- Background
- Longitudinal Weights
- Cross-Sectional Weights
  - Main Cross-Sectional Weights
  - Nurse Weights
  - Self-Completion Weights
- Clustering & Stratification Variables
- Q & A

# Background

1.

# History of ELSA

Original sample  
HSE 1998/1999/2001  
Age 50+, 1 Mar 2002

Refreshment sample  
HSE 2006  
Age 50-74, 1 Mar 2008

Refreshment sample  
HSE 2011/12  
Age 50-51, 1 Mar 2014

Refreshment sample  
HSE 2001/02/03/04  
Age 50-52, 1 Mar 2006

Refreshment sample  
HSE 2009/10/11  
Age 50-55, 1 Mar 2012

Refreshment sample  
HSE 2013/14/15  
Age 50-53, 1 Mar 2018

# Longitudinal Weights

2.

# Key Points

---

- Aim to make the sample representative of those aged 50+ living in England at a single point in time
- Assigned to core members only
- Produced by assessing differences between respondents and non-respondents on a number of characteristics, e.g.:
  - Age (at wave 1) by sex;
  - Government Office Region ;
  - Number in household;
  - Whether had a long-term limiting illness;
  - White/non-white ethnicity;
  - Self-reported general health.

# Key Points

---

- Built upon longitudinal weights from each previous wave, as weights apply to those who have taken part in each wave
  - 1 weight is available in each Wave 3-8 using Wave 1 core members as a base
  - 1 additional weight is available at Wave 8 using Wave 4 core members as a base
- Applied when analysing individual change over time

# Longitudinal Weights by Wave

Wave	Variable	Core Members
3	W3LWGT	7,168
4	W4LWGT	5,971
5	W5LWGT	5,262
6	W6LWGT	4,711
7	W7LWGT	4,062
8	W8W1LWGT	3,470
8	W8W4LWGT	5,623

# Cross-Sectional Weights

3.

# Key Points

---

- Aim to make the sample representative of those aged 50+ living in England at the specific time of each wave
  - therefore do NOT include those who have moved out of England
- Assigned to core members only
- Produced by assessing differences between respondents and non-respondents on a number of characteristics

# Wave 8 Example

W8W1LWGT, n=3,470

W8W4LWGT, n=5,623

W8XWGT, n=7,133

# Main Cross-Sectional Weights by Wave

Wave	Variable
1	W1WGT
2	W2WGT
3	W3XWGT
4	W4XWGT
5	W5XWGT
6	W6XWGT
7	W7XWGT
8	W8XWGT

# Nurse Weights by Wave

Wave	Nurse Variable	Blood Variable
2	W2NURWT	W2BLDWT
4	W4NURWT	W4BLDWT
6	W6NURWT	W6BLDWT
8	W8NURWT	W8BLDWT

# Self-Completion Weights by Wave

---

Wave	Self-Completion Variable	Sexual Self-Completion Variable
4	W4SCWT	N/A
5	W5SCWT	N/A
6	W6SCWT	W6SSCWT
7	W7SCWT	N/A
8	W8SCWT	W8SSCWT

# Clustering & Stratification Variables

4.

# Clustering & Stratification Variables

Wave	Cluster Variable	Stratification Variable
1	AHSECLS2	ASTRATIF
2	HSECLST	ASTRATIF
3+	IDAHHWN (household serial number: 'IDAHHW' plus Wave number e.g. for Wave 5, this is IDAHHW5)	GOR
