

Health and lifestyles of people aged 50 and over

Some time ago, you kindly helped us with the second stage of a new study about ageing. It was conducted by the *National Centre for Social Research* jointly with academic researchers from University College London and the Institute for Fiscal Studies, and was funded by a number of government departments in Britain and the National Institute on Aging in the United States. Your contribution has helped to make the study a great success, and we are writing to you now to ask for your help in the next stage.

As you may recall, this ground-breaking study, the English Longitudinal Study of Ageing (ELSA), explores the health, lifestyles and financial situation of people as they grow older. We are hoping to revisit everyone who participated in 2004 or 2005 to conduct a third interview to see how their lives have changed or stayed the same. Taking part is entirely voluntary, though we very much hope to interview everybody who took part last time so that our results give an accurate picture of people's experiences.

As a token of our appreciation, the interviewer will give you a cheque for £10. If you are unable to bank the cheque, we can arrange for you to be sent a gift voucher instead.

Your interviewer, _____, will contact you in the next few days to invite you to take part and, if you are willing, arrange a time to do the interview. The interview can be arranged according to your needs and availability. The interviewer will be carrying an identification card, with a photograph and the logo of the National Centre for Social Research. They should be able to answer any questions you may have about the study.

All your answers will be treated in strict confidence. We hope that you will want to be involved in this important study, and enjoy speaking to one of our interviewers again. If you have any questions or would like to make other arrangements for the interview, please don't hesitate to phone Sue Hobbs on freephone 0800 652 4569.

Yours sincerely,

Professor Sir Michael Marmot
Principal investigator

Sue Hobbs
