# Passive Fire Protection & Fire Stopping - General Contractor Information

## UCL Project Managers and Principal Contractors - what you need to know:

<table>
<thead>
<tr>
<th>Mandatory</th>
<th>UCL The Client Requires</th>
<th>all contractors</th>
<th>comply with the Regulatory Reform (Fire Safety) Order 2005 &amp; Building Regulations set out in Approved Document B (ADB) through the <strong>Principal Contractor (PC)</strong>. The <strong>PC</strong> must provide suitable and effective fire stopping and passive fire protection measures to mitigate the impact of fire spread through occupied buildings.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mandatory</td>
<td>UCL as the Client Requires</td>
<td>adequate and suitable passive fire protection measures to be provided for all works including construction, protection of structural elements, building services (MEP) and UCL Information Systems Division (ISD) including networking &amp; data cabling projects by fire-stopping service penetrations and construction gaps passing through fire compartment walls, floors and any other fire-rated partitions.</td>
<td></td>
</tr>
<tr>
<td>Mandatory</td>
<td>UCL internal and external Project Managers and Principal Contractors shall use an approved 3rd Party Accredited company (see suggested list of companies below) to provide a consistent delivery and continuity of records. All works and materials must have an LPCB Certificate of Conformity, upon completion &amp; record of fire stopping work locations provided at end of project for records;</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Mandatory</td>
<td>In all circumstances, UCL Project Managers &amp; UPOs are to provide provisional sums for works (no matter how minor) to ensure that adequate fire stopping is provided during, and or, on completion of the project / works, as necessary;</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Prohibited</td>
<td>the use of <strong>non-3rd party accredited fire stopping or passive fire protection companies</strong> on UCL projects;</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Acceptable</td>
<td>In all circumstances, UCL Project Managers &amp; UPOs / Principal Contractors should seek advice from the specialist companies (below) of early on as possible in the project to ensure that were passive fire protection is required works can be sequenced correctly between PC and the approved companies. The use of approved companies ensures that UCL has a standardise record of passive fire protection works in individual buildings to an agreed standard.</td>
<td></td>
<td></td>
</tr>

1 UCL requires 3rd Party Accreditation with the Building Research Establishment (BRE) / LPCB (Loss Prevention Certification Board) LPS 1531 scheme;
1.0. Instructions

For all Passive Fire Protection undertaken on UCL premises and projects - Project Managers & Principal Contractors are to employ:

- LPS 1531 Contractors from the list provided at [www.redbooklive.com/pdfdocs/redbook-vol2part1.pdf](http://www.redbooklive.com/pdfdocs/redbook-vol2part1.pdf)

See section 1.2 - Dec 16 approved company details attached

2.0. Technical Advice - Passive Fire Protection

3.0. Further Advice

4.1. The Association for Specialist Fire Protection (ASFP) represents many of the UK's major manufacturers and contractors, as well as regulatory and certification bodies, involved in the specialist passive fire protection industry. See [www.asfp.org.uk](http://www.asfp.org.uk)

Appendix:

- LPS 1531 Scheme Details;
- Approved LPS 1531 Passive Fire Protection Companies - current Dec 16:
Ensuring the performance of passive fire protection

Don’t let passive fire protection be compromised by poor installation or application. These products and systems are designed to protect life and property and it is essential that they continue to perform in the event of a fire.

In order to ensure these passive fire protection products are installed correctly, the LPS 1531 approval scheme has been developed by LPCB (the Loss Prevention Certification Board) for companies installing or applying passive fire protection products.

By selecting an LPS 1531 approved company, you can be sure their installers are appropriately trained and have the necessary expertise to install or apply the passive fire protection product or system to deliver the project's fire protection requirements.

How does approval benefit me?

The LPS 1531 approval scheme offers benefits to specifiers, main contractors and regulators including:

- Risk reduction – specifying LPCB approved companies demonstrates due-diligence and mitigates against possible accusations of negligence
- Avoidance of costly mistakes – LPCB approved companies have demonstrated competence in the installation of passive fire protection products and systems.
- LPCB inspection of up to 15% of projects completed by LPCB approved companies which ensures they maintain an ongoing level of competence.
- Time saved in selection - all LPCB approved companies are listed in the Red Book (see below) and on www.redbooklive.com so specifiers can check the most up to date listings.

