Medicine, Conflict and Survival is an international journal for all those interested in global health and human security including:

- the causes and consequences of war and group violence
- nuclear, chemical and biological weapons of mass destruction, their influence on health and distribution of global resources
- the ethical responsibility of health professional in relation to war, social violence and human rights abuses
- medical and humanitarian aid in conflict situations
- the drivers of war such as poverty and underdevelopment
- structural violence and global health
- the roles and responsibilities of Government and of International Governance in reducing the risk of violent conflict.
