

“This is an excellent plan for an MBA program in the field of infrastructure. It meets an important, and I believe, largely unmet need for learning about, and preparing for leadership in organizations that are absolutely vital to social progress. Throughout history, the success of large-scale, transformative infrastructure development has depended as much upon management capability as technical know-how.”

Professor Will Goetzmann,  
Beinecke, Professor of Finance and Management  
Studies at the Yale School of Management

# Major Infrastructure Delivery MBA

THE BARTLETT  
SCHOOL OF SUSTAINABLE  
CONSTRUCTION

The Major Infrastructure Delivery MBA is a brand-new and one-of-a-kind programme designed specifically for senior professionals in the infrastructure industry in which leadership is essential to navigate several aspects of project delivery.

By addressing infrastructure case studies and using the latest academic thinking, the programme equips students with innovative management and leadership practices to successfully deliver major infrastructure projects.

### Key Information

Entry requirements: A UK Bachelor's degree awarded with at least a lower Second-Class Honours, or an overseas qualification of an equivalent standard. Candidates with at least 5 years of relevant professional experience (middle management level) in the management of projects.

English language requirement: Level 2

Course duration: 2 years (part-time)

Cost: £41,500

### Course Highlights

Designed in response to the need of management capabilities in major infrastructure projects.

Develop an advanced understanding of the key managerial components of major infrastructure organisations, and the strategic importance of infrastructure in the next decades across the world.

Learn about the impact of innovative management and leadership practices and design strategies to deal with the poor performance of complex organisations that deliver major infrastructure projects.

Develop the intellectual skills required for interpreting and reacting to changes at different levels of those political projects, navigating the myriad of stakeholders and contractual relationships.

Expand network with like-minded professionals in the industry through industry and alumni events.

### Why an MBA in Major Infrastructure Delivery?

Through the combination of theoretical insights and practical applications, this MBA provides experienced project managers with the necessary training to assume increasingly higher management positions in organisations delivering major infrastructure projects. Additionally, the programme supports your network building by organizing events aimed at industry and alumni in which students will have the opportunity to meet like-minded professionals in the field.

Graduates are expected to work in many related areas across several infrastructure sectors: government agencies sponsoring major infrastructure projects, public and private sector infrastructure client organisations, management consultancies, engineering consultancies, contractors, and enterprises with significant portfolios of major infrastructure projects. Ultimately, we expect graduates from this MBA programme to become the world's most distinguished leaders in the infrastructure sector.

### About The Bartlett School of Sustainable Construction

The Bartlett School of Sustainable Construction is a world-class centre of learning and research in the economics and management of projects, in construction and beyond for over 40 years.

Located within The Bartlett at UCL, one of the oldest but most progressive faculties of its kind and the UK's largest multidisciplinary faculty of the built environment, it draws students and academics from across the world. The Bartlett was ranked the top institution in the UK for Architecture / Built Environment Subjects in the QS World University Rankings 2022.

### Where will you study?

Learning and assessment throughout the course will take place via digital learning platforms. Our MBA students are required to be in London for in-person modules in five periods of nine days over the two years. Each period of nine days will happen from Saturday morning to the end of Sunday of the subsequent week.

Your degree will be taught in brand new state-of-the-art bespoke facilities at UCL East, on the Queen Elizabeth Olympic Park in east London. UCL East builds on UCL's progressive history, positive impact and disruptive spirit – bringing together UCL academics, students, local communities and industry to solve the biggest challenges affecting people's lives and the planet.
