

**University College London  
Department of Economics**

**Economics of Financial Markets (ECON0001)**

**2020-21**

**Thursday 9:00 – 11:00**

**Ji Hee Yoon (week 1-5)**

*E-mail:* [jihee.yoon@ucl.ac.uk](mailto:jihee.yoon@ucl.ac.uk)

*Office:* Room 110, Drayton House, 30 Gordon Street

*Office hours:* Thursday 10:30 – 11:30 or by appointment

**Giovanni Cespa (week 6-10)**

*E-mail:* [giovanni.cespa.1@city.ac.uk](mailto:giovanni.cespa.1@city.ac.uk)

*Office:* TBA

*Office hours:* Thursday 11:00-12:00.

**Course objectives**

The aim of the course is to provide students with a thorough understanding of core concepts and methods of financial economics. In particular, the course will cover important topics such as the role of markets and institutions as providers of liquidity, the reasons for asset price volatility, financial fragility, and market microstructure.

Note that this is a course in the economics of financial markets and NOT an MBA type of course. We will study financial markets using the methods of economic theory. Some lectures may be more descriptive, but for most of the course we will use economic models to understand the functioning of markets.

**Course structure**

The course is divided in two parts. During the first part, which is taught by **Ji Hee Yoon** and runs from week 1 to week 5, we will cover the following topics

Time, uncertainty and liquidity  
Financial assets  
Efficiency and fragility of financial markets  
Intermediation and financial markets  
Bank runs

During the second part of the course, which is taught by **Giovanni Cespa**, and runs from week 6 to week 10, we will cover the following topics:

1. Trading institutions
2. Measures of market liquidity
3. Models of liquidity determination
  - a. Glosten and Milgrom
  - b. Kyle
4. Estimating the determinants of market illiquidity

## **Course Organization**

In each week, we will have a live online session or face to face on Thursday from 9:00 am to 10:00 am. In addition, there will be asynchronous materials (e.g., pre-recorded lectures, reading materials, and problem sets) in Moodle.

We will give you problem sets **every week**. Solving exercises is an important part of your learning process. I prefer that you solve the problem sets in groups of at most five people (hand in just one answer sheet with the five names). Solving exercises together, you will learn from each other and not only from me. Problem sets will be discussed during tutorial classes.

All information about the course, notes, problem sets, solutions, etc. will be posted in Moodle.

## **Textbook**

There are two different textbooks for the two parts of the course:

For the first part, the main reference is:

Allen F. and Gale D., *Understanding Financial Crises*, Oxford University Press, 2007

For the second part, instead the reference is:

Foucault T, Pagano, M. and Röell, A. *Market Liquidity*, Oxford University Press, 2013.

I will indicate further readings during the course.