LPCB develops independent third party approval schemes in conjunction with appropriate external stakeholders including the insurers, regulators, end-user clients etc who provide feedback to ensure that the schemes are robust and current.
What areas of passive fire protection are covered by LPS 1531?

The broad scope of LPS 1531 covers:-
- Penetration, cavity barrier and linear gap seals
- Fire rated board and cladding to structural elements
- Intumescent coatings to structural elements
- Fire rated spray materials
- Fire rated ductwork systems
- Fire resisting dampers
- Fire resistant compartment systems
- Offsite application of intumescent coatings to structural elements

How do I achieve approval?

In order to achieve and maintain LPCB approval, the company must undergo an initial office assessment which includes a review of the documentation covering:
- specific projects,
- installed products,
- quality testing,
- training records.

There is also an initial review of site installation to ensure that the passive fire protection design criteria were met.

After the initial approval has been granted there are ongoing site and audit inspections.

What happens next?

Once a products and/or company is approved by LPCB, they are listed in the world renowned Red Book. This is published annually in printed and CD formats and is also available on an updatable memory stick.

Listings are also continually updated online at www.redbooklive.com. This enables specifiers to check the validity of an approval and also contains a list of those companies that have had their approval suspended or withdrawn.

Certificates of Conformity

Another benefit to the specifier, main contractor, regulator and end user is the issue of a numbered LPS 1531 Certificate of Conformity. A Certificate of Conformity (or C of C as it is known) is written confirmation by the installing company that the installation or application of the passive fire protection product or system satisfies the project requirements; has been installed in line with the manufacturers recommendations and that the product or system has been suitably fire tested or assessed.

A copy of the completed C of C is handed to the client by the installing company, a further copy is sent to LPCB and a copy retained by the approved company.

Other LPCB Passive installer schemes

LPS 1500 Requirements for the LPCB approval and listing of companies installing construction elements used to provide compartmentation in buildings.

LPS 1197 Requirements for the LPCB approval and listing of companies undertaking the maintenance and repair of doorsets, shutters and active smoke/fire barriers.

LPS 1271 Requirements for the LPCB approval and listing of companies installing fire and security doorsets, shutters and smoke barriers.

For further information, please contact:

BRE Global
Bucknalls Lane
Watford

The companies listed in this section are approved to install passive fire protection products for the Appendix areas indicated in their entry.

Appendix areas:

1. Penetration, cavity barrier and linear gap seals
2. Fire rated board and cladding to structural elements
3. Intumescent coatings to structural elements
4. Fire rated spray materials
5. Fire rated ductwork systems
6. Fire resisting dampers
7. Fire resistant compartment wall systems
8. Offsite application of intumescent coatings to structural elements

123 Fire (a division of MB Plant Limited)
Swift House Business Centre, 16 High Street S43 3UX, United Kingdom
Tel: 0114 360 3213
E-mail: andrewbell@123fire.co.uk • Website: www.123fire.co.uk
Certificate No. 1133PI to LPS 1531 Issue 1

Company assessed and approved for installing or applying passive fire protection products under the following scope:
- Appendix 1 - Penetration, cavity barrier and linear gap seals
- Appendix 2 - Fire rated board and cladding to structural elements
- Appendix 3 - Intumescent coatings to structural elements

Abbey Thermal Insulation Ltd
23-24 Riverside House, Lower Southend Road, Wickford, Essex SS11 8BB, United Kingdom
Tel: +44 (0) 1268 572116 • Fax: +44 (0) 1268 572117
E-mail: robert.stubbs@abbeythermal.com
Certificate No. 1014PI to LPS 1531: Issue 1

Company assessed and approved for installation of passive fire protection products under the following scope.

Appendix 1 - Penetration, cavity barrier and linear gap seals.
Appendix 2 - Fire rated board and cladding to structural elements.
Appendix 5 - Fire rated ductwork systems.

ACT Construction (UK) Limited
Unit 25C, Anniesland Business Park, Netherton Road, Glasgow G13 1EU, United Kingdom
Tel: 0141 959 9200 • Fax: 0141 959 9400
