From 2013 to 2014 there was a 3% increase in total PCI activity, bringing the total to 96,143 procedures.

39 of 119 (33%) of NHS and private hospitals do not conform to the national guidance of performing a minimum of 400 PCIs per annum.

**STEMI:** Most centres achieved satisfactory times to emergency treatment for patients with STEMI:

- 90% of patients treated within 90 minutes of arrival at PCI hospital.
- 77% of patients treated within 60 minutes.
- 85% received treatment within 150 minutes of a call for help.
- But only 49% met this target where transfer between hospitals is involved.

**What is treated with PCI?**

- 37.2% nSTEMI/unstable angina
- 33% Stable angina
- 27.2%
- 2.6%
- Other diagnosis

**Demographics**

- Of which they are 74% of men.
- Age (average) 65 years of age.

**Drug eluting stents were used in 85.7% of procedures in 2014**

Compared with 63.5% in 2009.
