We’re proud of our pioneering history, distinguished present and exciting future. UCL is a great place to be a student for so many reasons.
We have a proud heritage of disruptive thinking, a reputation for game-changing research and a unique multidisciplinary approach to problem solving.
UCL has confronted humanity’s biggest issues since 1826. At that time, attending university was a rare privilege. If you weren’t a man from a wealthy background and a member of the established church, higher education was off limits.

Our founders tore up that rule book. We were the first university in England to welcome students of any religion or social background. We were also the first in England to welcome women to university education.

We have challenged inequality ever since, and we hold a Silver Athena SWAN award in recognition of our progressive work practice. Each year, we invest £13.5 million in bursaries and activities to support students from diverse backgrounds to enter and succeed.

We were also the first university in England to teach subjects such as engineering, architecture and languages. Our ground-breaking heritage makes us proud, but as we approach UCL’s bicentenary in 2026 it’s the future that really excites us.

We have expanded with a new campus (UCL East) on Queen Elizabeth Olympic Park in Stratford, East London, that is fit for the 21st century and beyond. With physical spaces that are publicly accessible and programmes built around working with local communities, this next chapter for UCL embodies our founding principles – to better understand global challenges by bringing together diverse viewpoints.

Since our founding we have continually innovated our teaching methods and we make research the cornerstone of our students’ activity. Our Arts and Sciences BASc leads the way in interdisciplinary study. Elsewhere, our collaborative teaching methods break down the boundaries between student and teacher, encouraging the bold thinkers of tomorrow.
Learn how to think – not what to think
We are here to further your knowledge, develop your skills of analysis and problem-solving and give you a truly global outlook that draws on diverse cultural perspectives.

Studying in London, you’ll be living, learning and growing your network in one of the world’s greatest cities. At UCL you’ll have the chance to work alongside some of the world’s leading researchers. They will drive you to think more analytically and independently – providing opportunities to undertake research activities of your own and create original output.

Learning as part of an international community of great minds, you will develop the cultural fluency and global outlook that are prized by employers.

Throughout your time here, you’ll have many opportunities to shape our curriculum and how it’s delivered. Our collaborative approach also helps build the essential skills that make UCL graduates so in-demand, such as communication, teamwork, negotiation, entrepreneurship and project management.
UCL staff and alumni have won at least one Nobel Prize each decade since the award began in 1901, with more than half of our 30 Nobel laureates born outside the UK.

Our Nobel laureates
1904 – Chemistry
Sir William Ramsay
Discovered the noble gases: helium, argon, neon, krypton and xenon.

1913 – Literature
Rabindranath Tagore
Wrote profoundly sensitive, fresh and beautiful verse.

1915 – Physics
Sir William Henry Bragg
Analysed the structure of crystals using X-rays.

1919 – Chemistry
Sir Frederick Soddy
Invented the concept of isotopes.

1921 – Physiology or Medicine
Archibald Vivian Hill
Founded biophysics.

1928 – Physics
Owen Willans Richardson
Discovered the law of thermionic emission.

1929 – Physiology or Medicine
Sir Frederick Gowland Hopkins
Discovered growth-stimulating vitamins.

1936 – Physiology or Medicine
Sir Henry Hallett Dale and Otto Loewi
Discovered neurotransmitters.

1938 – Physiology or Medicine
Corneille Jean Francois Heymans
Revealed how respiration is regulated.

1944 – Chemistry
Otto Hahn
Made discoveries leading to the development of nuclear technology.

1947 – Chemistry
Robert Robinson
Discovered the structure of morphine and strychnine.

1955 – Chemistry
Vincent du Vigneaud
Carried out the first synthesis of a polypeptide hormone, oxytocin.

1959 – Chemistry
Jaroslav Heyrovsky
Discovered polarography, widely used in clinical and environmental analysis.

1960 – Physiology or Medicine
Peter Brian Medawar
Discovered the key to successful organ and tissue transplantation.

1962 – Physiology or Medicine
Francis Harry Compton Crick
Discovered the molecular structure of nucleic acids (DNA).

1963 – Physiology or Medicine
Andrew Fielding Huxley
Revealed how activity is co-ordinated by a central nervous system.

1967 – Chemistry
George Porter (Baron Porter of Luddenham)
Devised flash photolysis to observe free radicals.

1970 – Physiology or Medicine
Sir Bernard Katz
Advanced remedies against nervous and mental disturbances.

1988 – Physiology or Medicine
Sir James Black
Discovered the first beta-blocker, propranolol.

1991 – Physiology or Medicine
Bert Sakmann
Discovered the role of ion channels in diseases, revolutionising cell biology.

2000 – Economics
James Heckman
Developed statistical analysis of individual and household behaviour.

2001 – Physiology or Medicine
Sir Paul Nurse
Enabled new avenues of research in tumour diagnostics and therapy.

2007 – Physiology or Medicine
Sir Martin Evans
Introduced gene modifications in mice.

2009 – Physics
Sir Charles Kao
Developed the transmission of light for optical communication.

2013 – Physics
Peter Higgs
Predicted the particle: the Higgs boson.

2013 – Physiology or Medicine
James Rothman
Revealed how substances are trafficked by vesicles in our cells.

2014 – Physiology or Medicine
John O’Keefe
Discovered the ‘inner GPS’ in the brain.

2020 – Physics
Sir Roger Penrose
Proved that the general theory of relativity predicts the formation of black holes.
A UCL education is a climate education. We are Generation One – a collective of people committed to a new era of positive climate action. By turning science and ideas into action we are working towards creating a positive, fair and progressive future. For us and for the generations to come. Join us.

As a community of staff, students, citizens and partners, UCL is addressing the climate challenge on multiple fronts – ranging from what we can achieve today to pioneering future system change, as well as putting sustainability at the heart of our campus.

Our students bring new thinking on climate action to their studies and everyday lives. The UCL experience provides a wealth of opportunity to take climate action while you’re here and to develop as climate leaders for when you go into the wider world.

We can all play our part. Get inspired by the extraordinary breadth of climate-focused activity taking place at UCL, find out about our Generation One campaign and how you can get involved.

To join us scan the QR code, or search: ‘UCL Generation One’ to find out more.
Does the Earth have to be a fashion victim?
Every year, the fashion industry generates 10% of the world’s global carbon emissions. It’s why UCL scientists have pioneered a more sustainable method to help make propylene – a common ingredient in the fabrics and plastics of the clothes and shoes we wear.

**Take action now**
Visit a charity shop or try a swap shop when looking for a new outfit and reduce the 10,000 items of clothing sent to landfill every five minutes in the UK.

How can we eat our way to a better planet?
UCL researchers are tracking the environmental impact of food production on the environment to help industry and individuals make healthier and more sustainable choices.

**Take action now**
Take a look at the carbon footprint of your favourite foods and consider the lower environmental impact of plant-based food.

Trees matter, but just how much?
Trees are crucial to combating climate change. It’s why we’ve developed 3D laser mapping to help measure how much carbon dioxide the world’s trees absorb today – and predict how much they’ll store in the future.

**Take action now**
Use your smartphone to help NASA measure the world’s trees and find out how much carbon they store.

How far can we go with electric batteries?
Cars account for 18% of the UK’s carbon emissions, so it’s essential we move to electric vehicles. At UCL we’re developing lithium-ion battery cells with a higher energy density to enable electric vehicles to go further in between charges.

