

References for burials listed in the Early Anglo-Saxon Census of southern Britain

This listing gives the starting source for data entry into the Sites, Individuals and Objects tables. It has proved difficult to re-assemble all the various sources in the interim since data collection ceased in 2007, but those given here lead on to the more in-depth material that was consulted. Certain sites have had full publication since 2007, but the original data entry from unpublished notes has been retained here.

Where no page numbers are given, the information has been collated from various sections of the text. Not all reports are available publicly and others are grey literature reports from excavations, a copy of which may be lodged within the County Historic Environment Record (HER) or published with the Archaeology Data Service:

<http://archaeologydataservice.ac.uk/archives/view/greylit>

HER listings can be accessed via Heritage Gateway:

<http://heritagegateway.org.uk/gateway/default.aspx>

Or via county HERs on application. Where SMR is noted this is an earlier version of HER.

Many antiquarian volumes have now been digitised and are available to view via Internet Archive:
