1 Overview

1.1 Short description

This module explores the development of archaeological resource management and its contemporary significance using comparative Asian perspectives. Western paradigms dominated conservation ethics and attitudes towards reconstruction and authenticity, but these have been strongly challenged in the last two decades by Asian approaches to these issues. Concepts of authenticity and value have been reformed, the use of traditional materials rethought, and the role of ‘living communities’ reconsidered.

The module will explore these issues across Asia, specifically examining developing approaches to issues such as historic towns, World Heritage nomination, sustainable tourism, maritime heritage, public engagement, and the role of international agencies (such as UNESCO, ICOMOS and the World Monuments Fund).

1.2 Timetable: week-by-week summary

Students should check their e-mail and Moodle frequently as any changes to arrangements and other messages will be communicated by this means.

**Term II Tuesdays 11.00-1.00pm in Room 412 (Institute of Archaeology)**

1.3 Introductory reading

1.3.1 Asian heritage

1.3.1.1 Key reading

1.3.1.2 Further reading

1.3.2 International heritage management

1.3.2.1 Key reading

1.3.2.2 Further reading

1.3.3 The Burra Charter

http://australia.icomos.org/publications/charters/

This sets out approaches to site management that are gaining acceptance amongst professionals worldwide. This charter has been revised: see Truscott, M & Young, C (2000) Revising the Burra Charter: Australia ICOMOS updates its guidelines for conservation practice, in *Conservation and Management of Archaeological Sites*, 4(2).

1.3.4 Useful websites

- ICOMOS http://www.icomos.org
- ICCROM http://www.iccrom.org
- UNESCO World Heritage Centre http://whc.unesco.org/
- UNESCO Bangkok http://www.unescobkk.org/
1.4 Methods of assessment

The module is assessed by means of two pieces of coursework totalling c. 4,000 words. These comprise an academic essay of c. 3000 words (counting 75% towards your final mark), and a poster presentation, accompanied by a supporting document of c. 1000 words (counting 25% towards your final mark).

The topics and deadlines for each assessment are specified below (section 2.4). If students are unclear about the nature of an assignment, they should contact the Module Co-ordinator. The Module Co-ordinator will be willing to discuss an outline of their approach to the assessment, provided this is planned suitably in advance of the submission date.

The module comprises 15 credits towards your total degree.

1.5 Teaching methods

The module is taught through lectures, seminars, film nights, and fieldtrips.

Lectures have weekly recommended reading, which students will be expected to have completed in advance to be able to fully follow and actively contribute to discussion.

Most sessions are held on Tuesdays (11:00-13:00) in Room 412 (see timetable 1.2).

Except in the case of illness, the 70% minimum attendance requirement applies to lectures and seminars on the module. Film night is optional.

1.6 Workload

There will be 24 hours of seminars, lectures, fieldtrips and films. Students will be expected to undertake around 60 hours of reading for the module, plus c. 66 hours preparing for and producing the assessed work. A total workload is estimated as 150 hours for the module.

1.7 Prerequisites

This module does not have any prerequisites.

2 Aims, objectives and assessments

2.1 Aims

- To explore the development of archaeological resource management and its contemporary significance, using comparative Asian perspectives.
- To provide participants with training in research methods and practices relevant to the documentation, analysis and contemporary use of archaeological resources in the region, including the role of values and stakeholders
- To provide an opportunity for critical reflection of ethical approaches to sustainable development and rights-based management
- To facilitate debate on the theory and methodology of value-based management planning processes in Asia

2.2 Objectives

On successful completion of this module a student should:
• Have a critical awareness of the issues in Asian heritage resource management, and the contemporary role of heritage in Asian societies
• Understand the role heritage management can play in the conservation, interpretation and sustainable use of cultural heritage in Asia
• Be able to facilitate debate on the theory and methodology of value-based and rights-based management processes

2.3 Learning outcomes
On successful completion of the module students should be able to demonstrate:

• Observation and critical reflection
• Application of acquired knowledge
• Written and oral presentation skills

2.4 Coursework
In this module your essays should examine theoretical issues, using heritage sites and practices, from any area within Asia, to illustrate your discussions.

