Overview

This e-learning course aims to inform participants about good laboratory practice and instill safe behaviours which apply to all laboratory environments. The material covers six key areas presented in short presentations, with a quiz at the end.

Scope

The course modules are:

- Understanding your responsibilities
- Understanding hazards
- Risk assessments and procedures
- Controlling risks
- Managing waste safely
- Knowing how to respond in an emergency

For

- New postgraduate research students starting work in laboratories (mandatory)
- New laboratory staff as part of their safety induction (recommended)
- Staff and students who are working in a laboratory

Before you begin

- The e-learning module will be more relevant to you if you have completed an organised local familiarisation of your building.
- A pair of headphones is required for listening to the presentation if you are working in a public area.

Accessing the training

You will need your UCL ID and password to log into UCL Moodle. This is the same username and password you use to access your UCL email.

Enter ‘Principles of Laboratory Safety’ in the search box on the 'My home' page, click on the course title and click the ‘Enrol me’ button under the self-enrolment section.

Information about Moodle

Having trouble logging in? The Moodle FAQs can help. Alternatively contact UCL Moodle support at E-Learning Environments