**Take action now**
Walking, cycling and public transport are still the most climate-friendly modes of travel. If you do have a car, electric or otherwise, keep your car tyres fully inflated to improve fuel efficiency by up to 3%.
Rice Inc works with more than 200 farmers in South-East Asia to eliminate food waste, promote sustainability and achieve food security. Its co-founders Kisum Chan and Lincoln Lee (Biomedical Sciences BSc) started the business in their third year of study.
Educati ng new entrepreneurs

Neucruit

UCL start-up Neucruit has developed a unique digital platform to help in the recruitment and engagement of patients in clinical trials. Founded by Livia Ng (Neuroscience BSc), the platform will speed up scientific advances and ultimately bring health benefits to people sooner.

ZNotes

Education technology and social-impact startup ZNotes delivers quality education for school students, regardless of background, through free revision notes and online content. Its founder Zubair Junjunia (Mathematics MSci) received the Diana Award in 2021 for the platform that has helped more than 4 million students in 198 countries.

Whether you plan to start your own business, tackle global issues or kick-start your dream career, we are here to help develop your entrepreneurial skills and thinking.

Our tailored, free extracurricular entrepreneurship programme, run by UCL Innovation & Enterprise, provides you with the skills, knowledge and hands-on experience you need to get your ideas off the ground and make a difference in the world.

If you want to start your own business our expert business advisors will provide mentoring and support to help steer your venture to success. You can also take advantage of free office space in The Hatchery, our dynamic start-up space at BaseKX in King’s Cross.
We are investing in a university fit for the 21st century and beyond. At UCL you’ll find all the cutting-edge facilities you need to achieve great things.

Cutting-edge facilities

We are over halfway through our 10-year, £1.25 billion investment in creating sustainable spaces and best-in-class facilities – giving our staff and students the tools to take their learning and discoveries further – with many award-winning developments in Bloomsbury already completed.

Our UCL East campus includes state-of-the-art laboratories, fabrication workshops, collaboration areas and public spaces, as well as a cinema, art installations and contemporary student accommodation.

We are creating a living laboratory of learning in an area committed to biodiversity throughout the parklands and waterways that run through the Olympic Park.

We also have a treasured venue in the Bloomsbury Theatre, which hosts plays, live music and comedy – as well as performances by our students and staff.

UCL’s historic libraries, collections, museums and galleries – spanning everything from Egyptology to pathology, zoology to fine art – are actively used in teaching.
Creating a ca
UCL East builds on our progressive history, positive impact and disruptive spirit. We are creating an experiential and accessible learning environment in which transformative research, collaboration and engagement will create a better world.

The UCL East campus neighbours small businesses, artist studios and start-ups. Wander through the landscaped park with its wetlands and wildlife and you will soon find Hackney Wick, a lively destination day or night, with its quirky cafés, eateries, craft breweries and bars along the River Lee canal.

Our new buildings provide facilities for cross-disciplinary research and open innovation, new approaches to practical learning and opportunities for public engagement. This world-class academic hub sits alongside contemporary student accommodation that provides an exciting new student living experience in London’s vibrant east end.

Whatever you choose to study, the combinations and potential for discovery are boundless.
We are equipping the next generation of disruptive thinkers with valuable opportunities for collaborative exchange as they rise to meet humanity’s greatest challenges.

An exciting new student experience

Our new UCL East campus in Stratford is made for collaboration. Whatever you choose to study – our innovative programmes offer a wide choice of modules developed with experts from business and industry – you will have the chance to get involved in projects in the local community, making an impression beyond the laboratory or lecture theatre and giving you vital skills for the workplace.

Bringing together diverse minds and different cultural perspectives, you’ll make friends and create professional networks across a range of fields that will last throughout your lifetime and career.
The UCL East campus is home to programmes that help create a fairer, more equal world in the face of global challenges, particularly in the fields of sustainable cities, transformative technology, global health, cultural understanding, justice and equality and human wellbeing. We’re excited for you to join us in translating world-class research into real-world impact.
Our sustainable university
Our world-leading research, addressing the climate and ecological crises, informs the changes we’re making here at UCL. We hope to inspire a generation of change makers to take the lead on climate and sustainability action across the world.

Sustainability is at the heart of how we operate. UCL’s award-winning sustainable campus is already powered by 100% renewable electricity and we send no waste to landfill, but our longer-term vision is much more ambitious.

By 2024, all our buildings will be net zero carbon and free from single-use plastics; we will have 10,000m² more biodiverse green space. UCL East has been designed with sustainability at its core: turning rubble into skateboard ramps, rainwater harvesting, low energy lighting and highly efficient mechanical ventilation, we have worked to minimise the carbon footprint of our new campus.

As a student at UCL, you will have the opportunity to join one of our many sustainability societies, get growing on campus on our student-led allotment, or sign up to be a Sustainability Ambassador.

Through our teaching programmes, we pass on our knowledge of sustainable best-practice to our students, to ensure that they become sustainability advocates to benefit the wider world.

Scan the QR code, or search: ‘Change possible UCL’ in YouTube to find out more.
London is your classroom

Your life in London is a crucial part of your education and you will have the opportunity to study, live and play in not just one iconic part of London but two, with the opening of our new campus in Stratford to complement our established home in Bloomsbury.
Bloomsbury itself is the historic home of Virginia Woolf and her ‘Bloomsbury Group’: writers, intellectuals, philosophers and artists who proudly challenged convention in both their lives and their work during the first half of the 20th century.

A wealth of knowledge and culture is on your doorstep at the world-renowned British Museum and British Library. And as part of London’s ‘Knowledge Quarter’, we are surrounded by more than 75 academic, research, cultural, media and technology institutions of all shapes and sizes – from Google to the Charles Dickens Museum.

On Queen Elizabeth Olympic Park in Stratford, UCL joins partners the BBC, Sadler’s Wells, UAL London College of Fashion and the V&A (Victoria and Albert Museum) at East Bank, a brand-new destination for London, with world-class culture and education at its heart.

With easy transport links across London, to the rest of the UK and continental Europe, there’s always something to do, see and learn.

Plan your journey and find out more: tfl.gov.uk/plan-a-journey
A place to call home
More than 150 countries are represented in our diverse student community, and you’ll make friends for life from all over the world here. But first, you need a place to call home while you study. We will prioritise you for accommodation in your first year, regardless of where you currently live, as long as:

- you will be a single, first-year undergraduate,
- you have chosen UCL as your firm choice through UCAS by the deadline (currently 10 June of the cycle in which you applied),
- you submit your accommodation application online by the deadline (currently 10 June of the year of entry),
- you have not previously lived or studied at a university in London (inside the M25 motorway).

Demand for accommodation in London is high, so we recommend applying as soon as possible once applications open.

Types of accommodation available

- Catered accommodation in which meals are included (breakfast and an evening dinner from Monday to Friday and brunch on Saturday and Sunday). You also have access to a small kitchen to prepare meals outside these times.
- Self-catered accommodation with shared kitchen facilities where you prepare your own meals. Flats are equipped with a cooker, refrigerator, freezer, kettle, toaster and microwave.

All UCL accommodation is offered for 39 weeks and is located in central London (Zones 1 or 2 of London’s public transport network).

Students with additional requirements

We have a limited number of rooms available for students that have additional requirements. This can include:

- Students with disabilities and health conditions
- Students that are care experienced or estranged. We will provide 365-day accommodation in the first year and, if needed, for subsequent years of study.

Email accommodation@ucl.ac.uk for details.

Further details about accommodation can be found on p92.

Moving to a new city as a first-year undergraduate can be a major change, but you’ll find a warm welcome at UCL.

