

PLACEMENT FINAL PRESENTATION

DANISH DESIGN CENTRE // IIPP

A Launching Missions Playbook.

Rodrigo Echeopar - Nicko Laport - Eugenie Cartron

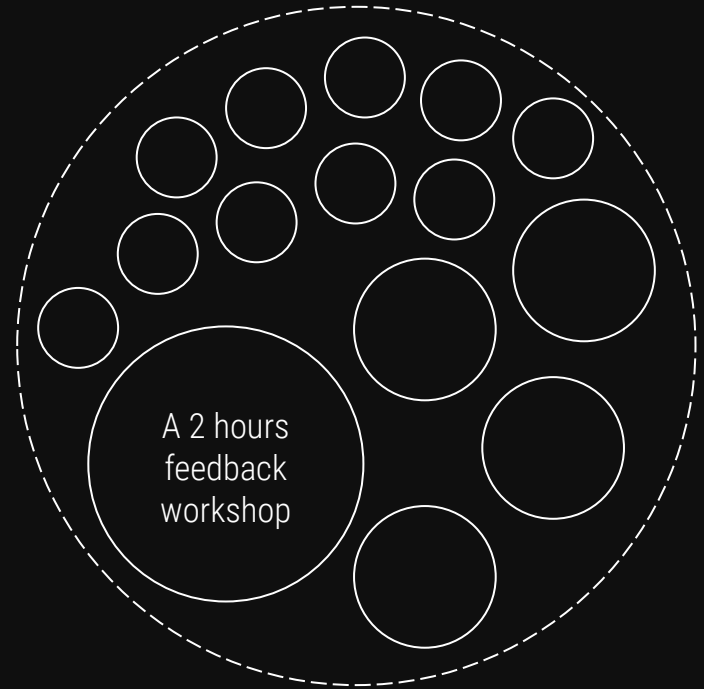

CONTEXT

UNDERSTANDING DANISH MISSIONS

For 7 weeks, we took on the challenge of understanding not only the Danish Design Centre, but also the broader Danish mission context.

20 + individual and group
discussions within the DDC

3 interviews with
Danish mission
academics

**“THEORIES SEEM TO HAVE THE
LIFESPAN OF A SNOWBALL”**

- DDC interview (M8*)

OUR PROPOSAL

A MISSION LAUNCH PLAYBOOK

Objectives

BUILDING
TRANSITION
FROM THEORY
TO PRACTICE

STARTING A

OUR PREMISE

**THE POWER OF MISSIONS COMES FROM
THE COLLECTIVE, FROM THE ECOSYSTEM**

MISSION LAUNCH INGREDIENTS

Shaping a mission-oriented ecosystem requires new types of organisations to establish different forms of relationships to achieve a democratic common goal.

