Compressed Gas Safety in the Laboratory

Overview

The Compressed Gas Safety in the Laboratory eLearning course is provided by the UCL Department of Chemical Engineering for its staff and students and is generously shared with all members of UCL.

Information

The course is split into five sections:

- the hazards of compressed gases
- working with gas cylinders and regulators
- working with pipe and tube
- how to correctly select and use gas fittings
- ways of controlling the risks

For

Anyone working with compressed gases in a laboratory. The course is intended to be taken with supplementary training also available from UCL Safety Services: Principles of Laboratory Safety eLearning and Principles of Risk Assessment.

Accessing the training

Use your UCL user ID and password to log into UCL Moodle. This is the same username and password you use to access your UCL email.

Enter ‘Chem Eng Compressed Gas Safety’ in the search box on the ‘My home’ page, click on the course title and click the ‘Enrol me’ button under the self-enrolment section.

The enrolment key is: CECG

Before you begin

A pair of headphones is required for listening to the presentation if you are working in a public area.
