

Axonometric 3.51

Extruding a set of steps from a plan

This is a plan and elevation of a set of steps linking two floors. The arrow indicates the direction in which you would ascend.

1. Project lines 5 and 11 upward on the vertical wall. Transfer Heights of floor level 2 and 1 onto the vertical plane and draw both platforms.

2. Project lines 5, 6, 7, 8, 9, 10 onto the vertical plane and draw the steps from grid references in your elevation.