Like most academic writing, your essays should present an argument supported by analysis. Typically, your analysis will include a critical evaluation (not simply description) of concepts in some subset of heritage management theoretical literature. Remember, you must draw upon readings from multiple class sessions, examine some of the primary literature in addition to secondary literature, and use references to support your assertions.

Students are not permitted to re-write and re-submit essays in order to try to improve their marks. However, the module co-ordinator is willing to discuss an outline of your approach to the assessment, provided this is planned suitably in advance of the submission date.

For assignment 1 a range of possible essay topics is suggested below, but students are also invited to identify an original topic in consultation with the module coordinator (the essay title will be subject to their approval). The topic should be clearly related to at least one of the themes covered in the classes. Students wishing to write on topics that have not yet been covered in lectures are invited to seek additional guidance from the coordinator.

For assignment 2, the topics and approaches will be discussed in class, well in advance of the submission deadline. If students are unclear about the nature of an assignment, they should discuss this with the Module co-ordinator.

Please note that in order to be deemed to have completed and passed, it is necessary to submit all assessments.

2.4.1 Assignment One - deadline 26 February 2019
This assignment will take the form of poster. Posters are increasingly used as a means of communication and engagement at conferences, providing an opportunity to succinctly present current work/research. Often poster sessions are used to enable audiences to meet and discuss the work with the poster originator.

Your poster should be supported by a short essay (c 1,000 words) that provides background arguments, theories, and supporting references. It should not simply
duplicate the material in the poster, but should explain details of theoretical and practical issues that informed the poster arguments, source information on images used in the poster, and provide supporting bibliographic references. The paper should be of the normal academic essay standard.

You need only submit the written paper to Turnitin. Print a copy of the paper and submit in the normal way, with a cover sheet. The poster does not need to be submitted to Turnitin, and should not be printed, but rather emailed to the module coordinator (tim.d.williams@ucl.ac.uk).

After the poster and paper have been marked, students will have the opportunity to make changes to the poster before it is printed for the end of term presentation (on the 22/03/2019). The module coordinator will arrange the printing of the posters.

The topic of the poster should explore either (a) some facet of the impact of visitors at an archaeological site, or (b) an aspect of the conservation/management of a heritage place in Asia.

Select a single place/landscape, well known to you, from the Asian region. Check with the module coordinator regarding the topic you plan to tackle before you commence work.

The Poster should:

1) Introduce and locate the site/landscape
2) Sets out the problems or issues that you are focusing on – this should explicitly make use of background literature, including works of wider theoretical and practical significance, which should be set out in the supporting written paper.
3) Present the approaches adopted at the site/landscape and your critique of the success of these approaches. Again, make use of wider literature and support this in the written paper.
4) Conclude by posing questions to your reader – perhaps highlighting potential future strategies, questioning alternative approaches, considering the application of approaches to other sites in the region, etc.

Support on poster design will be available on Moodle and specific support will be provided by the module coordinator.

Primarily this exercise is about content, academic argument and clarity of message. **Marking:** 75% of the mark will be allocated on the standard academic marking criteria – structure of argument, critical thinking, use of sources, etc., based on both the poster and the supporting document. Presentation skills and design are useful career skills to develop, and 25% of the mark will be allocated for the design and presentation of the Poster.

2.4.1.1 General reading

Explore readings in the various sessions, but ideas might also come from:

2.4.2 Assignment Two - deadline 23 April 2019

Essay topics are negotiable, and students are encouraged to suggest their own. Please remember to agree the exact title of your essay with the module coordinator before you start work, and then make sure that this is the essay question used on the submitted work.

