

**MRC LMCB University College London
Postdoctoral Research Position
Epithelial Membrane Domain Organisation**

A postdoctoral research position in Epithelial Membrane Domain Organisation is available at the MRC LMCB at University College London. The LMCB is an intellectually stimulating research institute within UCL dedicated to research aimed at understanding the fundamental basis of cell behaviour relevant to human disease. The candidate will participate in an exciting research programme in Dr Christopher Stefan's laboratory investigating vital roles of inter-organelle contacts in the regulation of membrane lipid and calcium dynamics during epithelial development and function.
