Overview

A risk assessment requires you to think about what might cause harm to people and decide whether you are taking reasonable steps to prevent that harm. Applied to the workplace it is about identifying sensible measures to control risks.

Information

This course provides an overview of the underlying principles of risk assessment:

- The identification of hazards
- Deciding who might be affected
- Evaluating the risks and deciding on precautions
- Recording the findings and implementing them
- Reviewing the assessment and making changes if necessary

For

Anyone who is responsible for leading and/or managing work activities and those intending to attend any of the risk assessment workshops run by Safety Services.

Before you begin

- A pair of headphones is required for listening to the presentation if you are working in a public area.

Accessing the training

Use your UCL user ID and password to log into UCL Moodle. This is the same username and password you use to access your UCL email.

Enter ‘Principles of Risk Assessment’ in the search box on the 'My home' page, click on the course title and then on the Enrol me button under Self Enrolment (no enrolment key required).
