

Climate Action

Problem

Lack of agency
Agency = ability to act

Protagonists

Communities of Place

Communities of Practice

Organisations

Our Insights

Understanding of the challenges that paralyse the delivery of climate action

Expertise in design and facilitation of agency-building interventions

Outcomes

Increased agency for climate action

Repeatable intervention process leading to exponentially growing number of people developing their own meaningful action

Organisations and sectors with more robust climate action plans

Long-Term Changes

A richer variety of ideas for climate action across society

Large-scale systemic and policy changes as a consequence of increased agency across different communities
