

## Acknowledgement

Many people have contributed in a variety of ways in the preparation of this report on **“The Latest Policy Trends of Satellite Data Utilisation in the UK”**. Without the help of them, it was impossible to finish my report.

First of all, I am grateful to my supervisor, Professor Sa'id Mosteshar, the Director of the London Institute of Space Policy and Law (ISPL). His constant guidance and advice played the vital role in making the execution of this report. He always gave me his suggestions that were crucial in making this report as flawless as possible.

My special gratitude goes to Professor Alan Smith, the Director UCL Space Domain, for conferring the title of Honorary Research Fellow in his domain on me and providing me with his helpful advice to carry out my research activities perfectly.

I am also particularly grateful to Dr. Dimitra Stamogiannou, the Departmental Manager of the UCL Department of Space and Climate Physics, for her continuous support.

I perceive as this opportunity as a big milestone in my career development as an officer of the Japanese Government, the Ministry of Education, Culture, Sports, Science and Technology (MEXT). I will strive to use gained knowledge in the best possible way, and I will continue to work on its improvement in Japan. Hope to continue cooperation with all of you in the future.

Sincerely,

Eiki Yanata

London Institute of Space Policy and Law (ISPL)
