

UCL Space Week

How Space Enables Shipping

Tuesday 14th May

How Space Enables Shipping A Workshop

Leader: Dr Tristian Smith Director, UCL Energy Institute

Venue: Christopher Ingold Bldg, Chemistry Lecture Theatre,
UCL, 20 Gordon St., WC1H 0AJ

Register at www.uclspace.com

09:00 – 10:45

- The global shipping industry is rapidly advancing into a new era of data use, connectivity and automation.
- New routes are opening up in the Arctic, and with this new risks and opportunities for navigation, safety in remote areas and environmental impacts are emerging.
- Much of these developments will be enabled through space-related equipment.
- Many industry stakeholders hope that this change will create a new paradigm and assist the sector's move to zero GHG emissions and increased sustainability.
- Through small group discussion we will explore the role that different space technologies might have in enabling change in the shipping industry.

13 – 17 May 2019, London