As soon as you join UCL you become a member of the Students’ Union and can start taking advantage of all the things it has to offer – like joining as many of the 360 clubs and societies as you want. They’re your social group on campus, your support network and route to experiences you won’t find anywhere else.

With UCL’s multi-million-pound investment in transforming student life, we’re creating thousands more inclusive opportunities to play sport, explore the arts, volunteer and experience the amazing culture and diversity of our community.

TeamUCL is the collective name for all of our sports teams at UCL. They compete nationally against universities across the UK and there are lots of ways for you to get involved and play and train regularly. You can also stay active through the Union’s social sport programme, disability sport programme, or no-experience-necessary Project Active programme.

Beyond clubs and societies, the Union can help you find volunteering opportunities in London, lead projects to make positive change and give you impartial advice and support when you need it most.

Through our Students’ Union, you’ll make lifelong memories and get the most from London.

A vibrant social life
“The attitude at UCL is both fun and focused. You realise that the people you meet on your programme, in the Cloisters and halls will be future game-changers – as will you – and that is inspiring!”

Abigail Irozuru (Law LLB, 2012)
GB Olympic Long Jump Athlete
British Indoor Champion 2020

Our global community
As a UCL student, you become a lifelong member of a truly global community. Our extraordinary alumni, with their bold, brilliant and inquisitive minds, go on to discover and achieve remarkable things across the globe.

Over 350,000 UCL alumni live in more than 190 countries worldwide. We count Nobel Prize winners, poets, novelists, BAFTA winners, Olympians, inventors and Turner Prize-winning artists among our graduates.

From your first day at UCL, this network is there to support and inspire you. Experienced alumni volunteers provide guidance as mentors and share their insights through panel discussions, skills workshops and internship opportunities.

You will also have the chance to make valuable contacts to accelerate your career at alumni-led speed networking events and social events, in the UK and overseas.

Wherever life takes you after graduation, UCL's global community will be there to support you. From networking and international social events to professional development programmes run by and for alumni, there's no shortage of ways to stay connected with people who will support you to reach your next goal.
We are here to support you through any challenges you face while studying here, beginning with a wealth of resources to help new students prepare and settle in – including useful newsletters, apps and guides.

Support when you need it

Our Transition Programme is designed to help you adapt to university life and includes access to a mentor and social sessions to help you find your feet. You’ll also be assigned a Personal Tutor, who can give you academic guidance and steer you towards any help you might need on practical and personal matters.

New international students are invited to a series of online orientation events before they arrive in the UK, followed by in-person orientation events that run the week before term starts.

If you need more support, UCL Student Support and Wellbeing offers information, advice and services to help all our students thrive. This includes free, easy-to-access mental health and wellbeing advisers, counselling, disability assistance, events to help you look after yourself and much more. We also have a dedicated team of department-specific Student Advisers, who are on hand to support first-year undergraduates.
We take your future ambitions seriously and provide you with the support you need to realise your full potential. UCL graduates are in-demand and around 800 employers attend our careers events every year.

Every year, more than 37,000 jobs, internships and work experience opportunities are promoted on the myUCLCareers portal. Through UCL Talent Bank, we can connect you directly to small-to-medium-sized employers who are actively recruiting UCL graduates.

We also run employer-led skills sessions in areas such as leadership, negotiation and interview skills; workshops and advice sessions to help with your applications; and dedicated internship programmes.

Our services are still available up to three years after you leave.

**Career destinations of UCL graduates 15 months after graduation**

This shows the first career destinations of UK/EU students 15 months after their graduation from UCL in 2020. The median starting salary of those graduates in full-time work is £31,500.

*All data taken from the Graduate Outcomes survey undertaken by the Higher Education Statistics Agency (HESA), looking at the destinations of UK and EU graduates in the 2019/20 cohort.

^ ‘Other’ represents a grouping of activities in which personal circumstances or choice has influenced the graduate’s immediate options, this includes those: travelling (e.g. taking a gap year); looking after the home or family/temporarily sick or unable to work; not employed but not looking for employment, further study or training; permanently unable to work or retired.
Faculty of Arts and Humanities

The Bartlett Faculty of the Built Environment

Faculty of Brain Sciences

IOE, Faculty of Education and Society

Faculty of Engineering Sciences

Faculty of Laws

Faculty of Life Sciences

Faculty of Mathematical and Physical Sciences

Faculty of Medical Sciences

Faculty of Population Health Sciences

Faculty of Social and Historical Sciences

School of Slavonic and East European Studies (SSEES)
Our world-leading faculties

UCL is split into several faculties. Whichever programme you choose, you’ll be surrounded by fellow curious minds, learn from world-class academics and benefit from outstanding facilities. We provide a place to belong, be yourself and realise your potential.

Discover more about each faculty over the following pages.
Faculty of Arts and Humanities

Our faculty spans traditional humanities and the creative arts: Arts and Sciences (Liberal Arts), English, European and International Social and Political Studies, Fine Art, Greek and Latin (Classics), Hebrew and Jewish Studies, Information Studies, Modern Languages and Philosophy.

- UCL’s arts and humanities are ranked sixth in the world* and our nine departments offer more than 200 distinctive undergraduate degree programmes.
- Students have access to London’s vast range of cultural organisations, including the British Library, British Museum, the National Gallery, the British Film Institute and the Tate galleries.
- The faculty’s progressive approach to teaching and research is rooted in a vibrant, supportive and enabling community. We bring together over 20 languages to offer the widest range of language and language-related degrees in the UK.

* Times Higher Education World University Rankings by Subject 2023

You can find our programmes in:
- Arts and Sciences p58
- Economics, Geography, Politics and Social Sciences p64
- English and Comparative Literature p69
- Fine Art and Art History p70
- Historical and Philosophical Studies p71
- Languages and Cultural Studies p73
The Bartlett Faculty of the Built Environment

Whether your ambition is to design better buildings, plan better cities, build sustainable communities, or help meet the challenge of climate change, the Bartlett could help you realise it.

- The Bartlett is the UK’s largest multidisciplinary faculty of the built environment; it is ranked first in the UK and third in the world for Architecture/Built Environment.*
- Located in London, with a wealth of urban history on our doorstep, we are proud to collaborate with leading institutions from industry, government and beyond.
- The Bartlett Promise helps to tackle the lack of diversity within the built environment by providing full funding and additional support for students from under-represented groups.

* QS World University Rankings by Subject 2022

You can find our programmes in:
- Architecture, Construction and Planning p56
Faculty of Brain Sciences

A global leader in research and education into the mind and brain, we use our expertise to solve some of the world’s greatest health challenges, transforming society by reducing the burden of disease.

- UCL’s Faculty of Brain Sciences is best in the UK for neuroscience, psychiatry and psychology, with more than two thirds of our research in these areas rated as world-leading (4*). *
- We are home to some of the world’s most influential and creative researchers in the field of brain sciences: 20 of our faculty’s professors are named among the most influential in the world. ^
- UCL is first in Europe and second in the world for neuroscience and behaviour studies. **

* Research Excellence Framework (2021)

You can find our programmes in:
- Medicine and Allied Subjects p81
- Psychology and Language Sciences p85
Our research improves lives, from our study of early years education that has shaped policy around the world, to our collaborations with autistic people to translate research into action and our work with the United Nations to help address gender-based violence.

Students are our most important collaborators. New ideas and new research are given meaning through your real-life experiences. Our graduates go on to influence future generations for the better, from individual lives to societal change.

Whether in education or research, our work helps us to understand how and why people are different, what challenges this presents and what we can do to create a fairer, more just and more equitable society.

