JRO/SPON/S12/05	30/11/21	Updated as part of SOP review	Nikki Cleary

<b>ACRONYMS:</b>	
CI	Chief Investigator
CTIMP	Clinical Trial of an Investigational Medicinal Product
GCP	Good Clinical Practice
HRA	Health Research Authority
ISF	Investigator Site File
JRO	Joint Research Office <a href="http://www.ucl.ac.uk/jro">http://www.ucl.ac.uk/jro</a>
MHRA	Medicines and Healthcare Products Regulatory Agency
PI	Principal Investigator
QA	Quality Assurance
SOP	Standard Operating Procedure
TMF	Trial Master File

# Standard Operating Procedure on Training Requirements for staff participating in CTIMPs Sponsored by UCL

## 1. PURPOSE

This Standard Operating Procedure (SOP) has been written to describe the UCL GCP training procedure.

Please ensure that you are reading the latest version of this SOP, <http://www.ucl.ac.uk/jro>

## 2. JOINT UCLH/UCL RESEARCH OFFICE (JRO) POLICY

All SOPs produced from the JRO must be used in conjunction with local NHS Trust and UCL policies and procedures.

The JRO acts as the representative of the Sponsor UCL and will be the official name used on all SOPs.

## 3. BACKGROUND

All SOPs are written in accordance with applicable GCP requirements as outlined in SI 2004/1031, SI 2006/1928 and subsequent amendments. Where applicable it incorporates elements of ICH GCP tripartite guidelines (E6).

In addition, for trials with EU and Northern Ireland site the SOPs will have to be compliant with EU Clinical Trials Regulation No. 536/2014, when applicable.

The JRO organises face to face and online training courses on the principles of Good Clinical Practice (GCP). For all CTIMPs it is the high level “conditions and principles” of GCP set out in the UK Clinical Trials Regulations, that must be complied with and interpreted in proportion to the risks posed to the participants and to the integrity of the results.

The course objectives are as follows:

- Understand the key principles of GCP enshrined in the Medicines for Human Use (Clinical Trials) Regulations 2004 and as amended, the fundamentals of the EU Clinical Trials Directive and when applicable Regulation 536/2014 and subsequent relevant SIs. Formulate strategies for incorporating the principles of GCP into systems at the trial site(s) in order to comply with the UK regulations.
- Be aware of the ethical approval process and the definition and responsibilities of the Sponsor and Investigator.
- Understand the regulatory requirements for informed consent.
- Understand the regulatory requirements for assessing, recording and reporting:
  - Adverse Events (AEs)

- Adverse Reactions (ARs)
  - Serious Adverse Events (SAEs)
  - Serious Adverse Reactions (SARs)
  - Suspected Unexpected Serious Adverse Reactions (SUSARs)
  - Urgent Safety Measures and serious breaches
- 
- Outline the Essential Documents required for a CTIMP to be held in the Trial Master File (TMF) (CI only) or Investigator Site File (ISF).
  - Understand the principles of an MHRA systems inspection and recognise the requirements of the sponsor's monitoring and audit systems.
  - Be aware of the best sources of further information and practical guidance for UK Regulations.
  - Outline recent changes in UK legislation.
  - Emphasize the need to archive for the length of time outlined in the protocol by the sponsor.

In addition to the initial GCP training courses, refresher courses are provided for staff who have previously completed GCP training, to ensure staff working on CTIMPs are aware of latest regulations.

Further training is available via the NIHR CRN GCP courses which are available free of charge to the NHS, UK universities, and other publicly funded organisations conducting and supporting clinical research.

#### **4. SCOPE OF THIS SOP**

To describe the Good Clinical Practice (GCP), as per UK clinical trials regulations, training procedure for all staff undertaking CTIMPs Sponsored by UCL which fall under the UK Medicines for Human Use (Clinical Trials) Regulations 2004 and Regulation 536/2014 (where applicable).

To describe other relevant training required for all staff working on a CTIMP.

#### **5. RESPONSIBLE PERSONNEL**

All investigators and delegated individuals conducting any CTIMP as defined in the UK Medicines for Human Use (Clinical Trials) Regulations 2004 and Regulation 536/2014 (where applicable), to attend a GCP training course and obtain a certificate of attendance.

All individuals completing CTIMP related functions, to maintain a personal training record or equivalent.

CI running multicentre trials to ensure participating PIs and trial teams are appropriately trained and records maintained in the ISF or as appropriate.

JRO staff, when applicable, will receive initial and regularly updated training in GCP and the UK Regulations.

