

## We Are Here to Help You Connect with UCL Engineering Students

The below events are run for UCL Engineering and STEM students from Undergraduate to Postgraduate level. We bring in a wide variety of employers to represent the breadth of sectors which students from these disciplines may go on to work in. These events are to provide students with an overview of careers options, including current trends and recruitment practices.

- Events are virtual & free for employers
- Some events may be more targeted to specific Departments, but all Engineering students may attend
- The usual number of employers in each event is 3
- Events take the format of a Panel Discussion with an experienced Careers Consultant, followed by a Q&A with the Audience

### 1. UCL Engineering: Insight into Internships

**Monday 05 October 2020, 13:00 - 14:00**

The event aims to inform students about the value of internships in careers decision-making and securing a graduate role. You will get the chance to talk about your internship opportunities, deadlines, recruitment processes and give tips on how to apply and succeed.

### 3. UCL Engineering: Careers in Data Science & Machine Learning

**Monday 12 October 2020, 13:00 - 14:00**

The event aims to showcase current advancements and trends of the Data Science Industry and the variety of roles within it. The focus will be on Machine Learning applications and panellists will get to talk about their career path and work experience in Data Science, as well as available internship and graduate opportunities within their organisation.

### 5. UCL Engineering: Careers in Chemical & Biochemical Engineering

**Tuesday 20 October 2020, 13:00 - 14:00**

This event aims to offer Engineering students with industry and career insights into Chemical & Biochemical Engineering. Panellists will get to talk about industry trends, their career path and work experience in (bio)chemical engineering, offer tips for applying students and highlight internship and graduate opportunities within their organisation.

### 7. UCL STEM: Careers in Finance & Technology

**Tuesday 27 October 2020, 13:00 - 14:00**

The event aims to showcase a variety of Financial Technology roles, career paths and trends within this emerging employment sector. Panellists will get to talk about their career path and work experience with FinTech, offer tips for applying students and highlight internship and graduate opportunities within their organisation.

### 9. UCL STEM: Diversity & Inclusion in the Workplace (Women in STEM, BAME, LGBTQ+, Disabilities)

**Wednesday 04 November 2020, 13:00 - 14:00**

The event aims to showcase different employers' approach on diversity and inclusion in the workplace. You will get to talk about your personal experience, as well as the benefits and challenges that come with a highly diverse workforce, your organisation's attraction and recruitment methods, and the ways you encourage inclusiveness and equity.

### 2. UCL Engineering: Insight into Graduate Applications

**Wednesday 07 October 2020, 13:00 - 14:00**

The event aims to prepare students for joining the workforce after graduation. You will get the chance to talk about your graduate opportunities, application deadlines and recruitment processes, as well as offer resilience tips for applying students and advise on how to apply and succeed.

### 4. UCL Engineering: Careers in Civil, Environmental & Geomatic Engineering

**Wednesday 14 October 2020, 13:00 - 14:00**

The event aims to showcase the variety of roles, career paths and opportunities within the fields of Civil, Environmental & Geomatic Engineering. Panellists will get the chance to talk about their work experience in the field, offer tips for applying students and highlight internship and graduate opportunities within their organisation.

### 6. UCL Engineering: Careers in Security & Crime Science

**Wednesday 21 October 2020, 13:00 - 14:00**

This event aims to offer Engineering students with industry and career insights into the Security and Crime Science sectors. Panellists will get the chance to talk about their career path and experience working in Security & Crime Science related fields, offer tips for applying students and highlight internship and graduate opportunities within their organisation.

### 8. UCL STEM: Careers in Research Science

**Thursday 29 October 2020, 13:00 - 14:00**

The event aims to showcase the variety of career pathways and options available to STEM graduates that want to follow a career in Research. You will get to talk about your career path and personal experience with Research, as well as offer insights and tips for applying students.
