

TILING PATTERNS

MODULE 1: INVESTIGATION 2

Repeating and Alternating Patterns

ACTIVITY 1.2.1

Repeating Flowers

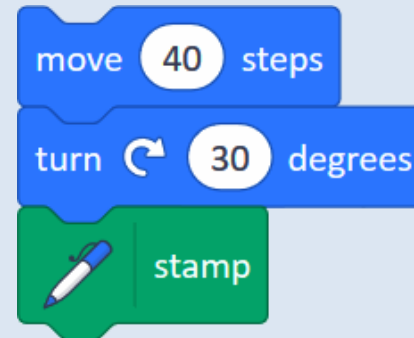

MODULE 1: INVESTIGATION 2

Activity 1.2.1 – Repeating Flowers

Open project **13-Tile Repeat**.

■ Click on the **move-turn-stamp** script again and again...

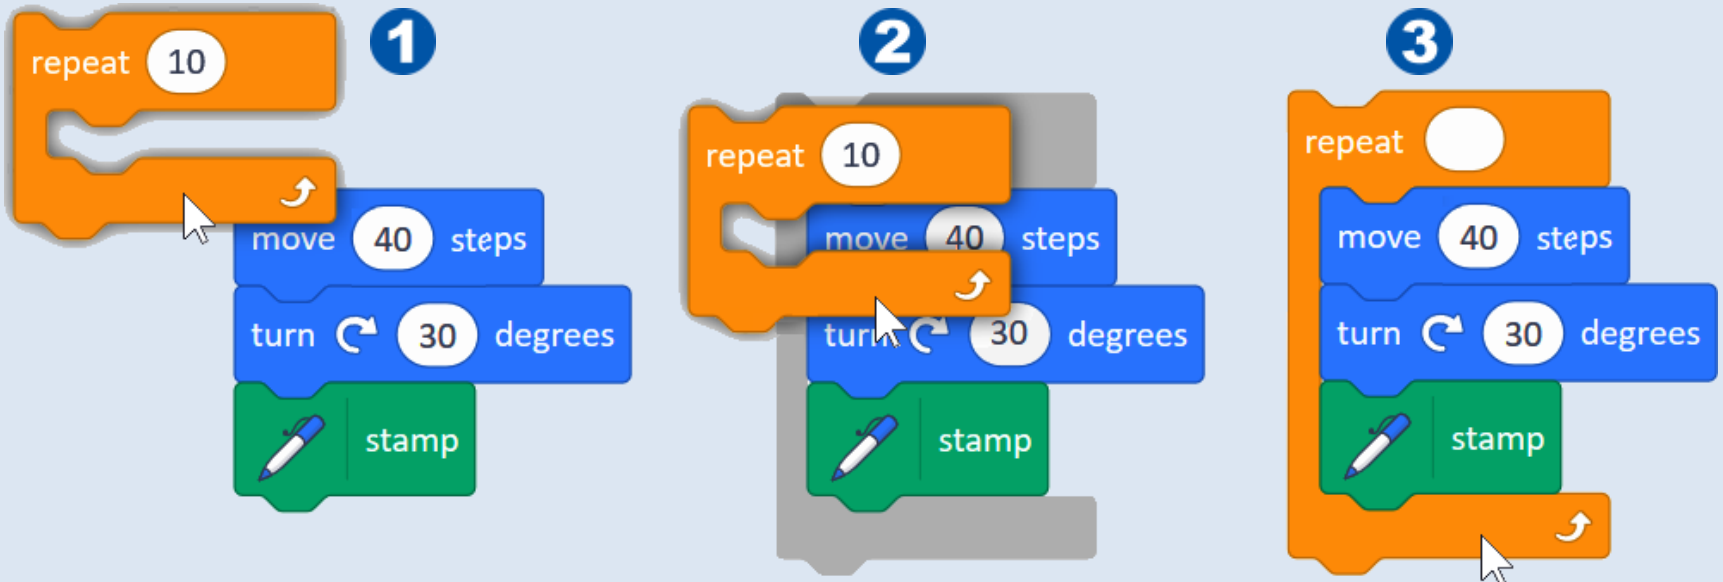

What was the **minimum number** of clicks you needed to complete the pattern?

MODULE 1: INVESTIGATION 2

Activity 1.2.1 – Repeating Flowers

■ Add the **repeat** block to your script.