* QS World University Rankings by Subject 2014–2022
Faculty of Engineering Sciences

UCL founded the world’s first laboratory devoted to engineering education more than 180 years ago and is now home to some of the most successful engineering departments in the UK. Our engineers deal with a vast range of challenges, creating solutions that change the world.

- Our engineers have been at the forefront of the response to the COVID-19 pandemic, working with clinicians from UCLH and Mercedes-AMG High Performance Powertrains to produce Continuous Positive Airway Pressure (CPAP) breathing aids for patients. These devices are now saving lives in more than 30 countries.
- We work closely with industry and have strong links with, among others, Arup, Cisco, GSK, Google, Microsoft and Rolls Royce.
- Our How to Change the World training programme (run with major governmental, NGO and industrial partners) equips our young engineers with the creative and technical skills to solve pressing 21st-century challenges.

You can find our programmes in:
- Business and Management Studies p62
- Computer Science p63
- Economics, Geography, Politics and Social Sciences p64
- Engineering p67
- Physical Sciences p83
Faculty of Laws

UCL Laws is an inclusive law school for the world: a diverse and radical community of academics, researchers, students and alumni embedded in a leading research-oriented university.

– Eliza Orme (1848–1937) became the first woman in England to earn a law degree when she graduated from UCL Laws in 1888.
– UCL Laws students make a valuable contribution to society by taking part in voluntary projects. For example, through the UCL Centre for Access to Justice they offer free legal services to those otherwise unable to afford them.
– UCL Laws is consistently listed as one of the top law schools in rankings, including third in the UK.*

* The Complete University Guide Subject League Tables 2023

You can find our programmes in:
– Law p77
Faculty of Life Sciences

UCL Life Sciences offers an outstanding portfolio of programmes in biological and biomedical sciences, neuroscience, pharmacy, pharmacological and pharmaceutical sciences – studied in state-of-the-art facilities with world-renowned researchers and clinicians.

- Our world-class research institutes include the Centre for Biodiversity and Environment Research, the Institute for Healthy Ageing and the Sainsbury Wellcome Centre for Neural Circuits and Behaviour.
- UCL Life Sciences staff and students are actively engaged in research and innovation in global biodiversity, health, disease and pharmaceutics. Recent student entrepreneurs were awarded the Hult Prize, worth $1 million, for developing a sustainable and cost-saving approach to rice production.
- Associated with nine Nobel Prize winners over the years, today UCL Life Sciences continues to change the way we understand the world from the challenges of environmental change to the 3D printing of pharmaceuticals.

You can find our programmes in:
- Biological and Life Sciences p60
- Medicine and Allied Subjects p81
Faculty of Mathematical and Physical Sciences

The faculty encompasses the logical, experimental and mathematical study of our universe. Frontline research feeds directly into our teaching programmes, and our students benefit from access to outstanding facilities.

- Our departments rank in the top 10 for the Mathematical and Physical Sciences in the UK.*
- Our students and academics have been part of exciting discoveries, including new supernovas, water on habitable planets and the first images of a black hole.
- We are proud to count Dame Kathleen Lonsdale, UCL scientist, Quaker and pacifist, as one of our inspiring alumni. She conducted ground-breaking research in crystallography and in 1945 was one of the first women ever to be elected a Fellow of the Royal Society.

* QS World University Rankings by Subject 2022

You can find our programmes in:
- Economics, Geography, Politics and Social Sciences p64
- Historical and Philosophical Studies p71
- Mathematics and Statistics p78
- Physical Sciences (Chemistry, Earth Sciences, Natural Sciences, Physics and Astronomy) p83
Faculty of Medical Sciences

We are at the forefront of fighting the world’s biggest health problems. You could be the breakthrough. Our range of flexible programmes could kick-start your career in medicine, innovation, pharmaceuticals or public health.

- UCL is ranked number one in London and seventh in the world for medicine.*
- UCL’s MBBS is internationally renowned and our six innovative BSc programmes are tailored to the needs of our changing world, equipping students with the skills and knowledge to kick start a career in a wide range of fields, including medicine, innovation and enterprise, research, pharmaceuticals or public health.
- Our pioneering research, leading academics and clinicians, cutting-edge facilities and outstanding partner hospitals and institutions create an unrivalled environment for medical sciences teaching and learning.

* QS World University Rankings by Subject 2022

You can find our programmes in:
- Biological and Life Sciences p60
- Medicine and Allied Subjects p81
Faculty of Population Health Sciences

Population Health Sciences studies the factors that shape our health, including the social and physical environment, the way we live, healthcare systems and our genes. Our graduates are equipped to improve health equity locally and globally, wherever they are in the world.

- Our Population Health Sciences degrees will enable you to work with big data to answer important questions on the obesity epidemic, population ageing, epigenetics and many more.
- UCL is ranked seventh in the world for public health* and we are the top-rated university in the Russell Group for research in medicine, health and life sciences. ^
- Our researchers take a prominent role in advancing public knowledge about infectious diseases. Working across disciplines, they have researched the effects of COVID-19 on UK and global populations in terms of transmission and genotyping, as well as impacts on BAME communities and other socially excluded groups.
- We collaborate with world-renowned institutions including the World Health Organization, the NHS, Great Ormond Street Hospital and the Wellcome Trust.

* Shanghai Ranking Global Ranking of Academics Subjects 2022
^ Research Excellence Framework 2021

You can find our programmes in:
- Medicine and Allied Subjects p81
Faculty of Social and Historical Sciences

Our departments and institutes – Anthropology, Archaeology, the Americas, Economics, Geography, History, History of Art and Political Science – explore the social, political, economic, cultural and environmental processes that shape our world.

- We are intellectually diverse and world leading, with our social sciences subjects ranked 14th in the world.*
- Our academics develop cutting-edge, cross-disciplinary research and education that has positive, real-world impact. We’ll challenge you to think in new ways, engage critically with global issues and look for creative solutions.
- Our students have unrivalled access to world-leading resources nearby, including the British Library, British Museum, the Wellcome Collection and the Warburg Institute, as well as state-of-the-art laboratories on campus.
- We’re proud that 85% of our graduates go into graduate level work or higher study in a variety of sectors, including financial services, consultancy, the creative arts and law.^

* Times Higher Education World University Rankings by Subject 2023
^

School of Slavonic and East European Studies (SSEES)

UCL SSEES offers a unique range of flexible programmes – in Business, Culture, Economics, History, Languages, Politics and Sociology – focused on Russia, the Baltics, Central, Eastern and South-Eastern Europe.

- We are a multidisciplinary centre of expertise offering insight into key issues affecting the region – for example, the war in Ukraine; emerging markets; and the rise of populism.
- Students have the chance to learn one of the region’s 10 languages and study abroad at a partner university.
- We have an extensive public events series and regularly host ambassadors, political figures and notable speakers, such as journalist Terrell Jermaine Starr and economist Thomas Piketty.
- The SSEES Library is renowned for its specialist collections, including a vast array of films and documentaries from Central and Eastern Europe and Russia.

You can find our programmes in:
- Economics, Geography, Politics and Social Sciences p64
- Historical and Philosophical Studies p71
- Languages and Cultural Studies p73

- Geophysics BSc/MSci
- Natural Sciences BSc/MSci
- Physics with Medical Physics BSc

Love Mathematics? Study...
- Civil Engineering BEng/MEng
- Computer Science BSc/MEng
- Mathematical Computation MEng
- Robotics and Artificial Intelligence MEng
- Sustainable Built Environments, Energy and Resources BSc/MEng
- Social Sciences with Data Science BSc

Love both arts and science subjects? Study...
- Arts and Sciences BASc
- Information in Society BSc
We’re the Bartlett, UCL’s Faculty of the Built Environment. We work with students from around the world to imagine, plan, design and create a better built environment.