Your essay should be 3,000 words (in the range 2,850-3,150 words) in length. You should use illustrations as appropriate.

Some suggested topics:

1. How has the Nara Document of Authenticity impacted on Asian archaeological heritage management? Is authenticity still a useful concept within Asian heritage management?
2. How can notions of culturally diversity be applied Asia heritage management?
3. Is there a role for reconstructed heritage sites in public engagement?
4. Explore the tensions between youth and tradition in the intangible cultural heritage. How can traditional cultures be transmitted between generations? Is change inevitable or desirable?
5. Discuss the impact of globalisation at a local level (use examples). Does globalisation contribute to people’s changing cultural values?
6. Discuss the contribution that heritage makes to peoples’ sense of self and place: is heritage central to people's cultural identity in Asia (use examples)?
7. ‘Heritage tourism’ comprises a significant proportion of the global phenomenon of tourism. Discuss the impacts and potential of heritage tourism on the management of heritage sites in at least two Asian countries.
8. Compare the two versions of The Principles for the Conservation of Heritage Sites in China (2002 and 2015). To what extent does this document reflect a
mixture of western and eastern conservation ethics and values? Discuss the strengths and weaknesses of this form of international collaboration.

2.4.3 Word Counts

The following should not be included in the word-count: title page, contents pages, lists of figure and tables, abstract, preface, acknowledgements, bibliography, lists of references, captions, contents of tables and figures, and appendices.

Assessment 1 – word count 950-1050 words for the supporting document.

Assessment 2 – word count 2,850-3,150 words.

Penalties will only be imposed if you exceed the upper figure in the range. There is no penalty for using fewer words than the lower figure in the range: the lower figure is simply for your guidance to indicate the sort of length that is expected.

In the 2018-19 session penalties for over-length work will be as follows:

- For work that exceeds the specified maximum length by less than 10% the mark will be reduced by five percentage marks, but the penalised mark will not be reduced below the pass mark, assuming the work merited a Pass.
- For work that exceeds the specified maximum length by 10% or more the mark will be reduced by ten percentage marks, but the penalised mark will not be reduced below the pass mark, assuming the work merited a Pass.

2.4.4 Submission (including Turnitin)

- All coursework must be submitted both as hard copy and electronically. The only exceptions are bulky portfolios which are normally submitted as hard copy only.
- You should staple the appropriate colour-coded IoA coversheet (available in the IoA library and outside room 411a) to the front of each piece of work and submit it to the red box at the Reception Desk.
- All coursework should be uploaded to Turnitin by midnight on the day of the deadline. This will date-stamp your work. It is essential to upload all parts of your work as this is sometimes the version that will be marked. Instructions are given below.

Note: Turnitin uses the term ‘class’ for what we call a ‘module’.

The Turnitin 'Class ID' for this module is 3885605 and the 'Class Enrolment Password' is IoA1819 (N.B. the middle ‘o’ is lower case).

1. Ensure that your essay or other item of coursework has been saved as a Word doc., docx. or PDF document, and that you have the Class ID for the module (available from the front cover of the module handbook) and enrolment password (this is IoA1819 for all modules this session - note that this is capital letter I, lower case letter o, upper case A, followed by the current academic year).
2. Click on http://www.turnitinuk.com/en_gb/login
3. Click on ‘Create account’
4. Select your category as ‘Student’
5. Create an account using your UCL email address. Note that you will be asked to specify a new password for your account - do not use your UCL password or
the enrolment password, but invent one of your own (Turnitin will permanently associate this with your account, so you will not have to change it every 6 months, unlike your UCL password). In addition, you will be asked for a “Class ID” and a “Class enrolment password” (see above).

6. Once you have created an account you can just log in at http://www.turnitinuk.com/en_gb/login and enrol for your other classes without going through the new user process again. Simply click on ‘Enrol in a class’. Make sure you have all the relevant “class IDs” at hand.

