

CURRICULUM VITAE ANDRES RUIZ-LINALES

Education/Qualifications:

- M.D., Colegio Mayor de Nuestra Señora del Rosario, Bogotá, Colombia. First Class 1984.
- M. Sc. (Biochemistry), Université de Paris VII, Paris, France. 1987.
- Ph. D. (Genetics), University of Cambridge, Cambridge, England. 1991.

Professional History

- 1986-1988 Graduate Student. Laboratoire de Virologie Moléculaire, Institut Pasteur (Dr. Marc Girard), Paris, France.
- 1988-1991 Ph.D. Student. Department of Genetics, University of Cambridge (Dr. Gabriel Dover) Cambridge, UK.
- 1992-1994 Postdoctoral Fellow. Department of Genetics, Stanford University Medical School (Dr. Luca Cavalli-Sforza), Stanford, California, U.S.A.
- 1994-1998 Assistant Professor, Department of Biochemistry, Universidad de Antioquia Medical School, Medellín, Colombia.
- 1998-2000 Lecturer (non-clinical). Department of Medical and Community Genetics. Imperial College School of Medicine, London, UK.
- October 2000: Lecturer. Department of Biology (Galton Laboratory), University College London, Wolfson House, 4 Stephenson Way, London NW1 2HE. U.K.
- October 2004: Senior Lecturer. Department of Biology (Galton Laboratory), University College London, Wolfson House, 4 Stephenson Way, London NW1 2HE. U.K.
- October 2006- Current: Professor of Human Genetics Department of Biology (Galton Laboratory), University College London, Wolfson House, 4 Stephenson Way, London NW1 2HE. U.K.

Other appointments and affiliations

- 1998-current. Honorary Professor. Universidad de Antioquia Medical School, Medellín, Colombia.

Prizes, awards and other markers of esteem

- CESTA fellow of the French Ministry of Research (1986-1988).
- Overseas Research Student (ORS) Award from the Vice-Chancellors and Principals of the Universities of the United Kingdom (1988-1991).
- Genetics Society of America travel award 1993.
- Ciba (now Novartis) Foundation Fellow 1995.
- Young Investigator Award. The National Alliance for Research on Schizophrenia and Depression (USA) 2002.
- 2002-2005. Editorial board member. Annals of Human Genetics.
- 2005-2007. Senior Editor. Annals of Human Genetics.
- 2008-current. Editor in Chief. Annals of Human Genetics.

Research projects ongoing or completed during the last 3 Years:

1. "A search for genetic loci involved in predisposition to Bipolar mood disorder in the population of Antioquia, Colombia: genetic analyses". (2001-2004) Agency: The Wellcome Trust (UK) - Principal Investigator: Andres Ruiz-Linares. This project aimed at performing linkage analyses on a large collection of Bipolar pedigrees collected in Antioquia, Colombia.

2. "Linkage Disequilibrium Mapping of Bipolar Disorder in Antioquia, Colombia". (2002-2004) Agency: The National Alliance for Research on Schizophrenia and Depression (NARSAD). Principal Investigator: Andres Ruiz-Linares. This project aimed at examining the genetic demography of two Hispanic population isolates (Antioquia and the Central Valley of Costa Rica), compare linkage disequilibrium in these two populations and initiating the application of population methods to the identification of gene regions involved in susceptibility to Bipolar Disorder in Antioquian patients.
3. "A population genetic study of autism in a founder population" (2004-2005) Principal Investigator: Andres Ruiz-Linares. Cure Autism Now Foundation (USA). This project initiates a research program focused on the use of population approaches to the identification of genes involved in susceptibility to autism. Patients will be ascertained in the genetically isolated population of Antioquia and clinically characterized using state-of-the-art clinical procedures. Cell lines from the patients (and their parents) are being established in view of subsequent family-based genetic association studies.
4. "Centre for Comparative Genomics" (2004-2007) Agency: Natural Environment Research Council (UK) Co-Principal Investigator: Andres Ruiz-Linares. This is an infrastructure grant for the establishment and maintenance of a high-throughput sequencing/genotyping facility in the Department of Biology at UCL.
5. "Structure of genetic diversity in Native Americans and Hispanics."(2005) Agency: Marshfield Foundation (USA) Principal Investigator: Andres Ruiz-Linares. Here we aim at analyzing patterns of genetic diversity within and between Native and Admixed populations across the Americas. The primary data to be collected consist of whole genome scans of microsatellites (800) and insertion-deletion polymorphisms (800), to be obtained in 20 admixed and 20 Native populations from Mexico to Patagonia.
6. "Finding genetic risk factors for Parkinson's disease in genetically isolated populations" (2005-2007) Michael J. Fox Foundation for Parkinson's Research. Co-Principal Investigator: Andres Ruiz-Linares This project aims at the follow-up in PD patient samples from several population isolates (in Holland, Turkey and Colombia) of candidate regions previously identified through whole genome scans.
7. "Mapping Tourette Syndrome in a population isolate" (2005-2009) Agency: NINDS/NIH (USA). Principal Investigator: Andres Ruiz-Linares This project will establish a research program on the genetic analysis of Tourette Syndrome employing family and population approaches. Cases will be recruited in the recently founded population of Antioquia (Colombia). Clinical diagnosis and assessment of disease severity will employ the approach used by the TSA international consortium for genetics. Genetic analyses will focus on the follow-up of results from other studies, including the TSA-ICG and a parallel study carried out in the Costa Rica Central Valley by collaborators from UCLA.
8. "Building a Latino admixture map & pilot study to find Type 2 diabetes risk" National Institutes of Health (USA). (2006-2007) Co-investigator, Dr. David Reich, Harvard, PI). This project aims at developing a marker map useful for admixture mapping in Latino populations and to perform an initial application of this map to the identification of genes involved in susceptibility to type 2 diabetes. The patients and controls (2000 each) will be ascertained in the population of Antioquia, Colombia.
9. "Bipolar endophenotypes in population isolates" Agency: NINDS/NIH (USA). (2006-2011) Co-investigator, Dr. Nelson Freimer, UCLA, PI). This project aims at identifying endophenotypes associated with bipolar disorder in the families from the populations of Antioquia (Colombia) and the Costa Rican Central Valley. We will obtain structural MRI scans and a variety of neurocognitive measures in members of extended pedigrees that have been previously extensively studied, including by whole genome marker scans. Endophenotypes that demonstrate familial aggregation will be used for QTL linkage analysis.

10. "Detecting signatures of natural selection in the human genome with geographically explicit models" (2010-2013) Co-Investigator. Francois Balloux PI. Agency: BBSRC.
