London, WC1H 0NN

Beijing's transition of urban development in the context of the Jing-Jin-Ji (Beijing-Tianjin-Hebei) region

China Planning Research Group Event

Speaker: Mr. Xiaodong Shi

*Deputy Chief Planner, Beijing Municipal Institute of City Planning and Design
Deputy Director, Beijing Key Laboratory of Spatial Planning for Capital Region*

Globalization and urbanization has spawned collaboration and competition between large Chinese cities and metropolitan areas. The Jing-Jin-Ji (Beijing-Tianjin-Hebei) region is the biggest urbanised region in Northern China has emerged in order to integrate Beijing, Tianjin, and all the cities in Hebei along the coast of the Bohai Sea thereby to foster economic development. As the capital of China, Beijing is governed as a municipality under direct administration of the central government and plays a significant role in China's national development and governance systems. This seminar will focus on how Beijing's strategic position and urban planning approach need to be reconsidered from the perspective of this mega-city region. The aim is to propose new governance objectives and countermeasures in order to tackle problems such as "mega-city disease".