7. Click on the module to which you wish to submit your work.

8. Click on the correct assignment (e.g. Essay 1).

9. Double-check that you are in the correct module and assignment and then click ‘Submit’.

10. Attach document as a “Single file upload”.

11. Enter your name (the examiner will not be able to see this).

12. Fill in the “Submission title” field with the right details: It is essential that the first word in the title is your examination candidate number (e.g. YGBR8 In what sense can culture be said to evolve?).

13. Click “Upload”. When the upload is finished, you will be able to see a text-only version of your submission.

14. Click on “Submit”.

If you have problems, please email the IoA Turnitin Advisers on ioa-turnitin@ucl.ac.uk, explaining the nature of the problem and the exact module and assignment involved.

One of the Turnitin Advisers will normally respond within 24 hours, Monday-Friday during term. Please be sure to email the Turnitin Advisers if technical problems prevent you from uploading work in time to meet a submission deadline - even if you do not obtain an immediate response from one of the Advisers they will be able to notify the relevant Module Coordinator that you had attempted to submit the work before the deadline.

2.4.5 Formatting

Essays and other assessed work must be word-processed (unless otherwise specified) and should be printed on both sides of the paper, using 1.5-line spacing. Bibliographies may be in single line spacing. Adequate margins should be left for written comments by the examiner. Students are encouraged to use diagrams and/or tables where appropriate. These should be clearly referred to at the appropriate point in the text, and if derived from another source, this must be clearly acknowledged.

3 Detailed syllabus

The following is an outline for the module as a whole, and identifies essential and supplementary readings relevant to each session. Information is provided as to where in the UCL library system individual readings are available (Institute of Archaeology library unless otherwise stated); their location and Teaching Collection (TC) number, and status (whether out on loan) can also be accessed on the eUCLId computer catalogue system.

Supplementary reading is intended as wider guidance on the topic, if you become interested in it, use it for essays or dissertations, or after you leave the Institute. You are not expected to read all of this, but personal initiative is expected to supplement the essential reading.
3.1 Session 1: Introduction: values & authenticity – impacts on theory and approaches in Asia (Tim Williams)

3.1.1 Synopsis
Throughout the module we will examine current approaches to heritage management in Asia, compare the different styles taken across the region (and the colonial, post-colonial and national factors that may have shaped these), and their place within international practise.

The first session will explore the international context and practise of heritage management. International Charters can help to define important notions of significance, embracing both the tangible and the intangible. Critical to this, and reflected in many of the more recent charters and conventions, are the processes of establishing and assessing values, and using values to shape and inform management systems and decision-making. We will explore how these international practices have led of a number of management planning models, and the roles and impacts these have had on Asian resource management.

A number of countries in the Asia region now have charters or principles to underpin approaches to conserving and managing cultural heritage resources. The integrity of heritage places and their continuing authenticity are fundamental concerns, particularly as the notion of heritage embraces traditions and everyday places.

3.1.2 Key reading: international approaches
See introductory reading in section 1.3.2.

3.1.3 Key reading: regional responses
See introductory reading in section 1.3.1.

3.1.4 Further reading

Sharma, R. S. 2009. Rethinking India's past. New Delhi: Oxford University Press. INST ARCH DBMA 100 SHA

3.2 Session 2: People centred approaches to the conservation of culture and nature (Dean Sully)

3.2.1 Synopsis

Conservation in developing countries is challenged by conflicting demands of preservation, economic development and social priorities. Managing these demands requires establishing a beneficial balance in the dynamic interactions between cultural heritage, natural environment and contemporary society. Collaboration between research, management and governance is therefore necessary if we are to reconcile the competing demands of living with heritage.

The nature of many built landscapes found throughout Asia suggests that a universal definition of authenticity is not appropriate. Since the Nara Document (see reading) international perceptions of authenticity have radically changed from the primacy of notions of material authenticity to a broader and more contextual understanding. But this still leaves issues regarding the limits of acceptable change and appropriate levels of restoration.

