UCL

INDUSTRY PARTNERSHIP

Work with us to provide studentships and support

Contact: David Barber - david.barber@ucl.ac.uk
Sharon Betts - sharon.betts.12@ucl.ac.uk

WHY WORK WITH US?

Engagement with a broad range of non-academic partners is a key component of our Centre. This engagement provides assurance that both the research supported by the Centre and the skills developed in our students will be relevant and valuable to industry and society at large, while also informing and supporting UK industry in producing novel algorithms and new technology.

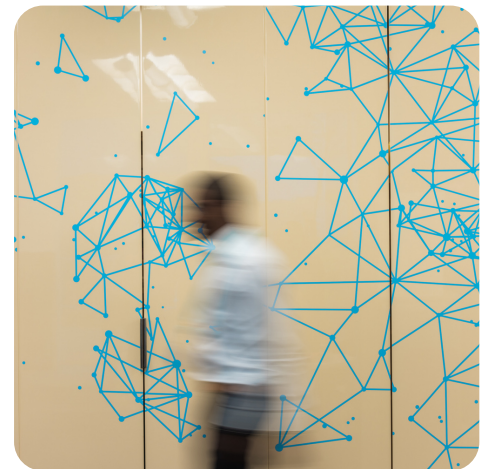

HOW YOU CAN GET INVOLVED

Each of our partnerships is unique. There are a variety of ways in which our industry partners can support the Centre, from studentships to training and placement opportunities. Partners can sponsor workshops, be guest speakers at our weekly seminar series and sponsor studentships in a research field of interest.

THE BENEFITS OF PARTNERSHIP

By investing in our studentships you can help support the next generation of AI creators and benefit from leading research in foundational AI. Establishing close links to world leading students and researchers brings valuable insight into solving some of the most challenging problems facing industry and society.

THE ASK

Sponsor/Donate a studentship

Sponsor a workshop

Be a guest speaker

Present an industry challenge

Provide an internship

Host a conference

THE GAIN

Access to world leading talent

Tackle commercially relevant problems

Benefit from UCL's expertise and access to world class facilities

Opportunity to participate in our Advisory Board, shaping the future strategy of the CDT

Help address societal challenges using AI

COME SHAPE THE FUTURE WITH US