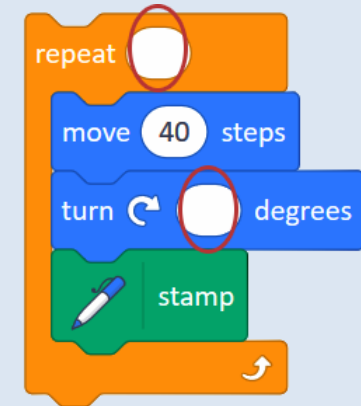

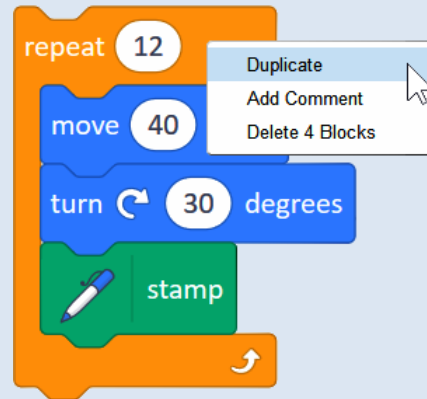

■ Fill in the **minimum number** of repeats needed to complete your pattern.

MODULE 1: INVESTIGATION 2

Activity 1.2.1 – Repeating Flowers

■ Duplicate your script.

■ Change the numbers in the **repeat** and **turn** blocks to create different patterns.

Discussion Questions

- Did you manage to create a complete flower?
- Did your Tile sprite touch the edge of the stage? What happened?
- What number did you put in your **repeat** block? If this was higher or lower would it change the pattern? How?
- How many degrees did your Tile sprite turn for each **stamp**?
- How did you decide what values to use in the **repeat** and **turn** blocks?
- How many degrees did your Tile sprite turn in total to create the whole flower? Was this always the same?

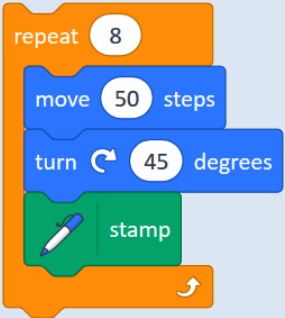

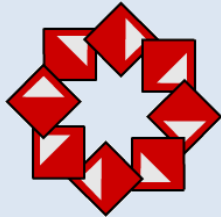

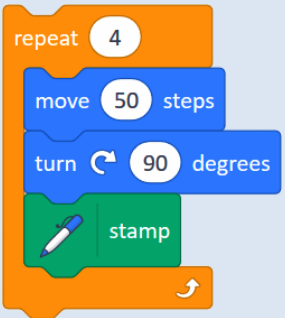

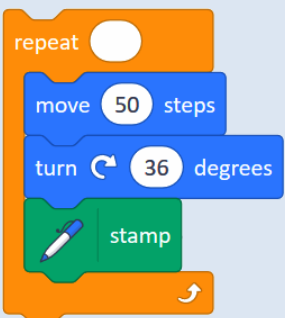

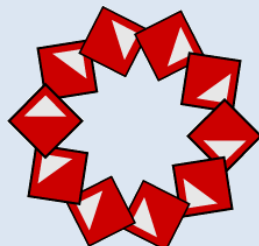

ACTIVITY 1.2.2: UNPLUGGED

Calculating Angles

MODULE 1: INVESTIGATION 2

Activity 1.2.2 – Unplugged: Calculating Angles

	Number in repeat block	Number of degrees in turn block	Total number of degrees Tile sprite turned
 	8	45 degrees	___ degrees
 	___	___ degrees	360 degrees
 	___	36 degrees	___ degrees

MODULE 1: INVESTIGATION 2

Activity 1.2.2 – Unplugged: Calculating Angles

	Number in repeat block	Number of degrees in turn block	Total number of degrees Tile sprite turned
 	8	45 degrees	<u>360</u> degrees
 	<u>4</u>	<u>90</u> degrees	360 degrees
 	<u>10</u>	36 degrees	<u>360</u> degrees

MODULE 1: INVESTIGATION 2

Activity 1.2.2 – Unplugged: Calculating Angles

	Number in repeat block	Number of degrees in turn block	Total number of degrees Tile sprite turned
 	5	____ degrees	____ degrees
<p>Extension Can you work out the numbers used in the script that created this pattern?</p> 	____	____ degrees	____ degrees

