

Queen Square Centre for Neuromuscular Diseases

The mission of the **Centre for Neuromuscular Diseases** is to deliver the **highest quality** patient care and outcomes through **cohesive multidisciplinary** team working and co-ordination of all aspects of medical care including **cardiac, respiratory** and **gastrointestinal management**.

What else do we do?

- Translate research findings into clinical trials and new treatments for NHS patients with neuromuscular diseases
- Act as a national and international centre of excellence for clinical/research training and education in neuromuscular diseases

Outpatient Clinics

Patients per year
 5000

Specialist clinics
 30

Annual turnover 2014-2105
£10.9 million

Amount of grant income our research programmes has attracted
£20 million

Publications

Cochrane systematic reviews published **120**
Peer reviewed publications per year **>250**

Education

We are committed to clinical and research training and education. Our courses and degrees include:

Non-clinical and clinical PhD's
 37

Yearly translational research conference, **yearly** clinical neuromuscular update course, **yearly** MSc in neuromuscular disorders

Specialist clinics

- Complex general peripheral nerve clinics
- Complex general neuromuscular clinics
- Myotonic dystrophy
- Neuromuscular transition/young adult
- Inherited neuropathies
- Inflammatory neuropathies
- Inflammatory myopathies
- Inclusion body myositis
- Spinobulbar muscular atrophy
- Channelopathies
- Mitochondrial disease
- McArdle disease and related disorders
- Nurse led clinics, Physiotherapist led clinics
- Motor neuron disease
- Myasthenia gravis

Our Partners

1. University College London Hospitals
2. Great Ormond Street Hospital for Children
3. National Institute for Health Research
4. Newcastle University
5. University College London

Who we are

A team of more than 50 staff including:

1. NHS Clinical teams
2. Nationally Commissioned NHS teams
3. Active neuromuscular clinical trials unit
4. Administrative and secretarial teams
5. NHS Neuromuscular Complex Care Centre team
6. Clinical and academic research staff
7. Cochrane Neuromuscular disease Group

MDT Care

1. Therapists
2. Clinical Nurse Specialists
3. Psychologist
4. Administrators
5. Clinical Fellows
6. Neuromuscular Consultants
7. Cardiology Consultants
8. Respiratory Consultants
9. Gastroenterology Consultants
10. Anaesthetic Consultants

Clinical trials unit

The number of clinical trials our state of the art facilities have enabled

75

All figures and values are calculated for the year 2014-2015
