You have industry contacts but need support to get some collaborative work going.

You are engaged in research which has translational potential and you are seeking support in developing plans and securing funding from translational schemes.

You are doing research that you think might be patentable or commercialisable, or you already have IP, know-how, or a patent and want to develop it.

You would like your research to benefit by involvement with an industrial partner and want to develop a relationship.

You have industry contacts but need support to get some collaborative work going.
