

Open Access for the REF: RPS search settings

v 1.2

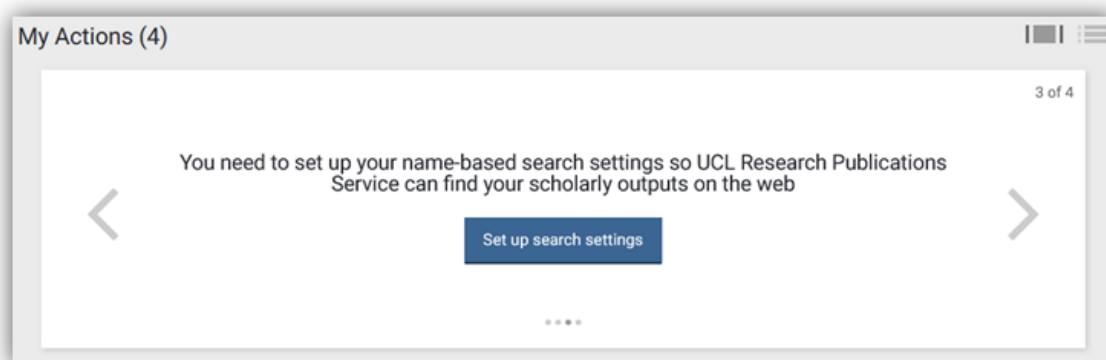

The open access policy for the next REF applies to articles and conference papers accepted after 1 April 2016. All researchers must upload their papers to UCL's Research Publications Service (RPS), **or they will not be eligible for the next REF**. Contact the Open Access Team (open-access@ucl.ac.uk) if you have any questions.

In some disciplines, RPS finds records of papers in databases like Scopus and Web of Science, based on your RPS search settings. After finding a publication, RPS will either put it in a pending list for you to manually review and 'claim', or it will claim it for you automatically (after recognising identifiers such as your email address or ORCID). For more on auto claiming, see our '[Automatic publication claiming](#)' guide. This guide will help you set up and configure accurate searching for your publications in RPS.

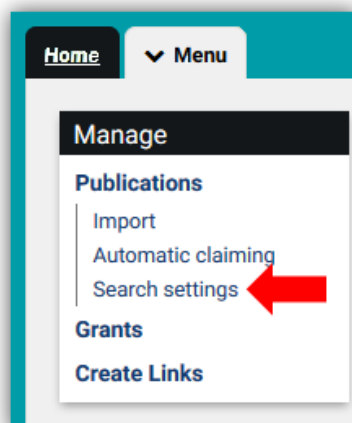

Please note: RPS will send you email notifications when you have publications in your pending list to review and claim (or reject). You should not rely on these notifications as reminders to upload, as they may be sent after the deadline for uploading the paper to RPS has passed (3 months after first online publication). Notifications will **not** be sent for publications that are automatically claimed. Instead, check your publications list frequently and upload your final manuscript as soon as it is accepted for publication (guides are available [here](#)). Publication details retrieved by RPS searches after publication will be merged with manually created records.

To turn on and set up searching in RPS:

1. Log in to RPS at <http://rps.ucl.ac.uk/>
2. Check the 'My Actions' section under the welcome message – scroll through by using the arrow buttons. If you see the following message, searching is turned off:

Click on the 'Set up search settings' link. If searching is already switched on, you can update your settings by clicking on the 'Menu' tab then the 'Search settings' link from under the 'Publications' header:

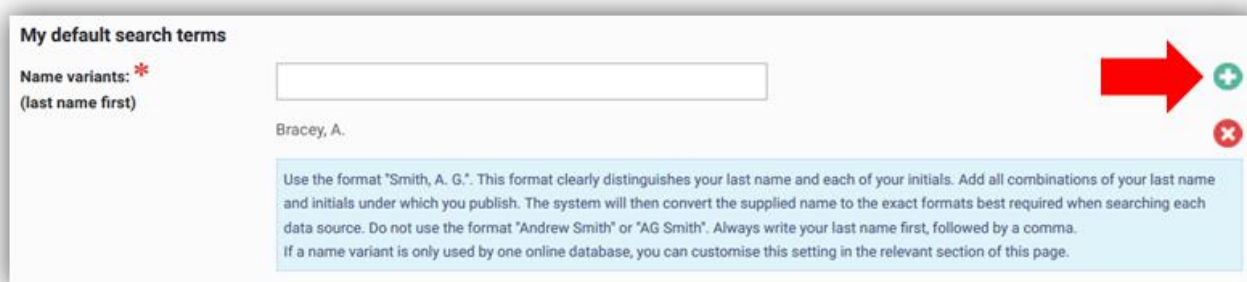

3. In the 'Name variants' section, add all variations of your name that appear in your published papers, in all formats your publishers use, e.g.

- Smith, Jonathan Andrew
- Smith, Jonathan A.
- Smith, Jonathan
- Smith, Jon A.
- Smith, J. A.
- Smith, J.

You can use the [author identifier tool](#) in Scopus to check name variants.

4. Use the Plus (+) and cross (x) symbols to add and remove name variants:

5. In the 'addresses' section, add all variations of your institutional affiliation that might appear in your published papers (including previous institutions, if you wish), e.g.

- UCL
- University College London
- Univ Coll Lond
- Institute of Neurology
- ION
- Newcastle

If there is an identifiable postcode for your institute, you could consider entering it in this section.

6. Scroll to the bottom of the page and put a tick in the 'Search by name' column next to the databases that you want RPS to search. If in doubt, select them all. Keep 'Simple mode' selected (as below) for each - 'Advanced mode' is not recommended. Click save:

Source-specific name-based search terms

Looking for your ORCID or figshare settings? They have been moved to the [Automatic Publication Claiming page](#). This page now only shows data sources whose data supports name-based searches.

	Search by name	Simple mode	Advanced mode	Use default search terms (simple mode only)
+ arXiv Manage arXiv author ID	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>
+ CINII EN	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>
+ CINII JP	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>
+ DBLP	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>
+ MLA	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>
+ PubMed	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>
+ Scopus Manage Scopus IDs	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>
+ Web of Science Manage Researcher ID	<input checked="" type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input checked="" type="checkbox"/>

Save

7. Unless you have a very common name (and so need to restrict your searches further, to avoid finding records that don't belong to you), you are strongly advised **not** to add any search terms other than your name variants and institution (e.g. UCL, University College London, Univ Coll Lond).
8. If RPS is returning too many publications because you have a common name, consider using publication year (start date) to differentiate your papers from other authors'.
9. If you have created an ORCID and linked it in RPS (www.ucl.ac.uk/library/open-access/ORCID), papers published with your ORCID will be claimed for you automatically. Publications will also be automatically claimed if you have verified other identifiers that appear on your publications (see our '[Automatic publication claiming](#)' guide).
10. For further information on RPS search settings, see: <https://www.ucl.ac.uk/isd/services/research-it/help/faqs/rps-faqs>
