff carrying out incident investigations; also suitable for Departmental Safety Officers, Trade Union Safety Representatives and others who may take part in investigations.

SCOPE: Accident causation theory; influences of human behavior; information gathering techniques. Carrying out an investigation: gathering information by interviewing; analysis of information to identify basic and root causes.

OUTCOMES: Following completion of both the online component and this training workshop participants will be able to apply the principles of incident investigation to conduct interviews, gather information and then analyse the information to determine basic and underlying causes of an accident/incident.

PREREQUISITES: Complete the on-line Principles of Accident and Incident Investigation before attending the workshop.

DURATION: 3 hours

CHARGES: A ‘no show’ fee of £50 will be charged to your department if you fail to attend when booked on the course event.

DATES: Safety Services is reviewing this workshop and the revised/new course will be advertised in due course.
