

How can the MS nurse be of help?

5th MS Research Day

14th June 2014

MS Nursing Team

National Hospital for Neurology & Neurosurgery

What are MS Nurses

MS Nurses are experienced nurses from a variety of backgrounds with a keen interest in multiple sclerosis and improving MS services

They will be there from the beginning...

What is MS?

Why me?

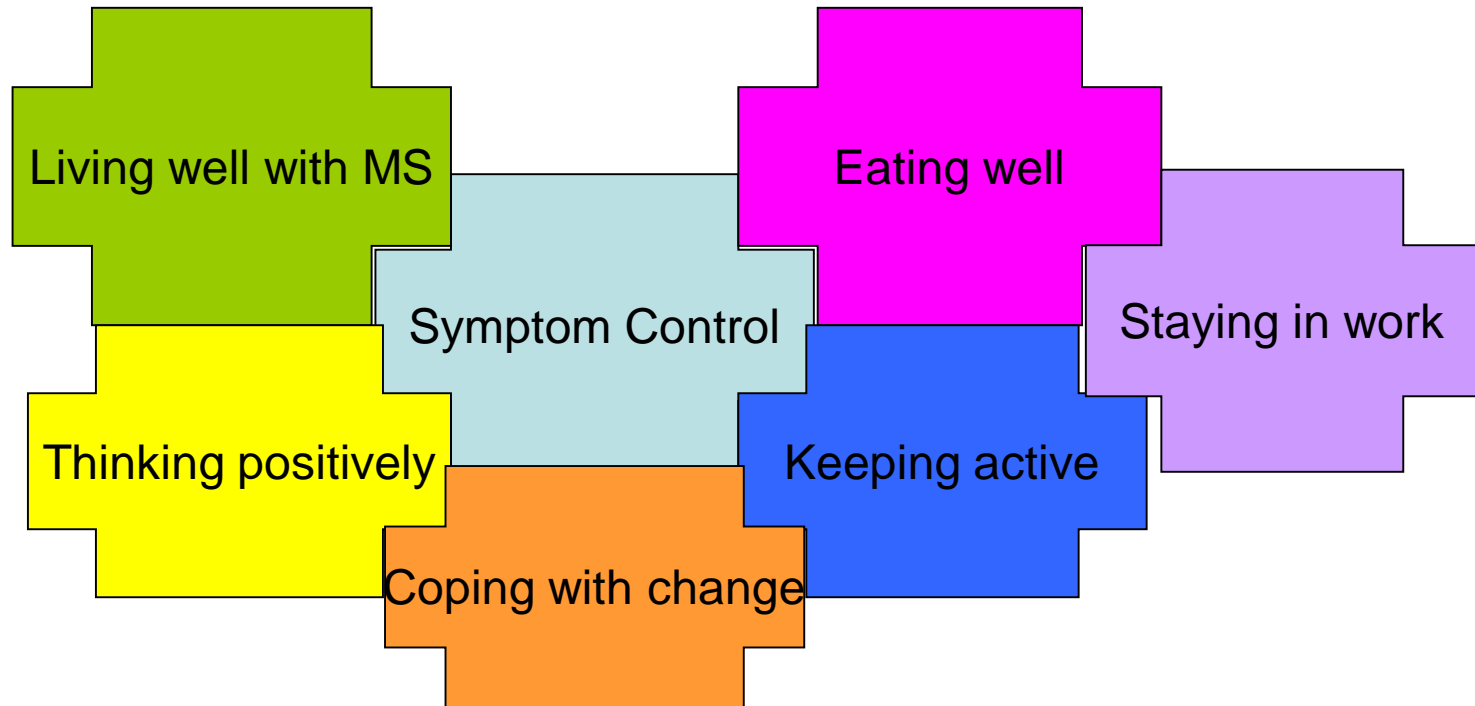

What does the future hold?

How will it affect me?

What should I do?

Helping you through the ups and downs...

When relapses happen...

With you through treatments...

Dealing
with your
symptoms

Supporting
you through
new
treatments

Later on...

Is my MS
changing?

What does it
mean for me?

What do I need
now?

Planning for
the future

Where can I get
it?

How can the MS nurse help?

MS nurses are there through the whole journey of living with MS

But, over to you...

How can we help?