The Living Heritage Approach (LHA), initially associated with heritage sites in Asia, is a people-centred, community-based, bottom-up, interactive approach to heritage management. This places the living dimension of heritage at the heart of decision-making through linked concept of diversity, continuity and connection that strengthen peoples’ their ability to participate meaningfully in the process of making conservation and management decisions for their heritage. The LHA developed by ICCROM from 2003-2010, provides the foundation for the new UNESCO conservation paradigm: the People-Centred Approach. PCA places concern for links between nature-culture-people and their relevance to the lives of contemporary communities at the core of conservation decision-making. This is part of a broader shift from the care of heritage for its own sake, to the pursuit of well-being of people and the environment.

3.2.2 Key reading

3.2.3 Further reading

3.3 Session 3: Fieldtrip to the British Museum South Asia and China galleries

Visit to the Islamic and Asian galleries at the British Museum.

The aim of the visit is to explore approaches to presenting Asian heritage to international audiences, and the challenges that presents.

Meet: in the foyer IoA at 11.05am. You will be free to return to the Institute by 1.00pm.

3.4 Session 4: a. Managing historic cities in Asia (Tim Williams); b. Managing historic villages and towns in China (Liu Jia)

3.4.1 Managing historic cities in Asia: Synopsis

Much of the current debate on how we should preserve our cultural heritage revolves around urban sites - historic monuments in urban settings, historic districts, or complete historic towns. The growing complexity of urban heritage conservation makes reaching a consensus on how to manage urban heritage difficult. Additionally, the sharp increase in the world’s population now living in urban areas, combined with a lack of policies to facilitate a sustainable use of heritage assets means the pressure on historic sites is set to rise.

The steady erosion of what many commentators have regarded as the quintessential 'Asian' qualities of cities, particularly in terms of their built form, under the impact of current processes of rapid economic and cultural globalization, is a major concern. How can heritage management be integrated with the economic, social, and cultural life of a place? Unless new and innovative ways of managing these sites can be agreed on, there is a real danger that historic cities as we know them today will not survive the first decades of the 21st century.

This session examines the way in which the classical approach has been challenged by the evolution of the conceptual and operational context of historic urban landscapes - with associated debates and decisions - to inform the development of local urban conservation policies and practices.
Case studies will include Hội An, Vietnam; Bhaktapur, Nepal; & Malacca, Malaysia. These towns present varied and complex challenges, from a high level of international agency intervention (Hội An), strong local government action (Bhaktapur), and differing approaches to historic building and archaeological site management (Malacca).

3.4.2 Key reading

### 3.4.3 Further reading

Williams, T. 2014. *Archaeology: Reading the City through Time*, in Bandarin, F. & van Oers, R. (eds.) *Reconnecting the City: The Historic Urban Landscape Approach*

3.4.4 Managing historic villages and towns in China: Synopsis

China has more than 2.7 million ‘villages’ (the smallest administrative unit, which has no strict definition in terms of size or population). Of these, thousands have significant historic elements, and strategies to preserve and pass these on to future generations, while dealing with the pressures of modern urban living, are necessarily complex. Since late 1990s, the Chinese Government and heritage authorities have modified their cultural heritage management strategies, moving away from simple preservation or economically driven approaches, to sustainable use and multi-value-based management. These trends suggest that the Chinese authorities are endeavouring to implement international heritage management and conservation practices, to ensure the sustainable use of these national resources. However, approaches to village management have raised a number of controversial issues in the recent 15 years, including authenticity and integrity debates, excessive tourism development, community conflicts and the loss of intangible heritage.

3.4.5 Key reading

3.5 Session 5: Film night: The Silk Road of Pop (Film and discussion)

3.5.1 Synopsis

This film session aims to encourage students to understand sense of place, sense of individual identity, and the relation between place and people, in a globalised context.

