Starting Stata from a Cluster Room Computer

In order to run Stata from the Cluster Room Computers you need to follow these simple steps.

1. Click the **'Start'** button
2. Navigate to **'Programs'**
3. Under the **'Software S-Z'** menu you should see an icon for **'Stata 8 Intercooled'.** Select the icon.

Accessing Data Files

In order to complete your Stata work you will need to download data files and store them in an accessible location.

- Download the Data files required from the course web page
- Save the data files to your **R:** Drive - this is your personal file space provided by the College
- Start Stata
- Select the **'Open'** option from the **'File'** menu
- Navigate to where you have saved the data file too - the path will not have a drive letter such as **R:** but **/home/{your userid}** is the equivalent to the **R:** Drive
- Open the data file
