Protocol for the Questionnaire Administration

Dear Teacher,

You may wish to read the statement below to the students before they begin the questionnaire although the same information is displayed on their screens before the survey begins.

Dear Students,

This questionnaire is part of a national five year project in a number of schools in England.

Your answers are going to be used for research purposes only. Neither your school, nor your teachers, nor anyone else outside the researchers who are working on this project will see your individual answers or names.

We are asking everyone for their names as we want to ask everyone to complete another questionnaire. In addition we will identify a small number of students and invite them to take part in interviews. Your name will not be used for any other purpose. If you want to get in touch with us personally please visit our website www.ioe.ac.uk/chemistryforall.

Thank you for taking part in this important project.

Yours sincerely,

Michael Reiss
Professor of Science Education
