

Rotation projects undertaken in 2020/21 and 2021/22	
<i>Title</i>	<i>Theme</i>
The genetics of depression in individuals with mixed ancestry background	Population Mental Health
Bereavement for suicide: qualitative interview studies looking into intrusive thoughts	Intervention
How do SSRIs impact learning about rewards?	Mechanism
Neighbourhood characteristics, residential mobility, and mental illness	Population Mental Health
Developmental changes in estimates of instrumental control and their link to mental health	Mechanism
Designing and evaluating an Acoustic Vehicle Alerting System (AVAS) for e-scooters to reduce urban stress in pedestrians	Population Mental Health
Loneliness in Adolescence	Intervention
Mechanisms of Psychotherapy	Mechanism
Exploring causality in the mental health mortality gap	Population Mental Health
Using genetics to optimise antipsychotic treatment	Mechanism
Neuropsychiatric syndromes of psychosis: psychosis associated with neurological problems like stroke, epilepsy or acquired brain injury	Population Mental Health
Investigating sudden gains in the Mental Health for Children with Epilepsy trial.	Intervention
Computational modelling of interoceptive accuracy and metacognition	Mechanism
Neural circuits underlying trauma memory in psychosis and response to psychological therapy: fMRI and Smartphone based assessment	Intervention
The Genetics of Depression in Diverse Populations	Population Mental Health
Mineralocorticoid receptors and posttraumatic stress: Testing a novel 'memory-therapeutic' target for preventing re-experiencing symptoms of PTSD	Mechanism
Cognitive Behavioural Therapy and/or escitalopram on the neural circuitry and computational parameters of negative affective bias in anxiety disorders	Intervention
Using genetics to uncover the role of sex hormones in the development of depression in women	Population Mental Health
