

Laboratory Risk Assessment

<i>Procedure</i>	Core extrusion
-------------------------	----------------

<i>Level of Risk</i>	low
-----------------------------	-----

Hazard	Risk	Recommended Control
Biological hazards	Infection from water borne pathogens	?? Disposable gloves should be worn ?? Do not syphon water by mouth - use a syringe ?? Ensure any spillages are cleaned up immediately ?? Wash hands thoroughly after extrusion
Slips, trips and falls	Personal injury	?? Do not climb onto stools to extrude long cores - use the step-stool.
Repetitive procedures; twisting and bending.	Strains and sprains; back injury.	?? Work in pairs and swap tasks at regular intervals