Studying with us at the Bartlett is about the bigger picture. It’s about excelling at an individual discipline within the context of many others and discovering specialisms, themes and passions that take you where you want to be. Whether your ambition is to design better buildings, plan better cities, build sustainable communities or help meet the challenge of climate change, our programmes could be a big step towards it.

First career destinations:
- Architects
- CAD, drawing and architectural technicians
- Chartered architectural technologists, planning officers and consultants
- Chartered surveyors
- Construction project managers and related professionals

Related programmes can be found in:
- Economics, Geography, Politics and Social Sciences p64
- Engineering p67

Did you know?
UCL is ranked first in the UK for architecture and the built environment.

Key: 🌐 Study abroad 🔗 Placement or internship opportunity 📒 Accreditation See p87 for explanation of symbols
UCL’s liberal Arts and Sciences (BASc) degrees are unlike any other in the UK. They provide enormous flexibility, allowing you to create a bespoke programme incorporating arts, social sciences and science subjects.

You’ll choose a major and a minor route, one from Cultures/Societies and one from Health and Environment/Sciences and Engineering. You’ll also study a language, plus ‘core courses’ specially designed to help you make links between different subject areas and provide you with the tools necessary for interdisciplinary study. An optional internship at the end of the second year will help to prepare you for the world of work. Innovative methods of teaching and assessment include flipped lectures, vlogs, blogs and presentations.

First career destinations:
- Authors, writers and translators
- Business and related research professionals
- IT managers
- Marketing associate professionals
- Programmers and software development professionals

Entry requirements:
Programme-specific entry requirements (including contextual offers and other qualifications) can be found at: ‘ucl.ac.uk/prospectus’ or scan the QR code.

Routes with broad areas of study:

Students can select one major route from the list below. If you choose an Arts major route you will then choose a Science minor route, and vice versa if you choose a Science major route.

**Art routes**

**Cultures**
- Anthropology
- Creative Writing
- Cultural Studies
- Design and Visualisation
- Drawing Methodology
- Film and Documentary
- Film-making
- History of Art
- Languages
- Literature
- Philosophy

**Societies**
- Archaeology
- Economics
- Geography
- History
- International Relations
- Law
- Management
- Philosophy
- Political Economy
- Politics
- Sociology

**Science routes**

**Health and Environment**
- Anthropology
- Biochemistry
- Biological Sciences
- Biomedicine
- Environmental Sciences
- Geography
- Geology
- Neuroscience
- Pharmacology
- Psychology

**Sciences and Engineering**
- Chemistry
- Computer Science
- Earth Sciences
- Economics
- Engineering
- Mathematics
- Physics
- Statistics
At UCL our research in the biological and life sciences spans an incredible breadth of scientific areas. From understanding the functioning of the brain through to structural, molecular, cell and developmental biology, genetics, biochemistry, pharmacology, ecology and biodiversity, we are finding answers to some of the most important and urgent problems facing humans and other animals. All our academic researchers are active teachers and educators. You can choose one of our broad entry programmes such as Biological or Biomedical Sciences, or focus your studies in a specialist degree.

**First career destinations:**
- Biochemists and biomedical scientists
- Biological scientists
- Marketing associate professionals
- Laboratory technicians
- Research and development managers

**Related programmes can be found in:**
- Arts and Sciences p58
- Medicine and Allied Subjects p81
- Physical Sciences p83

---

**Did you know?**

UCL is ranked third in the UK for life sciences and medicine.

Business and Management Studies

The UCL School of Management is developing entrepreneurial leaders for the next generation of data-driven, technology-intensive organisations.

Our programmes are developed in consultation with industry, with your future career in mind. On graduation, you will have strong leadership and communication skills and the ability to work flexibly, creatively and internationally in a range of areas, including banking and financial companies, consulting and tech. We offer exceptional support to our students in their search for a career, as well as a range of placement or internship options to give you hands-on experience to complement your study.

First career destinations:
- Finance and investment analysts and advisers
- IT business analysts, architects and systems designers
- Management consultants and business analysts
- Programmers and software development professionals

Related programmes can be found in:
- Computer Science p63
- Engineering p67

Computer Science

Studying computer science develops analytical and problem-solving skills fundamental to a huge range of careers in computing and beyond.

Our degrees, many taught by world-leading researchers, provide a solid foundation in an ever-changing field. Teaching combines theory and practical sessions, with an emphasis on solving real-world problems. We collaborate with global computer companies, as well as financial, health and other sectors, via our pioneering industrial collaboration programme UCL IXN, to give you industry project experience and develop your team-working skills throughout your degree.

First career destinations:
- Cyber security professionals
- Information technology professionals
- IT business analysts, architects and system designers
- Programmers and software development professionals

Engineering

Engineers use insights and discoveries from across the academic spectrum to develop products and processes that truly change the world.

From vaccine manufacturing, designing ships and the distribution of sustainable energy, engineers solve problems for the good of humanity. Throughout your degree, you’ll learn the fundamentals of engineering with a focus on cross-team working, real-world scenarios and developing professional skills. Whichever discipline you choose to specialise in, you’ll be ready to make an impact in the world from the moment that you graduate.

First career destinations:
- Data analysts
- Engineering professionals
- Finance and investment analysts and advisers
- Management consultants and business analysts
- Programmers and software development professionals

Related programmes can be found in:
- Architecture, Construction and Planning p56
- Business and Management Studies p62
- Economics, Geography, Politics and Social Sciences p64

Did you know?
Sir Charles Kao (Electronic and Electrical Engineering) won the Nobel Prize in 2009 for his work on low loss optical fibres and their application to global communication systems.

English and Comparative Literature

With one of the most enduring and respected English departments in the country and an exceptional range of modern and ancient languages and interdisciplinary humanities on offer, UCL provides a stimulating environment for the study of literature and the creative arts.

Entry requirements:
Programme-specific entry requirements (including contextual offers and other qualifications) can be found at: ‘ucl.ac.uk/prospectus’ or scan the QR code.

Our degrees require you to undertake careful critical and creative reading, reflection and writing. We aim to develop your analytical and interpretative skills, allowing you to develop a sensitivity to subtext and context. Our new Creative Arts and Humanities BA – the first of its kind in the UK – is unique in bringing together creative writing, moving image and performance.

First career destinations:
- Arts officers, producers and directors
- Marketing associate professionals
- Record clerks and assistants
- Secondary education teaching professionals

Related programmes can be found in:
- Arts and Sciences p58
- Economics, Geography, Politics and Social Sciences p64
- Historical and Philosophical Studies p71
- Languages and Cultural Studies p73

## Fine Art and Art History

Whether you’re a practitioner or a theorist, a creator or a critic, UCL offers outstanding staff, facilities and expertise across a variety of degree programmes in the prestigious Slade School of Fine Art and Department of History of Art.

A world-leading centre of scholarship in the history, practice and theory of art, our central location in London gives you easy access to national collections such as the Tate and National Gallery and a wealth of specialist and independent galleries and collections, not to mention UCL’s own museums and collections, to inform and enrich your learning.

### First career destinations:
- Archivists and curators
- Arts officers, producers and directors
- Design occupations
- Marketing associate professionals

### Related programmes can be found in:
- Arts and Sciences p58
- Economics, Geography, Politics and Social Sciences p64

Historical and Philosophical Studies

This wide-ranging subject area covers everything from the history of the world, the ideas of philosophers – ancient and modern – and practical and analytical techniques for discovering how our ancestors lived.