One of the very few documentaries to come out of Xinjiang, *The Silk Road of Pop* captures the challenges of a minority group in China and the explosive music scene which results. It tells the story of Ay, a young music fan. Apprehensive about her own life choices as a young Uyghur woman in China, and curious about the outside world, she turns to music for answers and is drawn to musicians who mirror her struggles in their songs. The film follows the trails left by Ay’s interest in music, documenting her influences and portraying her musical idols. A breathtaking journey unfolds, leading to traditional musicians uncovering the age-old roots of the Uyghur music culture in Kashgar, metal bands combining local folk music & Western hard rock in their wild performances, and hip-hop crews honing their skills in the smoky basements of communist block towers.

The film lasts c. 1 hour, and will be followed by a discussion of the issues it raises. Popcorn is provided!

3.5.2 Further reading

3.6 Session 6: Top-down vs Bottom-up: Archaeological Heritage Management in China (Rui Pang)

3.6.1 Synopsis

A major challenge is that embedded in international practice are assumptions of the primacy of community-sponsored action and democratic models for civil action in heritage decision-making, all based on Western-derived ideals. Do these work in diverse Asian contexts, with differing and complex social practices and norms? This section explores the approach to regulatory management and decision-making for heritage in the planning/development process. How have these developed and to what extent do they reflect top-down or bottom-up processes?

The session will explore the development of heritage legislation, including a brief history of the development of Chinese archaeology and cultural Heritage Management; Legislation and guidance regarding archaeology and heritage management; Current management systems (top-down mechanism, and the role of Cultural Heritage bureau, archaeological institutions and universities); Current challenges and conflicts (research vs rescue, development vs preservation); and future strategies.

3.7 Session 7: Sustainable tourism – potential and problems (Hyung Yu Park)

3.7.1 Synopsis

The Asian region has an enormous diversity of living cultures and heritage sites, which has a major appeal to tourists. This offers considerable potential for developing economies and local communities. However, tourism is recognised as an agent of social and cultural change, especially for indigenous communities. In many areas tourism has grown so rapidly that issues associated with the incorporation of cultural and heritage experiences into tourist itineraries have not been adequately addressed. Issues such as authenticity verses commodification, the devaluing of cultures, the detrimental impacts on local communities, and potentially damaging impact on fragile heritage resources all need to be debated.

This session will reflect on some of these issues, and explore how communities have faced and overcome these challenges. Can society as a whole can strike a balance between the need for economic development and conservation of historic sites? Models and case studies will be discussed to illustrate the issues, and to evaluate management tools.

Thorsten, M. 2005. Silk Road nostalgia and imagined global community, *Comparative American Studies* **3(3)**: 301-317

3.8 Session 8: Managing Cultural Routes: the Silk Roads in Asia (Tim Williams & Shaohan Wang)

3.8.1 Synopsis

Representivity on the World Heritage list has become a major issue. In 1996, the World Heritage Committee launched the *Global Strategy for a Representative, Balanced and Credible World Heritage List*: the aim was to ensure that the List reflects the world's cultural and natural diversity of outstanding universal value. One approach to addressing unrepresented regions was to develop large-scale serial nomination projects, introducing the concepts of cultural routes and cultural landscapes. These have become a major initiative within the Asian region.

The largest project to date has been the Silk Roads across Asia to the Mediterranean. This session will explore the role of thematic studies, the development of the nomination strategy, and approaches to working on trans-boundary and serial nominations (which require very different strategies to sites within a single State Party boundary). It will also explore the effectiveness of this as a management,
tourism and interpretation strategy, and examine the potential of different international cultural management concepts - especially cultural landscapes, cultural routes, vales-based management, living heritage and sustainable tourism – to sustain and articulate these values.

