In attendance:
Corrinne Frazzoni [CF] (Minutes)

Minutes

1. Welcome
The Chair welcomed the group to the meeting and apologies were noted.

2. Approval of Minutes of previous meeting and review actions
The minutes of the previous meeting held on 18th February 2014 were approved. The Action Points from the previous meeting were reviewed and amended as per the attached Action Sheet.

3. Executive ToR
The Terms of Reference were reviewed by the Executive.

Action: MW to re-word ToRs to reflect that Project Board should sign off PIDs, to avoid unnecessary delay, and remove or update responsibilities, e.g. “Act as the change control group for all major changes projects.”
ToRs should include related activities, e.g. DHS and JDI together with reference to ToR’s from other RITS domains.

4. Research Data Services: Benefits and Strategy
The benefits register and strategy were reviewed by the Executive.

4.1 Benefits Register
- Each benefit needs to be owned by executive members
- Owners should become sponsors of project bids and associated activities
- What is the process for identifying owners?
- Need to think about how to incorporate more widely
- Benefits review should be a standing item at each meeting

Action: AP to draft new benefit “Reducing institutional risk”.

4.2 Strategic Objectives
• Need to reflect the activities in data management across college, e.g. Secure data facilities and Jill Dando Institute secure data analysis suite: what is the procedure to show NHS and other data provider requirements have been met in terms of identifiable data?

**Action:** AP to re-draft Y13/14 annual objective achievement “Data Safe Haven implementation as part of wider IDHS services”.

### 4.3 EPSRC Expectations

**Action:** PA/MW to re-draft and review EPSRC expectations section to assure they remain accurate, in addition should include a regular policy review across funding sources to assure contemporary alignment e.g. Wellcome Trust policy.

### 5. Project bids 2014/15

#### 5.1 UCL Research Data Archive Pilot

- Issues raised:
  - Are costs front-loaded? Users pay up front for a set period
  - What happens if project funding has ended?
  - Clinical data must be kept for 30 years
  - What about identifiable data?
  - If institution gets funding for open access how does that count in terms of publication?
  - Free at point of use
  - Some is channeling into library via publishing fund
  - A model paper is being prepared for the VP by RDS on this
  - Need to keep cost low but highlight value
  - How to include in a funding application

**Action:** PA/MW to consider issues around publication and data archiving and report back to group

**Action:** MW to circulate JISC statement

**Action:** JP to present the pFACT and TRAC process as it applies to services like RDS (Storage and Archive)

#### 5.2 Distributed Data Storage Facility

Bid has been de-prioritised and unlikely to be funded in the FY

#### 5.3 UCL Research Data Management Coordinator

Bid will provide dedicated resource to facilitate the development and executing of the RDS Communication plan. The resource will be managed by RDS but be embedded in Library Services to leverage expertise.

#### 5.4 Authentication Pathfinder

Dedicated resource to elicit and promote RITS IAM needs into the larger IAM project. It is intended to interact with related activities in the Farr@UCLP and ADRC activities.

### 6. Programme update

#### 6.1 Research Data Storage (MW)

- System roll-out continues
  - User base increasing via word of mouth
  - HoDs presentation schedule planned over next 6 months
- Stage Plan phase 2
  - Capacity expansion (3500TB WoS) installed and commissioned
  - Maintenance contract renewal (existing and new storage)
- Issues (expired)
  - Premature sign off forced by need to spend. Not good practice and raised as an issue in lessons learned.
- Will seek to close this project in the coming weeks
- Senior user signoff, service introduction (ep), residual funds
- Move to service development phase

6.2 IDHS Data Safe Haven (AP)