Students on these degrees develop strong research and analytical skills and a sensitivity to different cultures and ideas. They learn to communicate effectively verbally, visually and in writing to diverse audiences. Studying these subjects could lead to careers in government, international agencies and non-governmental organisations (NGOs), consultancy (economic, political risk, security, marketing), financial services, law, media, teaching, heritage and museums, as well as academia.

First career destinations:
- Business and related research professionals
- Chartered and certified accountants
- Finance and investment analysts and advisers
- Public relations professionals

Languages and Cultural Studies

UCL offers a remarkable range of languages and associated cultural studies, including art, film, history, literature and linguistics, philology, philosophy and politics.

A degree in this area equips students with skills much sought after by employers, such as the ability to speak, understand and write in a foreign language; intercultural understanding; translation and communication skills; and critical and analytical rigour. You may choose languages that you have studied before or start others from scratch, depending on the programme. The year abroad, integral to most degrees, allows you to immerse yourself in another culture at one of our prestigious overseas partner institutions.

First career destinations:
- Arts officers, producers and directors
- Business and related research professionals
- Chartered and certified accountants
- Human resources and industrial relations officers
- Marketing associate professionals

Related programmes can be found in:
- Arts and Sciences p58
- Economics, Geography, Politics and Social Sciences p64
- English and Comparative Literature p69
- Fine Art and Art History p70
- Historical and Philosophical Studies p71

Did you know?
Languages offered to UCL students include Dutch, Finnish, Hindi, Hungarian, Italian, Mandarin, Norwegian, Yiddish and Ukrainian.
Did you know?

English war correspondent Clare Hollingworth, the first to report on the Nazi invasion of Poland that triggered the Second World War, attended UCL’s School of Slavonic and Eastern European Studies in the 1930s.

Modern language combinations

This grid shows the range of languages that can be combined (subject to entry requirements and availability) to create a four-year degree programme. The final degree awarded on completion will reflect whatever combination you choose, for example, Bulgarian and French BA, Italian and Spanish BA.

You can combine the study of two languages on an equal basis; either two languages that you have already studied, or one language at beginner’s level alongside one you already know.

French and Spanish are not available at beginner’s level within these combinations. If you wish to study French or Spanish from beginner’s level, you can apply for the Language and Culture BA (see below), where they are available as minor languages.

For most combinations, it is also possible to study two languages from beginner’s level if you have an A level (or equivalent) in any modern foreign language.

If you wish to combine two Scandinavian languages, please see the Scandinavian Studies BA (see p75) or Icelandic BA (see p75).

For guidance on how to apply, as well as the UCAS code for each language combination, please see: ucl.ac.uk/prospectus.

Entry requirements:

Programme-specific entry requirements (including contextual offers and other qualifications) can be found at: ‘ucl.ac.uk/prospectus’ or scan the QR code.

See p87 for explanation of symbols.
UCL Laws is consistently ranked as one of the UK’s top law schools, recognised for the quality of its teaching by both students and the legal profession.

Through lectures, seminars and small group tutorial teaching, you can explore the principles of law and understand its role in governing the relations between the individual, the state, and society. You will be encouraged to develop a critical understanding of how the law works and how it can be changed. Students benefit from specialist career support and can choose to participate in an array of activities, including mooting, pro-bono opportunities and an exciting and varied events programme, organised in conjunction with the Student Law Society.

First career destinations:
- Barristers and judges
- Legal professionals
- Management consultants and business analysts
- Social and humanities scientists
- Solicitors and lawyers

Mathematics and Statistics

So many activities and industries – engineering and science, business and finance, data science and computing – depend, in large part, on mathematical and statistical insights.

Our programmes will encourage you to develop your imagination and critical thinking abilities. They will enhance your ability to think strategically and argue clearly. You will gain advanced quantitative and computing skills, as well as honing your logical, analytical and problem-solving abilities, giving you a wealth of options for your future career. Our graduates go into a diverse array of careers and a large proportion go on to further study in both theoretical and applied fields.

First career destinations:

- Actuaries, economists and statisticians
- Chartered and certified accountants
- Data analysts
- Finance and investment analysts and advisers
- Management consultants and business analysts

Related programmes can be found in:

- Arts and Sciences p58
- Computer Science p63
- Economics, Geography, Politics and Social Sciences p64
- Engineering p67
- Historical and Philosophical Studies p71
- Physical Sciences p83

Media

UCL's Media degree sets the benchmark for ambitious future media professionals, combining the highest standards of academic and critical rigour with media practice and state-of-the-art professional skills and providing the opportunity to take up a work placement that draws on London’s rich media environment.

You will benefit from world-class research in the media field, and will gain an understanding of the exhilarating possibilities of the digital era: how the media is made, how it is experienced, how it functions in your world, and how it offers you expressive opportunities. You will reach an advanced level in film-making or in digital game and interactive media, or both: two of the most important media forms for the UK economy. You will develop your own projects using brand-new, cutting-edge media studios and will exhibit your work in the end-of-degree show.

First career destinations:
The first cohort of students admitted to the Media BA are not due to graduate until 2024. Therefore, no first career destinations for students on this programme are currently available.

Medicine and Allied Subjects

Understanding human health, the causes of and contributors to disease and the treatment of disease, is fundamental to our society. It necessitates study across human biology, medicine and the social sciences, requires creativity and is intellectually demanding.

Our degrees provide a host of options for careers across medicine and the biomedical sciences, including life as a doctor, research scientist, audiologist, pharmacist or a variety of other fulfilling science- or medicine-related professions. Our graduates will have a robust and fundamentally transferable skill set of critical analysis, data interpretation, communication and independent thinking.

First career destinations:
- Biological scientists
- Generalist medical practitioners
- Health services and public health managers and directors
- Laboratory technicians
- Pharmacists

Physical Sciences

This area covers the natural sciences linked to the study of non-living systems, forces and properties of the cosmos – from molecules to galaxy clusters, from the Earth’s core to the edge of the observable universe.

Study in these areas is renowned for developing highly sought-after analytical skills, the ability to undertake field and laboratory research and an understanding of mathematics and the principles and techniques of your chosen subject. A scientific training also equips you with practical transferable skills in rational argument and problem-solving, perfect for careers in areas such as research, design, development, computing, finance, planning and teaching.

➤ First career destinations:
- Actuaries, economists and statisticians
- Chemical scientists
- Finance and investment analysts and advisers
- Management consultants and business analysts
- Physical scientists
- Programmers and software development professionals

**Did you know?**

In 2019, UCL researchers detected water vapour in the atmosphere of a super-Earth with habitable temperatures in a world first.
Psychology and Language Sciences

UCL is a world leader in research and teaching of mind, behaviour and language.

Our researchers cover a range of disciplines such as cognition, neuroscience, linguistics, education, communication, neurological disorders, mental health, phonetics and development across the human lifespan. You will have the chance to acquire quantitative and qualitative skills by critically evaluating research data and conducting your own research studies. In addition to subject-specific skills you will also develop a range of highly transferable skills including problem-solving, communication, data analysis, writing for different audiences and critical thinking, that are essential for a range of graduate careers, which could include law, computing, healthcare, marketing, commerce and industry.