3.9 Session 9: Archaeological heritage management in Central Asia (Gai Jorayev)

3.9.1 Synopsis

This lecture will look at the heritage management structures of the five Central Asian countries (Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan) and highlight the differences and similarities in their approaches to researching, preserving and promoting their heritage. These five countries were part of former USSR until 1991 and they inherited similar approaches to preservation and research of archaeological heritage. The talk will highlight the changes since the countries became independent and the use of heritage in creating nation-building ideologies of the newly independent states.

It will also discuss current international collaboration efforts of these countries, through work on the Silk Roads World Heritage nomination.

3.9.2 Key reading

3.10 Session 10: Maritime heritage in Asia (Tim Williams, Zhiming Chen & Zhehao Zhao)

3.10.1 Synopsis

The huge coastline, and complex maritime heritage and traditions of the Asian region, provide enormous challenges and opportunities. The maritime Silk Routes, for example, were crucial to the development of South and South-east Asia and maritime exploitation was a major factor in the development East Asia.

A rich area for research, maritime heritage is increasingly under threat from climate change (especially sea level change and episodes of extreme weather), and continued development (especially the continued use of ports). How should we approach the management of this resource in Asia? What is the balance between documentation and conservation, especially when the latter can be very expensive? How can it be integrated with other concerns, such as environmental protection and sustainable development?
This session explores some of the opportunities - including coastal towns and harbours, wrecks, material culture, and intangible traditions – and the complexities of interpreting and presenting this material. It will explore the complexity of managing coastal and marine heritage, including the constant battle between maritime archaeologists and commercial salvage operators. In Southeast Asia archaeological information is being lost on a massive scale through looting and salvage operations. Is co-operation between the two groups essential to prevent more irreparable damage? Or can regional governments take a lead role in preventing destruction?

### 3.11 Session 11: Post-colonial heritage and nationalism: ASI and archaeological heritage management in India (Robert Harding)

#### 3.11.1 Synopsis

The lecture will look at Alexander Cunningham and the founding of the Archaeological Survey of India. It will focus on the 19th century as a time of discovery rather than management, with examples of large-scale destruction of major sites. It will then look at the move to conservation by Viceroy Curzon and his ASI Director-General John Marshall. It will show the context of Indian developments within British debates and the question of imperial responsibilities. Finally, it will discuss the twentieth century - archaeology and nationalism; the significance of World Heritage listing; the role of the ASI as a major landowner; and the significance of local engagement.

#### 3.11.2 Key reading

Curzon, Indian Archaeology (1899-1905), available in the British Library.

3.11.3 Useful Websites
The ASI: http://asi.nic.in/ and a pdf of its Draft National Policy is available from: http://asi.nic.in/national_consrv_policy.asp

INTACH: http://www.intach.org/

Young INTACH: http://www.youngintach.org/

The Mehrauli Zone as an example of INTACH's approach to heritage is at: http://architexturez.net/doc/az-cf-21192

3.12 Session 12 Poster presentation and reception (5.00-8.00pm) Room 609
Informal presentation of student posters to an invited audience.

For details: see Assignment One (section 2.4.1).

4 Additional information & resources

4.1 Libraries
In addition to the Library of the Institute of Archaeology, other libraries within UCL with holdings of particular relevance to this module are the Anthropology and Bartlett libraries. In addition, The British Library, located nearby at St Pancras, has extensive collections. To apply for a readers’ ticket see http://www.bl.uk/help/how-to-get-a-reader-pass

Please note that the bibliographies have been heavily weighted towards English language texts. Additional readings can be recommended for those students interested in pursuing the foreign language literature on the subject.