- 1 Direction
- 2 Relationships
- 3 Roles and Capacities

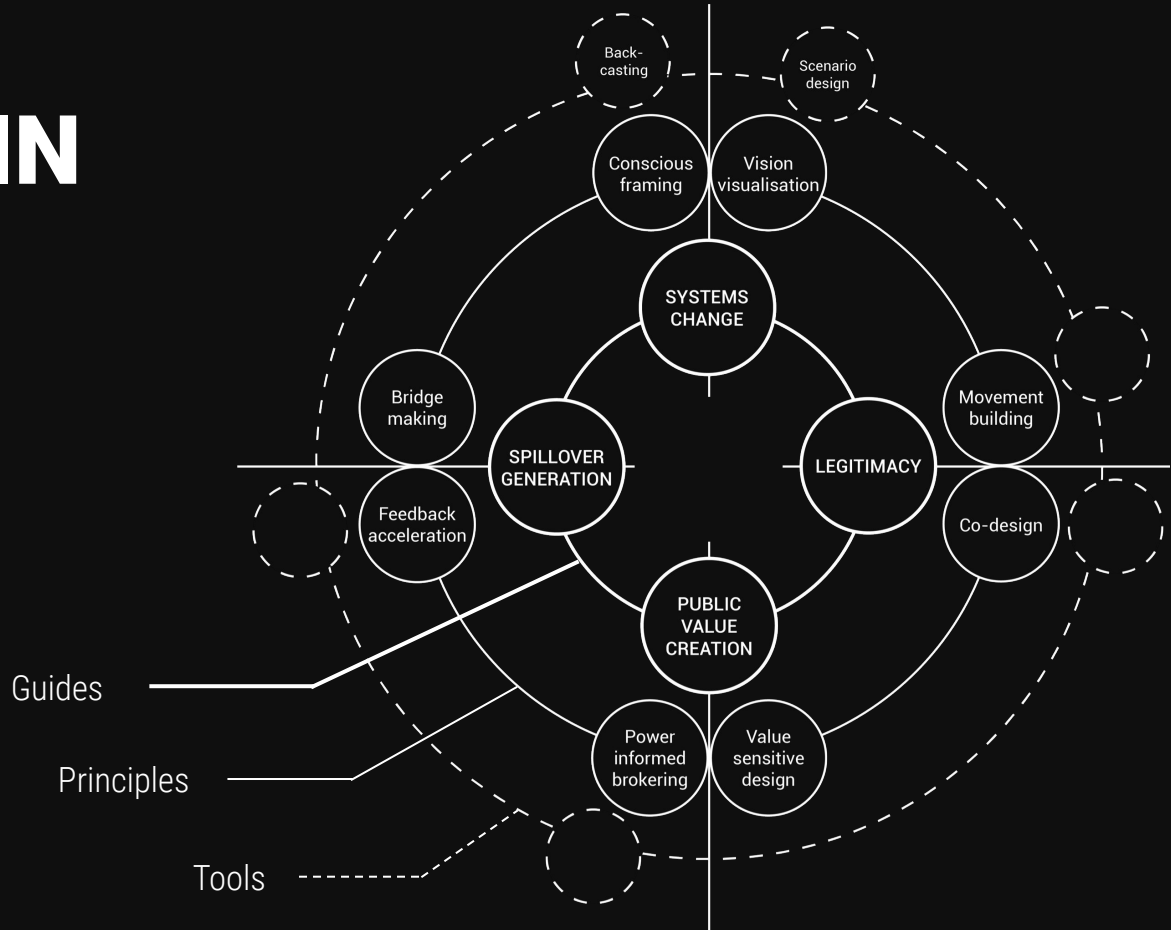

1

DESIGNING DIRECTION INTO A MISSION

How to know where to aim and how to stay on course?

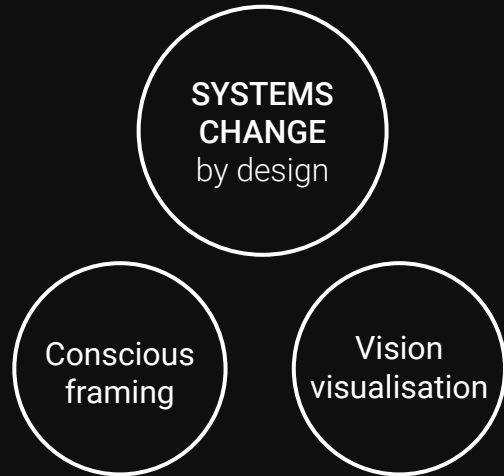

DIRECTION IN PRACTICE

Launching a mission implies to embed a sense of direction in what is to be a collective endeavour. We propose 4 direction guides associated with principles for action. The framework will be completed with a tool landscape.

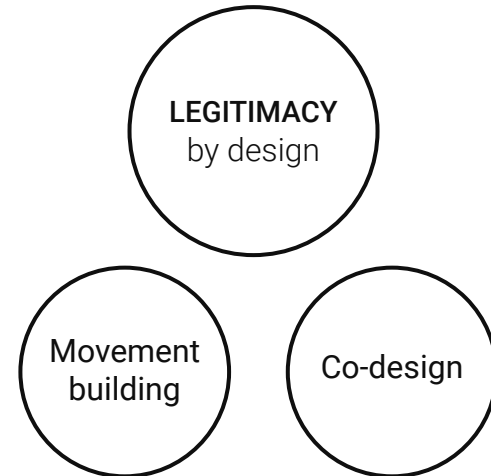

WHAT IS A DESIRABLE DIRECTION?

A direction is a collective vision which requires to develop a sense of agency over future systems.

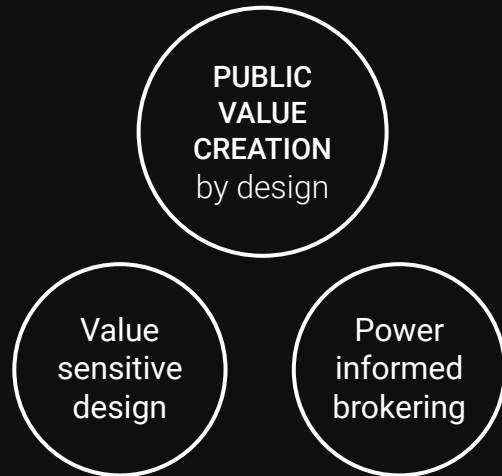

WHERE DOES DIRECTION COME FROM?

A mission's direction is indissociable from collective ownership. It is a real democracy challenge.

HOW TO CREATE IMPACT WITH A DIRECTION?

In a mission oriented towards impact, public value becomes the compass, but it ought to be conceived in a pluralistic manner.

HOW TO DIFFUSE DIRECTION ACROSS SOCIETY'S LAYERS?

Direction permeates all layers of the system through spillovers. They are favoured by a high density of connection between actors.

