- **Do you have a serious physical or mental health problem?**
- **Are you a carer or healthcare professional for people who need palliative care or psychiatry services?**

RESEARCH STUDY OF EXPERIENCES OF WORKING TOGETHER

- This is a study about who talks to who and what happens as a result when people need palliative care or mental health care for serious illness.

You can take part if you are:

- **an adult patient receiving palliative care or mental health care**
- **a relative or friend (informal carer) of someone who needs one of these services**
- **a healthcare professional working in specialist palliative care (hospital or community based), Liaison Psychiatry or a community Rehabilitation & Recovery team**
- **a healthcare professional working in an acute medical unit, ambulatory care, or community care**

- The study involves discussing day to day care in interviews with patients, informal carers and professionals. Some participants will be invited to keep diaries, and attend groups or workshops to discuss ideas for change and improvement.
- The study is led by the Marie Curie Palliative Care Research Department, Division of Psychiatry, University College London.
- NHS study sites are Camden and Islington NHS Foundation Trust, Central and North West London NHS Foundation Trust, University College Hospitals NHS Trust, Whittington Health NHS Trust and related services.
- It is your decision if you want to take part. Your decision will not affect the care patients receive.
- The study will be conducted according to Covid-19 restrictions. This may mean participating remotely with support from the research team – please contact us for further information.