All individuals conducting any CTIMP related procedures or involved in the care of patients participating in a CTIMP are to receive GCP training **proportional** to the level of trial activity they complete.

## 6. PROCEDURE

### 6.1 Training

The named CI or PI may delegate duties within a CTIMP. Delegated individuals must be listed on the Staff Signature and Delegation of Responsibilities Log (or equivalent) which must include their roles, start date on the trial, end date on the trial (if applicable) and delegated tasks or duties. Each entry must be signed off by the delegated individual and the named CI or PI, to confirm delegation of duties.

If a member of clinical staff can be identified from the TMF or ISF, for example through a signature on an Essential Document, then that member of staff should be listed on the trial delegation log. All duties that trial staff are delegated to carry out, must be listed on the delegation log. Trial staff cannot carry out duties that they have not been delegated to do or duties that are not listed on the delegation log.

Each individual involved in conducting a trial should be qualified by education, training, and experience to perform their respective task(s).

It is the responsibility of the trial investigators to ensure that all relevant trial staff on a CTIMP have been trained in and have familiarised themselves with the trial protocol, safety reporting procedures, trial specific SOPs and local regulations, where applicable. All trial staff must have appropriate and sufficient training for the tasks they are delegated to carry out in the delegation log.

In addition, all members of staff on the trial delegation log should have attended a GCP course (organised by the JRO or an equivalent course) in the last two years and have a certificate of attendance available for review. Trial staff who have not attended a GCP course within the last 2 years, must book a GCP course as soon as possible. All trial staff should complete a refresher GCP course every 2 years, relevant and proportional to their trial activities.

Where a member of staff is performing limited duties within a CTIMP, such as IMP dispensing only, then GCP training received may be proportional to the level of activity in agreement with the JRO.

Where a member of staff is performing routine duties involved in the care of CTIMP patients an overview or short course in GCP may be appropriate. For example, Laboratory/diagnostic staff undertaking routine testing where the results will be used within a CTIMP, should have an overview of GCP. Full training is not mandatory but laboratory/diagnostic staff should be trained for the tasks they undertake within each CTIMP. The head of each laboratory participating in a CTIMP should attend a GCP course and assess which aspects of GCP are relevant to the lab staff.

GCP training must be delivered by a qualified individual or appropriate organisation.

Details and booking instructions for forthcoming courses are provided on the JRO website at <https://www.ucl.ac.uk/joint-research-office/training-and-resources> or the NIHR website <https://www.nihr.ac.uk/health-and-care-professionals/learning-and-support/good-clinical-practice.htm>

## **6.2 Revalidating knowledge**

All Investigators and delegated staff on a trial should have a GCP training certificate prior to trial initiation. This should have been obtained in the last 2 years. At sites, where the requirements are different, PIs and their teams should follow their local procedures. Following a substantial amendment to the regulations, the JRO will disseminate the changes to the regulations to the CI and/or will recommend that GCP training is revalidated sooner than the frequency listed above.

## **6.3 Records of attendance**

Individual team members are responsible for maintaining records of their CTIMPs training and these details must be included in the trial member CVs which form part of the ISF (in addition to a copy of their GCP certificate).

## **6.4 Audit/ assessment of clinical trials training**

Evidence of GCP training attendance will be required prior to trial commencement. The JRO will request copies of Investigator's GCP certificates. Investigators will be informed of the training requirements set out in this SOP. GCP certificates should be stored in a safe place and a copy held in the TMF or ISF. This applies to all certificates as they are updated. Out of date certificates should be kept and marked as superseded, not destroyed.

Site training records will be reviewed in accordance with the Monitoring Plan for the trial.

The GCP course content will be reviewed from time to time, following amendment of the regulations or other applicable guidance.

Relevant information about Serious Breaches is communicated to the GCP trainer, in order to inform the content of GCP training courses.

## **6.5 Additional recommendations**

Trial investigators and teams will be strongly encouraged to attend other relevant training sessions provided by the JRO. See <https://www.ucl.ac.uk/joint-research-office/training-and-resources>

## 8. APPENDICES

N/A

## 9. TEMPLATES/LOGS ASSOCIATED TO THIS SOP

Staff Signature and Delegation of Responsibilities Log

## 10. SOP DISSEMINATION AND TRAINING

SOPs will be distributed to the relevant staff, by the named author on the front page of the SOP. Relevant staff will sign the SOP training log (12. SOP TRAINING LOG) which is part of each SOP. The training will constitute the member of staff reading the SOP and being provided with the opportunity to ask specific questions to the author of the SOP.

Where applicable, the SOPs, relevant templates and logs will be available on the JRO website shortly after having been released.