2

DESIGNING THE RELATIONSHIPS

What type of relationships are required for a mission-oriented ecosystem?

Perhaps the most basic characteristic of the innovation system approach is that it is **interactionist** - Bengt-Åke Lundvall

MISSION-ORIENTED RELATIONSHIPS

Using the **mission direction as a compass** we must explore relationships that promote system change, spillovers and learning processes.

	Market-Driven	Mission-Oriented
<i>Companies</i>	Competition	Communities of practice ^[1] , Joint prototyping, Carrying knowledge and producing new knowledge ^[2]
<i>Government</i>	Regulation, investment, procurement ^[3]	Transforming relationships and the environment ^[3] , State-guided coordination ^[4]
<i>Citizens</i>	Consumption	Discovering value together ^[5] , Exploring systemic production/consumption change

CAN DESIGN HELP BUILD NEW RELATIONSHIPS?

Mission-oriented relationships challenge hegemonic market-driven frameworks and institutions. Strategic design and design thinking are useful to explore, implement and learn from new types of relationships.

1

Compass: The Mission's Direction

The direction is the connecting point for different stakeholders and experimenting relationships.

2

Actors: Ecosystem organisations

Diverse stakeholders, including government agencies, private companies and citizen organisations should explore new roles, ways of interacting and advancing the mission.

3

Tools: Design

Design thinking and strategic design promotes the "parallel creation of a thing and its way of working"^[1]. It is a tool that challenges 'business as usual' and allows exploring new relationships.

[1] Lewis et. al., 2020

3

ROLES AND CAPACITIES

- 1 Alignment and relationships.
- 2 Roles: a cross-sector perspective.
- 3 Capacities.

ALIGNMENT AND RELATIONSHIPS

Participating in missions requires a massive effort from the organizations involved to solve complex problems.

What kind of organizations are needed to participate in a mission-oriented ecosystem?

This new set requires an understanding of organizations as playing intersectoral roles in a bigger coordination.

ROLES: A CROSS-SECTOR PERSPECTIVE

Considerations

- Initial and non exhaustive approach.
- Roles are fluid.
- Interchangeable roles between members of the ecosystem.
- How this typology dialogues with others.

ROLES: A CROSS-SECTOR PERSPECTIVE

This new set of relationships between actors in a mission-oriented innovation ecosystem implies a new articulation that reconfigures the (now) blurry line between the private and the public.

They are members of a more extensive set of interactions that require a more flexible exchange not only inside but also between them (Teal perspective).

Aligners

Evangelist^[1]. **Directors**^[2]. **Catalyzers**^[3].

This role is the one that starts things and show the northern light to other roles, with a sense of purpose.

Connectors

Cross-polinizator^[4]. **Honest Broker**^[5].

Convener^[6]. This role fosters spaces of discussion, agreement, and experience sharing, not only physical, but also strategical (facilitation). Key role regarding building legitimacy.

Implementers

Developers^[7]. **Set Designers**^[8]. **Makers**^[9].

Competencies, tools, knowledge, and perspectives are essential to work in complex missions.

CAPACITIES

This new comprehension of roles to fulfil the demands of new relationships and the ability to be aligned in a societal purpose requires a set of capacities.

Capacity of setting directions^[1]

The capability of gathering actors around a societal purpose and guiding a co-built perspective of shared value^[2]. The capability of generating strategy^[3] considering the context in which a member of the mission-oriented ecosystem performs this role.

Capacity of building environments of co-design, co-creation and co-implementation

The capability of developing horizontal interaction : Building a teal mission-oriented ecosystem^[4]. The capability of managing cultural, organisational and group diversity^[5].

Capacity to deploy and develop tools, knowledge and competencies inside the mission-oriented ecosystem.

The capability of agility and resilience^[6]. The capability of coordinating and share Intra and inter organisation learning^[7].

NEXT STEPS

DEVELOPING THE WIREFRAME FURTHER

1

Our written submissions

Three deep dives into each of the three ingredients of launching missions.

2

The playbook

Developing further a contribution for stakeholders to start joining the movement.

THANK YOU FOR WELCOMING US!

APPENDIX - Interview log

Meeting code	Type of interview	Internal or external	Type of interviewee
M1	Individual	Internal	DDC Senior
M2	Individual	External	Academic
M3	Individual	External	Academic
M4	Individual	External	Danish Ecosystem
M5	Individual	Internal	DDC Direction
M6	Individual	Internal	DDC Missions
M7	Individual	Internal	Private Sector

Meeting code	Type of interview	Internal or external	Type of interviewee
M8	Individual	Internal	DDC Direction
G1	Group	Internal	DDC Missions
G2	Group	External	Consultants
G3	Group	Internal	Missions Workshop
G4	Group	Internal	DDC Interim Presentation
G5	Group	External	Private Sector