First career destinations:
- Biochemists and biomedical scientists
- Business and related research professionals
- Educational support assistants
- Psychologists
- Therapy professionals

Related programmes can be found in:

- 🗄 Placement or internship opportunity
- 🎓 Accreditation

See p87 for explanation of symbols
Programme symbols

Throughout the programme pages we’ve used the following symbols:

➢ First career destinations
This shows a selection of first career destinations for programmes in the section, taken from the Graduate Outcomes survey carried out by the Higher Education Statistics Agency (HESA) for 2019/20. The survey looks at what UK/EU graduates have gone on to do approximately 15 months after graduating from UCL.

➢ Related programmes
Many of our degrees are interdisciplinary, working across two or more subject areas – so it’s possible that you’ll find programmes of interest in more than one section. We have indicated where there are overlaps so you can see the full choice of programmes available to you.

✈ Study abroad
Programmes with study abroad as an integral part of the curriculum – for example, programmes in the Languages section – are marked with this symbol. Please note that you may also choose to study abroad as an option within many other programmes too.

❖ Placement or internship opportunity
This symbol indicates programmes where a placement or internship opportunity is an integral part of the curriculum – for example, the Pharmacy MPharm. Please note that many other programmes also offer optional placements or internships.

🌍 Accreditation
Many degrees are accredited by professional bodies, meaning that when you graduate you will either be eligible for membership, or will have fulfilled the academic requirements for membership, of the accrediting body. Our Law programmes are compliant with the QAA Subject Benchmark Statement for Law and contain the Foundations of Legal Knowledge. Completion of the Medicine MBBS BSc enables provisional General Medical Council (GMC) registration.

Please note:
Location is where the majority of teaching for each programme is delivered.

Choosing your university is a big decision

We know that the process can be daunting, so we’ve tried to make the information on the following pages as straightforward as possible. We’ve also provided details of where you can find more help and advice.
We’re seeking the brightest minds to join the UCL community and you must satisfy our specific entry requirements to study here.

For A levels, UCL typically makes offers in the range of A*A*A-ABB. For all programmes, you must have at least two A levels from our list of preferred subjects.

Please note that we do not consider General Studies or Critical Thinking to meet the entry requirements for any of our programmes.

As well as A levels, we accept a wide range of other UK and overseas qualifications, for which requirements will be listed under each individual programme in the online Prospectus.

Please note that for some programmes there may be additional admissions tests that will need to be taken. These will be indicated on the programme page in the online Prospectus.

If you are not a national of a majority English speaking country (as defined by the UK Visas and Immigration, Home Office) you must provide recent evidence of your English proficiency. The English language requirements for each programme are shown on the relevant page in the online Prospectus.

For more information about entry requirements (including GCSE requirements which vary across undergraduate programmes), accepted qualifications and English language requirements, see the QR code above.

Access UCL – contextual offer

As part of our commitment to increasing participation from underrepresented groups, students may be eligible for a contextual offer as part of the Access UCL scheme. The contextual offer will be a lower offer than the standard UCL offer and is listed under each programme on the online Prospectus page. For more information on eligibility criteria for the Access UCL scheme, visit: ucl.ac.uk/prospective-students/undergraduate/access-ucl-scheme

Engineering Foundation Year

The Engineering Foundation Year at UCL is for UK-based people who aspire to become an engineer but do not meet the standard entry requirements for UCL’s undergraduate engineering degrees.

To be eligible to apply, you must be attending or have attended a UK state school for your Level 3 qualifications (unless you have refugee status) and live in an area that has a high level of financial, social or economic deprivation, or low progression to higher education. For more information on eligibility criteria for the Engineering Foundation Year programme, visit: ucl.ac.uk/prospective-students/undergraduate/degrees/engineering-foundation-year
How to apply

If you’re inspired by what we offer, and meet our entry requirements, we look forward to reading your application. Here’s what you need to do.

1. Find your degree programme

It’s important to research the degree programmes and universities that interest you before you make your choices. You can find out detailed information about each of our programmes by visiting ucl.ac.uk/prospectus. You could also attend one of our Open Days, see ucl.ac.uk/openday.

2. Apply online

Undergraduate applications to UCL are made through UCAS. Our UCAS code is UCL U80; there is no campus code. Advice on completing your application, including fees, is on the UCAS website: ucas.com

For more information about the application process including deadlines, please see the QR code above.

3. Considering your application

For more information on how we assess applications and when we will respond, please see the QR code above.

The selection criteria may vary across programmes at UCL. Each programme page on the online prospectus will have specific selection criteria including information about interviews, selection events or open days (if relevant).

Admission to UCL

We strive to admit the academically brightest students to UCL, regardless of background – those who are enthusiastic and passionate about learning, and who will make a positive contribution to university life and gain the most from their years of study here. In fact, UCL was founded to open up education in England for the first time to those who had been excluded from it. That commitment remains as strong today as it was back in 1826.

Our Equality, Diversity and Inclusion Policy and Strategy underlies every aspect of our student selection process. We want to admit excellent students who are likely to complete their degree programme successfully and derive benefit from it, regardless of age, disability, ethnic origin, gender identity, marital status, sex, sexual orientation, number of dependants and religious or political beliefs. We positively encourage and welcome applications from members of underrepresented groups at UCL.

UCL’s Access and Participation Plan (ucl.ac.uk/access) outlines our commitment to widening participation at UCL, including the Access UCL scheme – see QR code above.

Visa requirements

If you think you may require a visa to study in the UK, you should visit ucl.ac.uk/students/immigration-and-visas. This provides more information about the types of visa, application processes and our requirements.
Our fees can vary depending on the modules you choose and your country of origin. Please take the time to familiarise yourself with the information below.

**Tuition fees**

UCL’s annual tuition fee covers all elements of your tuition, registration and examination (field courses are not included). However, optional modules taken elsewhere in the University of London may attract an additional fee. Fees for accommodation are charged separately. UCL offers several ‘Dual Degree’ programmes where students spend half of their degree studying at UCL and the other half at a university overseas (these are distinct from Year Abroad or International programmes). In these cases, fees are payable to UCL for the time spent studying at UCL, and to the other host university for the time spent there. More details of these can be found at: [ucl.ac.uk/prospectus](http://ucl.ac.uk/prospectus).

Please note that the information on this page applies to the 2023/24 academic year. Fees for 2024 entry will be published on the UCL Students website ([ucl.ac.uk/students/fees-and-funding](http://ucl.ac.uk/students/fees-and-funding)) as soon as they are available.

### How tuition fees are classified

The level of fee will depend upon whether you’re classed as a UK, Overseas or Islands student. You may already know into which category you fall but this will be confirmed if you are offered a place at UCL.

### Tuition fees for UK students

UK undergraduate fees are currently (February 2023) set at £9,250 for UK students for the first year of study. Fees for UK undergraduates have been frozen at £9,250 for 2023–24 and 2024–25, but may be subject to increase for the year commencing 2025 and for each year of study thereafter.

UCL reserves the right to increase its fees in line with government policy (including on an annual basis during the programme). You are not required to pay upfront fees. You can apply to the Student Loans Company for a Tuition Fee Loan and your fees will be paid directly to UCL on your behalf. Loan repayments are only made once you have left university and are earning over £25,000 per year. Please see [gov.uk/student-finance](http://gov.uk/student-finance) for further information.

### Tuition fees for overseas students

For 2023 entry, UCL’s tuition fees for overseas students range between £24,200 and £47,000 per year. The vast majority of our undergraduate programmes charge a fixed fee every year for overseas students (Medicine MBBS is an exception) and these won’t change during your time with us, so you know upfront exactly how much you’ll need to pay.

### Note for EU students: UK withdrawal from the European Union (EU)

The UK has now formally left the EU. Students from the EU, EEA and Switzerland who start their programme of study in 2022 or later will no longer be eligible for the UK (Home) fee status and will pay fees at the overseas rate.

