Literacy learning in the early years of primary school lays foundations for all future learning and development. ‘Literacy Foundations’ is a collection of one day professional development courses for those preparing children for early literacy success.
Courses:

- Visible learning and invisible teaching - key stage leaders
- Principles, progression and application of phonics and phonological awareness
- From mark making to writing
- Learning to talk - talking to learn
- Learning to be a reader, sharing and choosing books
- Developing comprehension using picture books
- Beyond the baseline - observing and assessing literacy in Year 1

‘Literacy Foundations’ is developed from the best available evidence and theory about literacy development.

It is based on a socio-cultural perspective of child-centred learning and development, promoting the child as a competent learner and active agent in his own development.
