**UCL DEPARTMENT OF SECURITY AND CRIME SCIENCE**

# Module Catalogue (Postgraduate)

**2019-2020**

**VERSION 1- 06/19**

## Overview

This catalogue describes undergraduate modules hosted by the UCL Department of Security and Crime Science (SCS) that are available to external students for the 2019-20 academic session. The information provided here is correct at the date of publication (see header above) but may alter. Please check the latest edition of the module catalogue and the on-line time table prior to formally registering on any of these modules.

All the below SCS modules are Level 7 and are worth 15 credits.

It is the student's responsibility to ensure that the selection of the module satisfies the requirements of their particular degree.

## Timetable information

We use the UCL online timetable (www.ucl.ac.uk/timetable) which provides information about module times and locations. Students should continue to check class locations regularly using the online timetable as rooms are subject to change without prior notice.

Before formally registering on a SCS module, please check for timetable clashes between modules and for any prerequisites. Clashes are not an acceptable excuse for missing classes; it is the student's responsibility to check carefully that they can attend all sessions.

Due to room sizes there may also be limitations on the total number of students who can enrol on any module, before making an application please contact the Programme Administrators, Paola Pane and Andrea Henny (scs@ucl.ac.uk) to enquire about availability.

# SCS modules open for students from other departments

Please click on the titles to be redirected to the UCL Beta Module Catalogue where you can find more information about the modules. If the module you are interested in has any prerequisites, please send an email to scs@ucl.ac.uk detailing how you meet these.

## Autumn term

| Module code | Title |
| --- | --- |
| SECU0021 | Forensic Geoscience |
| Prerequisites | Students wishing to take this module must have geography, earth science, archaeology or anthropology background. |

| Module code | Title |
| --- | --- |