Please visit our dedicated website [ucl.ac.uk/brexit](http://ucl.ac.uk/brexit) to read more about UCL and Brexit.
Sources of funding

University is an investment in your future. Depending on your circumstances, there are many sources of financial support to make higher education more accessible.

Sources of funding for UK students

- **Maintenance Loan from the Student Loans Company** – see [gov.uk/student-finance](https://gov.uk/student-finance)
  
  For students from Scotland, Wales or Northern Ireland, there is a different process and funding package available:
  - Scotland – see [saas.gov.uk](http://saas.gov.uk)
  - Wales – see [studentfinancewales.co.uk](http://studentfinancewales.co.uk)
  - Northern Ireland – see [studentfinanceni.co.uk](http://studentfinanceni.co.uk)

  If you live in the Channel Islands or Isle of Man please contact your education authority for funding information.

- **UCL Undergraduate Bursary** – this is a means-tested bursary of up to £3,000 per year – see [ucl.ac.uk/scholarships](http://ucl.ac.uk/scholarships)

- **UCL Scholarships** – we have a range of schemes available each year based on financial need and/or academic merit – see [ucl.ac.uk/scholarships](http://ucl.ac.uk/scholarships)

- **Care Leaver and Estranged Student Bursary**, aimed at students who are care experienced or estranged from parent(s) – see [ucl.ac.uk/care-leavers](http://ucl.ac.uk/care-leavers)

- **Disabled Students’ Allowance** – see [gov.uk/disabled-students-allowances-dsas](http://gov.uk/disabled-students-allowances-dsas)

- **Students with dependants** – see [gov.uk/student-finance额外帮助](http://gov.uk/student-finance额外帮助)

- **Employment** – there are plenty of opportunities to find varied and reasonably paid part-time work in London. UCL Careers and the Students’ Union list opportunities on their websites.

Note for EU students: UK withdrawal from the European Union (EU)

The UK has now formally left the EU. Students covered by the EU Withdrawal Agreement may be able to access Tuition Fee Loans and Maintenance loans, depending on their status under the EU Settlement Scheme and their residency. See [ucl.ac.uk/scholarships](http://ucl.ac.uk/scholarships) for more details.

Sources of funding for overseas students

- **UCL Scholarships** – we have a range of schemes available – see [ucl.ac.uk/scholarships](http://ucl.ac.uk/scholarships)

- **External funding** – external (non-UCL) organisations also offer funding support – see [ucl.ac.uk/scholarships/external-funding](http://ucl.ac.uk/scholarships/external-funding) for examples.

- **Tuition Fee Loan and help with living costs for EU students** – you may be able to get a Tuition Fee Loan and help with living costs if you’re from an EU country, Iceland, Liechtenstein, Norway or Switzerland – see [gov.uk/student-finance/eu-students](http://gov.uk/student-finance/eu-students) for more details.

- **Employment** – international students who require a visa or prior entry clearance are normally permitted to work for up to 20 hours per week during term time and full-time in the vacations. This restriction applies to voluntary as well as to paid employment – see [ukcisa.org.uk](http://ukcisa.org.uk) for more information.

If you have financial problems during your degree

The UCL Financial Assistance Fund may be able to help if you experience unexpected financial hardship during your degree; there is also an emergency loan scheme for students whose funding has been delayed. Eligibility requirements apply – see [ucl.ac.uk/students/funding/financial-support](http://ucl.ac.uk/students/funding/financial-support) for more details.

For further information

A good starting point for further information about student finance is [gov.uk/student-finance](http://gov.uk/student-finance) if you’re a UK student, or your local Ministry of Education if you’re an overseas student.

You can find out more about UCL fees and funding – see [ucl.ac.uk/students/fees-and-funding](http://ucl.ac.uk/students/fees-and-funding)

Your living expenses

Living costs may vary greatly from student to student, depending on individual needs and lifestyle. To guide you, UCL has estimations of how much students might spend on living costs – see [ucl.ac.uk/scholarships/how-much-does-it-cost-study-ucl](http://ucl.ac.uk/scholarships/how-much-does-it-cost-study-ucl)

Additional costs on some degree programmes

Students on certain degree programmes will incur costs in addition to their tuition fees; for example, for materials or books, or costs related to carrying out fieldwork. For full details about possible additional expenses, contact the department that provides the programme.
Food and accommodation are one of the biggest costs of studying at university, so you need to choose your options carefully to suit your needs and budget.

All the information you need about the application process and details of all our accommodation can be found online (see QR code, above). The majority of the accommodation available is managed by UCL. Some accommodation is managed by partners such as the University of London or private operators.

What you get and what it might cost

The fees you pay vary depending on location and facilities. All of our accommodation fees include room rental and the following:

- Use of communal areas
- Maintenance within your Hall
- Cleaning of shared bathrooms, kitchens and communal areas
- Utility charges, including Wi-Fi
- Basic contents insurance
- 24/7 support.

Additionally, when you move into UCL accommodation, you will become a part of a vibrant UCL community led by residents.

Each of our sites has experienced and knowledgeable managers, hall teams and Student Residence Advisers (SRAs) available to help you throughout your time in UCL accommodation. Their responsibilities range from wellbeing to out-of-hours support, ensuring you have an exceptional student experience. All of our accommodation has secure access, as your security and wellbeing is our main priority.

The most up to date information about the pricing of our accommodation and the rooms available can be found online (see QR code, above). We aim to keep our costs as low as possible within the constraints of rising utilities bills and the general cost of living.

Fees for UCL accommodation are updated yearly and appear online as soon as they are set. Fees for halls operated by the University of London are set in the spring of the year of entry.

Find out more at ucl.ac.uk/accommodation or halls.london.ac.uk/accommodation

After your first year

Most students look for privately rented accommodation in year two and beyond, often sharing with friends.

UCL partners with other providers such as University of London and private operators, that offer alternative accommodation available for returning students, the majority under four miles from our Bloomsbury campus. These rooms are offered at a special rate for UCL students, and so prices for the same properties may be higher on other websites.

Contact us at accommodation@ucl.ac.uk, facebook.com/uclaccommodation or @UCLAccommodation on Instagram.

Discover UCL for yourself

There’s always something exciting going on at UCL and our central London location makes finding us easy. We look forward to meeting you.

Come to one of our Open Days

Our next UCL Undergraduate Open Days will be hosted both online and in person. Our virtual Open Days, from 24 to 28 April 2023, are packed with subject admissions talks providing you an insight into our degree programmes. You will have the opportunity to speak to admissions staff and academic tutors and also interact with current students to find out what studying at UCL is really like.

Our in-person Open Days on 30 June and 1 July will allow you to experience and explore the Bloomsbury campus and meet with UCL staff and students.

See ucl.ac.uk/openday for more details.

To find out more about other opportunities to visit our campus, talk to student and staff, book a tour or details of Higher Education fairs, schools and country visits, visit ucl.ac.uk/prospective-students.

If you’d like to find out more

If you have a general enquiry about UCL and our degree programmes, feel free to contact us:

study@ucl.ac.uk

+44 (0)20 3108 8520

Access and Widening Participation

UCL runs a range of summer schools, taster days and other activities for prospective students from underrepresented groups. To find out more, including the eligibility criteria for these, visit: ucl.ac.uk/wp

How to get to us

Whether you’re coming from elsewhere in London, the UK or overseas, it’s easy to get to us. See ucl.ac.uk/maps/public-transport for directions.

Scan the QR code, or search: ‘UCL Open Days’ to find out more