MODULE 1: INVESTIGATION 2

Activity 1.2.2 – Unplugged: Calculating Angles

	Number in repeat block	Number of degrees in turn block	Total number of degrees Tile sprite turned
 	5	<u>72</u> degrees	<u>360</u> degrees
<p>Extension Can you work out the numbers used in the script that created this pattern?</p> 	<u>6</u>	<u>60</u> degrees	<u>360</u> degrees

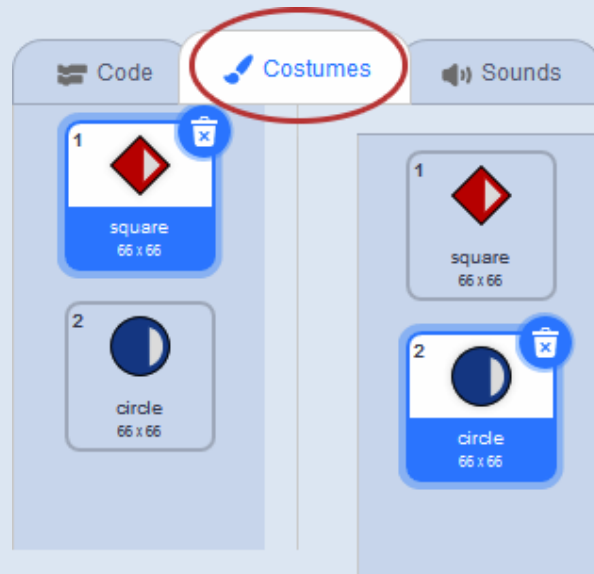

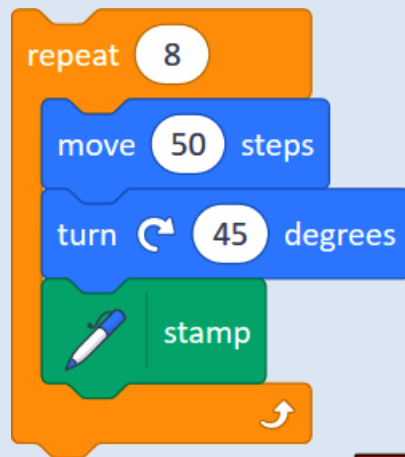

ACTIVITY 1.2.3

Alternating Flowers

Continue in your project **13-Tile Repeat**.

- Run one of your previous scripts to stamp a pattern. Then run it again with different costumes.

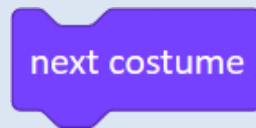

next costume

MODULE 1: INVESTIGATION 2

Activity 1.2.3 – Alternating Flowers

- Use the **next costume** block in your scripts to create the pattern below.

- Now create some of the patterns below or similar patterns.

Discussion Questions

- Where did you place the **next costume** block in your script? If you moved it how might this change your pattern?
- Did you use one **next costume** block or more? Did you build a single script to stamp the whole pattern in one click?
- How many squares and circles were in your patterns?

ACTIVITY 1.2.4 [EXTENSION]

Repeating and Alternating

MODULE 1: INVESTIGATION 2

Activity 1.2.4 – [Extension] Repeating and Alternating

Continue in your project **13-Tile Repeat**.

■ Edit your scripts to create patterns similar to the ones below.

more advanced patterns

Discussion Questions

- Which patterns did you manage to create?
- Can you describe a strategy that you used to create one of your patterns?
- Did you use different sequences of costumes in your patterns?

MODULE 1: INVESTIGATION 2

My Investigation 2 check list:

- ☐ I used the **repeat** block to run my script several times.
- ☐ I found the *minimum number* to put in the **repeat** block to complete the circular pattern.
- ☐ I clicked the green flag to reset the stage and the sprite.
- ☐ I used the **next costume** block in my scripts.
- ☐ I created different patterns with alternating costumes.
- ☐ I built a single script to stamp the whole pattern with different costumes in one click.

repetition

means running a sequence of commands a certain number of times

is a **control block** which runs the blocks inside a specified number of times

a command which waits a specified number of seconds, e.g. 1, 2 or 0.2, then continues with the next blocks

total turn

total number of degrees the sprite turns when running a script

costumes

are alternative ways that a sprite can look on the stage

a command which switches to the next costume in the list of the sprite's costumes. The next costume after the last one is the first one in the list again

pattern

repeating sequence when stamping sprite's costume or costumes
