When the voice starts I feel vibrations.
I can see the hands/lips of the voice but they are unclear.
When the voice starts, an image of the voice appears in my mind.
When I have voices I can taste a strange taste.
When I have voices I smell a strange smell.
I see things that other people do not see when the voice is not there.
Voice does not make any sound that I can hear.
Voice makes **sounds** which I can hear.
Voice is silent.
