

Aetiological Investigations for Hearing Loss in children

10th-11th October 2022

This course will be delivered on Zoom.

Aetiological Investigation of the babies identified through the Newborn Hearing Screening Program and diagnosed to have a hearing loss (from mild to profound), also covering investigation of older children, unilateral and progressive hearing loss & Auditory Neuropathy Spectrum Disorder.

This will be a virtual course, but it will give delegates a good opportunity to interact with leaders in the field of aetiological investigations for hearing loss in children and running established services and also network with colleagues new to the field.

Course Directors:

Dr Shankar Rangan

Consultant Audiovestibular Physician (Paediatrics), Wirral University Teaching Hospitals NHS Trust, Merseyside

Dr Adrian Dighe

Consultant Community Paediatrician

Topics covered:

- Investigation of permanent childhood hearing impairment (from mild to profound)
- Roles of CMV, Imaging, Ophthalmology, Cardiology, Vestibular Assessment and Genetics of hearing loss
- Investigation of unilateral and progressive hearing loss
- Auditory Neuropathy Spectrum Disorder

Who should attend?

Any professional providing an Aetiological Investigation service for children with permanent hearing loss.

Why should you attend?

By attending the course, the delegates will be able to gain knowledge about arranging for appropriate investigations to find the aetiology of hearing loss in children.

FEES:

Early Bird £130 (book before 31/07/2022)

Standard £160 (book after 31/07/2022)