4.2 Information for intercollegiate and interdepartmental students
Students enrolled in Departments outside the Institute should obtain the Institute’s coursework guidelines from Judy Medrington (email j.medrington@ucl.ac.uk), which will also be available on the IoA website.
4.3 Health and Safety

The Institute has a Health and Safety policy and code of practice which provides guidance on laboratory work, etc. This is revised annually and the new edition will be issued in due course. All work undertaken in the Institute is governed by these guidelines and students have a duty to be aware of them and to adhere to them at all times. This is particularly important in the context of the laboratory/field/placement work which will be undertaken as part of your degree.
APPENDIX A: POLICIES AND PROCEDURES 2018-19 (PLEASE READ CAREFULLY)

This appendix provides a short précis of policies and procedures relating to modules. It is not a substitute for the full documentation, with which all students should become familiar. For full information on Institute policies and procedures, see the IoA Student Administration section of Moodle: https://moodle.ucl.ac.uk/module/view.php?id=40867

For UCL policies and procedures, see the Academic Regulations and the UCL Academic Manual: http://www.ucl.ac.uk/srs/academic-manual/overview

GENERAL MATTERS

ATTENDANCE: A minimum attendance of 70% is required. A register will be taken at each class. If you are unable to attend a class, please notify the lecturer by email.

DYSLEXIA: If you have dyslexia or any other disability, please discuss with your lecturers whether there is any way in which they can help you. Students with dyslexia should indicate it on each coursework cover sheet.

COURSEWORK

General policies and procedures concerning modules and coursework, including submission procedures, assessment criteria, and general resources, are available on the IoA Student Administration section of Moodle: https://moodle.ucl.ac.uk/module/view.php?id=40867

It is essential that you read and comply with these. Note that some of the policies and procedures will be different depending on your status (e.g. undergraduate, postgraduate taught, affiliate, graduate diploma, intercollegiate, interdepartmental). If in doubt, please consult your module co-ordinator.

LATE SUBMISSION: Late submission will be penalized in accordance with current UCL regulations, unless formal permission for late submission has been granted.

The UCL penalties are as follows:

- The marks for coursework received up to two working days after the published date and time will incur a 10 percentage point deduction in marks (but no lower than the pass mark).
- The marks for coursework received more than two working days and up to five working days after the published date and time will receive no more than the pass mark (40% for UG modules, 50% for PGT modules).
- Work submitted more than five working days after the published date and time, but before the second week of the third term will receive a mark of zero but will be considered complete.

GRANTING OF EXTENSIONS: Please note that there are strict UCL-wide regulations with regard to the granting of extensions for coursework. You are reminded that Module Coordinators are not permitted to grant extensions. All requests for extensions must be submitted on the appropriate UCL form, together with supporting documentation, via Judy Medrington’s office, and will then be referred on for consideration. Please be aware that the grounds that are acceptable
are limited. Those with long-term difficulties should contact UCL Student Disability Services to make special arrangements. Please see the IoA Student Administration section of Moodle for further information. Additional information is given here http://www.ucl.ac.uk/srs/academic-manual/c4/extenuating-circumstances/

RETURN OF COURSEWORK AND RESUBMISSION: You should receive your marked coursework within one month of the submission deadline. If you do not receive your work within this period, or a written explanation, notify the Academic Administrator. When your marked essay is returned to you, return it to the Module Co-ordinator within two weeks. You must retain a copy of all coursework submitted.

CITING OF SOURCES and AVOIDING PLAGIARISM: Coursework must be expressed in your own words, citing the exact source (author, date and page number; website address if applicable) of any ideas, information, diagrams, etc., that are taken from the work of others. This applies to all media (books, articles, websites, images, figures, etc.). Any direct quotations from the work of others must be indicated as such by being placed between quotation marks. Plagiarism is a very serious irregularity, which can carry heavy penalties. It is your responsibility to abide by requirements for presentation, referencing and avoidance of plagiarism. Make sure you understand definitions of plagiarism and the procedures and penalties as detailed in UCL regulations: http://www.ucl.ac.uk/current-students/guidelines/plagiarism

MOODLE

Please ensure you are signed up to the module on Moodle. For help with Moodle, please contact Charlotte Frearson (c.frearson@ucl.ac.uk).
