

DoP Green Awareness

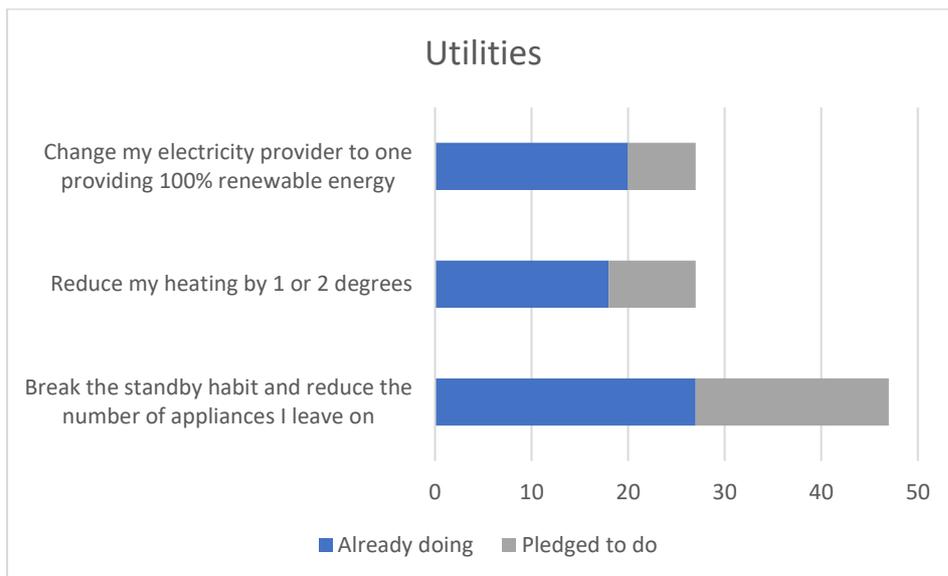

Pledges for the Planet 2021

In February 2021, the DoP Green Team invited members of the Division to make Green “Pledges for the Planet”. Potential Pledges were presented in the format of an anonymous survey, and staff and students were asked to select Pledges they wanted to make, from a list of thirty-three in seven categories. Respondents were also asked if they were already undertaking any of these activities.

Sixty people responded. Overall, the top new Pledge made is to check and avoid, as far as possible, buying products which contain palm oil (29/60). The top Pledge respondents are already doing is reusing or recycling unwanted items (48/60).

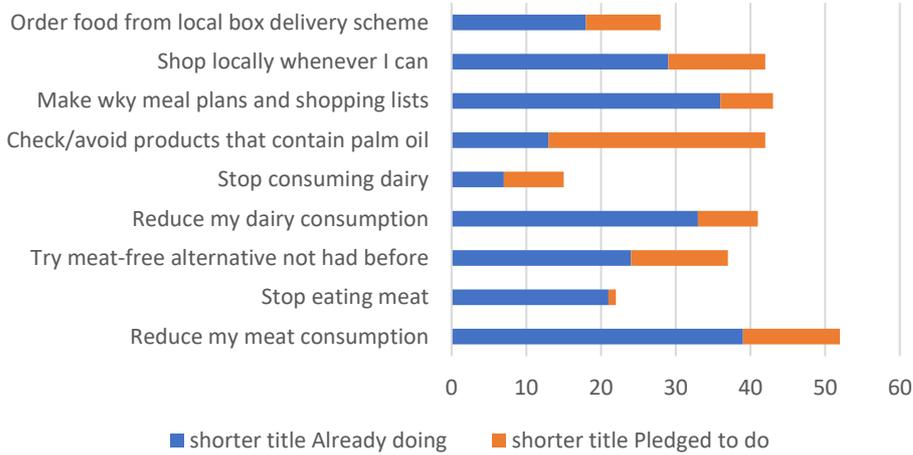

The full results by number of respondents in each Pledge category are shown below:

Household

Food and drink

Garden/outdoor space

Social actions

Plastic use
